## CASUALTIES.

*July 5, 1887.*—Bangor and Boston R. P. O. collided with train No. 16 on the Maine Central Railroad at Farmingdale Siding, Me., demolishing 20 feet of postal car. Clerks H. S. French, V. H. Sprague, G. W. Soper, and R. E. Deasey were slightly injured. No mail lost or damaged.

*July 7, 1887.*—New York and Dunkirk R. P. O., train No. 3, collided with a freight train 3 miles east of Waverly, N. Y., delaying train three hours. No injury to clerks or damage to mails.

*July 11, 1887.*—Memphis and New Orleans R. P. O., train No. 4, ran over a horse at Cottonville, La., throwing engine-tender, baggage, mail, and express off the track. The mail was scattered upon the floor and slightly damaged by oil and coal, but none lost or destroyed. No one hurt.

*July 13, 1887.*—Cincinnati and Livingston R. P. O. was run into by a "wild" engine and completely wrecked near Robertson, Ky., and Postal Clerk M. J. Hall seriously injured. The postal car was totally destroyed, though no mails were lost or damaged.

*July 14, 1887.*—Baltimore and Grafton R. P. O., train No. 6, collided with Baltimore and Grafton R. P. O., train No. 1, at Gaithersburgh, Md., badly wrecking postal car on No. 6. No injury to clerks or loss or damage to mails.

*July 18, 1887.*—Albuquerque and Los Angeles R. P. O., train No. 52, collided with east-bound freight at Peach Springs (n. o.), Ark., completely wrecking postal car and badly bruising Acting Clerk F. H. Snowden. Mails transferred to express car without loss or damage.

*July 22, 1887.*—Cairo and New Orleans R. P. O., train No. 4, engine and postal car left the track near Winona, Miss., and went down an embankment. The postal car was considerably damaged, the front trucks having been torn away. Postal Clerk F. J. Snow slightly bruised. No mail lost or damaged.

*July 27, 1887.*—Macon and Montgomery R. P. O., train No. 3, was wrecked 8 miles south of Eufaula, Ala. The front end of postal car was telescoped by tender of engine and completely demolished. No mail lost or damaged and clerks uninjured.

*July 27, 1887.*—Atlanta and Montgomery R. P. O., train No. 52, jumped the track near Opelika, Ala., slightly injuring postal clerk. All mail recovered without serious damage.

*July 29, 1887.*—Grand Rapids and La Crosse R. P. O., train No. 4, ran through an open switch at Hoppertown, Mich. Mail apartment car slightly damaged. No injury to clerks, or loss or damage to mails.

*July 29, 1887.*—Cincinnati and St. Louis R. P. O., train No. 2, while descending a grade 3 miles west of Aurora, Ind., at a speed of 40 miles an hour, the axle on the tender broke, derailing entire train. The postal car, being the first to leave the track, was thrown into the ditch, and, being struck by the baggage-car, was completely demolished. Postal Clerks R. E. Baker and P. E. Grimes were precipitated beneath the front trucks of the parlor car. Baker was instantly killed. When his body was recovered (four hours after the accident) his head and breast were fearfully mangled. Grimes was seriously injured in the shoulder and otherwise bruised, being incapacitated for duty two hundred and ten days. Clerks John C. Clark and N. C. Yelton were also considerably bruised and incapacitated for duty. The mail, which was considerably damaged by dirt and torn, was picked up and turned into the Cincin-

nati post-office, and all forwarded to destination except a few pieces upon which the address could not be found. All registered matter saved except package No. 3698, from St. Louis, Mo., July 29, 1887, for Aurora, Ind.

*July 30, 1887.*—Lancaster and Boston R. P. O. ran into an open switch near Hooksett, N. H., derailing train and badly wrecking postal car No. 56. Clerks unhurt. No mails lost or damaged.

*July 30, 1887.*—Cairo and New Orleans R. P. O., car No. 123, was thrown from the track at Water Valley, Miss., and, turning on its side, was badly damaged. The mail was thrown from letter-case and some damaged by oil from lamps. None lost, and no one hurt.

*July 30, 1887.*—Jefferson and McKinney R. P. O., train No. 141, was wrecked 5 miles west of Farmersville, Tex., by mail-apartment car jumping the track and falling 10 feet down an embankment. Postal Clerk A. Rowell sustained several severe cuts and bruises, incapacitating him for duty twenty days. All mails recovered, but portion considerably damaged by oil.

*August 4, 1887.*—Ogdensburg and Utica R. P. O. ran over an open switch at Morristown, N. Y., and was derailed. No injury to clerk or loss or damage to mails. Delayed six hours.

*August 10, 1887.*—Deming and Los Angeles R. P. O., train No. 20, was held up by robbers 8 miles west of Pantano, Ariz. The engine and mail car were derailed. The robbers forced Postal Clerk John Grattan to leave his car. They then blew a hole in the side of the express car with giant powder, compelled Grattan to enter it, while they closely followed; forcing the express messenger to open the safe, they robbed it of its contents and left without molesting the mail car. Train arrived at Los Angeles thirteen hours late.

*August 16, 1887.*—Kansas City and Pueblo R. P. O., train No. 6, was wrecked by a wash-out at Medway Station, 7 miles east of Coolidge, Kans. Engine and postal car left the rails, the trucks of the former being forced through the floor of the latter, where Postal Clerk C. L. Burge was distributing mail. He was violently thrown against the paper-rack, seriously bruising his hips and shoulders. The stanchions holding the mail broke and fell across the hips and back of Clerk W. T. Treleaven. This, with the mail, held him to the floor, seriously bruising his back. Both men were incapacitated for duty. No mails were lost, but a portion damaged by oil and dirt.

*August 17, 1887.*—Baltimore and Grafton R. P. O., train No. 4, running at a high rate of speed, left the track inside the Washington City limits, at a point known as the "Y," caused by air-brakes failing to work. The entire train was completely wrecked, the engineer killed, and the fireman and several passengers seriously injured. Although postal car No. 31 was smashed to pieces, Clerks C. J. Hooton, J. H. Brown, and S. C. Marlow were only slightly injured. Entire mail saved, but a portion saturated with oil.

*August 20, 1887.*—Gainesville and Galveston R. P. O., train No. 1, was wrecked by cattle near Clifton, Tex., derailing mail-apartment car and tearing it to pieces. Postal Clerk R. J. Wilson considerably bruised and disabled for eight days. Mails badly damaged by water and steam and from oil, but none lost.

*August 21, 1887.*—Los Angeles and Santa Barbara R. P. O., train No. 38, mail, baggage, and express, and three passenger coaches were derailed near Saugus Junction, Cal., by spreading of the track. Mails considerably damaged by oil and water, but none lost. Clerk unhurt.

*August 23, 1887.*—Pittsburgh and Cincinnati R. P. O., second section of train No. 6, left the track at Creswell, Ohio, caused by spreading of the rails. Paper car No. 9 and storage car No. 53 were badly damaged. No injury to clerks or loss or damage to mails.

*August 23, 1887.*—Washington and Charlotte R. P. O., train No. 53, collided with a freight train one-half mile north of Orange Court-House, Va. The mail-car was telescoped by tender of engine and flooded with water, badly damaging the letter mail. The car was badly wrecked and Substitute Clerk John H. Lane was injured in the back and breast. Clerk J. Y. Weddington was also injured, having his ankle sprained. No mail lost.

*August 24, 1887.*—Missouri Valley and Rapid City R. P. O., train No. 4, was wrecked and postal car demolished between Wood Lake and Johnstown, Nebr. Mails transferred to way car without loss or damage. Fireman killed, but postal clerk received no injury.

*August 24, 1887.*—Rome and Gadsden R. P. O. (steamboat service) mail steamer *J. J. Leay* was destroyed by fire at Cedar Bluff, Ala. All mail (except the registered), together with pouches, canvas, and locks, were destroyed. No one injured.

*August 30, 1887.*—Cairo and New Orleans R. P. O., train No. 5, wrecked 2 miles east of Jackson, Miss., and postal car completely demolished. No injury to clerk or loss or damage to the mails.

*August 30, 1887.*—Chicago and West Liberty R. P. O. While train was running at a high rate of speed Postal Clerk H. S. Morgridge fell out of the car door near Bird's Bridge, a few miles from Joliet, Ill., and was instantly killed. When found, the back of his head was crushed and his neck dislocated. Near him was a car chair, which was also crushed to pieces. It is supposed Morgridge was sitting in the chair near the door, or in the act of sitting down, when a sudden lurch of the car threw him into the door-way, so far out that he was unable to recover his balance, and that he clung to side of the door for a moment and fell so near the car that he was struck in the head by the rear steps, since, upon the latter, blood and brains were found.

*September 1, 1887.*—New Orleans and Marshall R. P. O., train No. 51, was wrecked near Rosedale, La. Mail badly damaged, but none lost, and clerk unhurt.

*September 2, 1887.*—Denver and Pueblo R. P. O., train No. 4, was wrecked by rocks falling on a bridge and breaking it down, 25 miles west of Pueblo, Colo. The engineer and one other person were killed. Postal Clerk G. W. Meldrum badly bruised. No mail lost or damaged.

*September 4, 1887.*—Baltimore and Freeport R. P. O. (steamboat service). The steamer *Avalon*, together with all the property of the Department, also 25 letters and 4 bundles of papers, were destroyed by fire. The accident occurred at night and Postal Clerk J. R. Macenbbin, who was asleep in his berth, barely had time to escape through the window of his state-room.

*September 7, 1887.*—Burlington and Council Bluffs R. P. O., train No. 7 (fast mail), collided with train No. 3, near Afton, Iowa, and Postal Clerk W. A. Ramplin was seriously injured and incapacitated for duty sixty days. No mails lost or damaged.

*September 10, 1887.*—Baltimore and Lexington R. P. O., train No. 10, was wrecked at Timberville, Va. Three cars left the track, and mail car No. 76 turned on its side and was slightly damaged. Postal Clerks J. A. Bartlett and J. H. White slightly injured. All mails saved and transferred to car No. 77.

*September 12, 1887.*—Baltimore and Grafton R. P. O., train No. 2, was wrecked at Sleepy Creek Bridge, W. Va. Entire train derailed and cars badly damaged. Mails saved and transferred to postal car of train No. 5. No one injured.

*September 15, 1887.*—Nashville and Hope R. P. O., train No. 3, was wrecked between Ozan and Washington, Ark., by spreading of the rails. Passenger coach and mail apartment car derailed; the latter badly damaged and mails scattered, but none lost or materially damaged. Clerk A. H. Johnson sustained severe injuries, and was incapacitated for duty thirty days.

*September 15, 1887.*—Cairo and Texarkana R. P. O., train No. 2, was wrecked 2 miles north of Nolton, Ark., caused by a broken fish-plate. Engine was a complete wreck, and postal car thrown down an embankment on its side. Fireman jumped from the engine, and being caught under postal car, was killed. Clerk L. H. Lohr escaped with a few slight bruises on head and back. No mail lost or damaged. Delayed ten hours.

*September 17, 1887.*—Tacoma and Portland R. P. O., train No. 2, while halting to investigate the cause of a torpedo signal, was run into by a special freight. Letter mail was thrown from cases and water-tank upset upon the paper mail. Railroad Post-Office Clerk McKinney (of Saint Paul and Mandan R. P. O.), who was riding with Acting Clerk D. N. Burwell, was thrown violently to the floor, and his arm severely bruised. Some mail damaged by water, but none lost.

*September 19, 1887.*—Chicago, McGregor and Saint Paul R. P. O., train No. 3 (west bound), collided with train No. 4, 2 miles north of Dubuque, Iowa. Mail car left the track and rolled over twice, taking fire from the lamps. Before it could be extinguished 200 letters were destroyed and a number damaged. One of the clerks, James Hurley, sustained injuries to his lower limbs and back. Damaged mail taken to Dubuque, Iowa, post-office, separated, and all that could be was forwarded to destination and the remainder to Dead Letter Office.

*September 19, 1887.*—Dallas and El Paso R. P. O., train No. 4, was stopped by masked men a short distance east of Denver, Tex., who boarded the train and robbed the mail car of 10 registered packages.

*September 22, 1887.*—Pittsburgh and Chicago R. P. O. was wrecked at Elida, Ohio, being run into by train No. 5. The tender of engine telescoped postal car No. 82, completely wrecking it, the postal clerks miraculously escaping death by jumping from the car. Much mail badly damaged by water and dirt, the address on many pieces being entirely illegible.

*September 23, 1887.*—Streator and Fairbury R. P. O., train No. 253, was thrown from the track  $1\frac{1}{2}$  miles north of Fairbury, Ill., ditching mail car, passenger coach, and freight car. No injury to clerk, or loss or damage to mail.

*September 23, 1887.*—Denver and Pueblo R. P. O., train No. 1, was wrecked 2 miles east of Elizabeth Station, Colo., by the breaking of flange on car wheel. The engine fell a distance of 100 feet down an embankment, the mail and baggage car following. Mail was scattered about the car, and the oil-stove, which had just been lighted, overturning, a large portion was scorched and saturated with oil, but not sufficient to prevent forwarding to destination. Postal Clerk James M. Rand miraculously escaped death.

*September 27, 1887.*—Cairo and West Point R. P. O., train No. 2, was wrecked by bad track 3 miles south of Jackson, Tenn., seriously injuring thirty people, among whom was Postal Clerk J. B. Jones, whose

shoulder was so badly hurt he was sixty days incapacitated for duty. Postal car completely demolished and mails badly damaged.

*September 27, 1887.*—Texarkana and El Paso R. P. O., train No. 4, collided with west-bound freight train near Odessa, Tex., demolishing engine, tender, express car, and slightly damaging mail apartment. No mail lost or damaged, and clerk unhurt. Delayed twelve hours.

*February 20, 1888.*—Portland and Swanton R. P. O., train No. 2, collided with a log train one-half mile west of Fabyans, N. H., demolishing postal car No. 3, and necessitating its abandonment. Mails transferred to car No. 75 without loss or damage. Clerk uninjured.

*February 23, 1888.*—Dallas and Kemp R. P. O., train No. 1, was wrecked 6 miles south of Dallas, Tex. Mails transferred without loss or damage from mail apartment to box car. Clerk unhurt.

*February 25, 1888.*—Omaha and Ogden line express train No. 4, east bound, collided with a freight train at Colton, Nebr. The train took fire from an oil car and 1,120 pounds of mail from Ogden, and all the mails from the Green River and Huntington R. P. O., Rawlins, Laramie, Cheyenne, Wyo., and Sidney, Nebr., were burned.

*February 27, 1888.*—Chicago and Burlington R. P. O., train No. 2, left Galesburg, Ill., six hours late on account of the strike of the loco.

motive engineers. At 2.45 train arrived at Naperville, at which point train was obliged to stop for want of steam. The engine was detached from train and run ahead for the purpose of facilitating the raising of steam, and in backing up the engineer lost control of the locomotive and struck the mail-car while running at a speed of 35 miles an hour. The tender was forced back into mail-car 40 feet, completely demolishing the storage end. Postal Clerks W. F. Stenson and George B. Clark were caught and buried under wreck, and deluged with cold water from the tender. Clark was rescued first and was found to be seriously injured in the face, hands, and back. It took one and one-half hours to get Stenson out from under the tender. His left foot was badly injured and his great toe broken. Clerk John T. Durkin injured his knee in jumping out of the car. Clerk John E. Dooley had his shoulder sprained. Clerk L. A. Goss received a slight cut on his arm. Clerk-in-charge A. H. Rice escaped without injury. About 50 letters and a few papers were damaged by water. Six registered pouches, 1 pouch for Chicago, 1 pouch for New York and Chicago R. P. O., and 50 sacks of papers, all of which were buried under the tender, were recovered and forwarded to Chicago the following day.

*February 27, 1888.*—Racine and Rock Island R. P. O., train No. 1, was run into at Fulton, Ill., by the Mendota and Fulton R. P. O., train No. 95, wrecking both postal cars and injuring Clerk William D. Brown of the former line, he having received a cut on the knee and was severely bruised on the back and legs. All mails saved, but a portion damaged by oil.

*February 28, 1888.*—Cedar Rapids and Council Bluffs R. P. O., Railway Postal Clerk J. H. Murphy reports that 6 empty tie sacks and one-third sack of paper mail were injured by fire and water, and 6 pieces of paper mail destroyed by fire, owing to the falling of a lamp in his car.

*March 1, 1888.*—New York and Pittsburgh R. P. O., train No. 6. Postal car No. 19 collided with some projection of a passing freight train, bending the platform irons and crushing in end of car. No injury to clerks or mails.

*March 2, 1888.*—West Liberty and Council Bluffs R. P. O. delayed at Newton, Iowa, on account of wreck blocking the track at Colfax. While trying to get around via Monroe the engine and front trucks of postal car were derailed by passing over misplaced switch. No injury to clerk or mails.

*March 2, 1888.*—Nebraska City and Broken Bow R. P. O. While at Ravenna, Nebr., engineer lost control of engine in endeavoring to make connection, resulting in a collision with postal car and breaking in the front end. Delayed six hours. No injury to clerk or mails.

*March 3, 1888.*—Palestine and Laredo R. P. O., train No. 652, was wrecked at Cactus, Tex., by a broken rail. No injury to clerk or mails. Delayed twelve hours.

*March 5, 1888.*—Denison and San Antonio R. P. O., train No. 7. Paper mails for the connecting lines and through points, which were in storage end of car, caught fire, and 22 sacks of paper mail were damaged and 10 sacks destroyed. Mails were piled too near the stove, which was thought to have had no fire in it. Damaged mail taken to Taylor, Tex., and all forwarded to destination, except 7 sacks, which were sent to Dead-Letter Office.

*March 5, 1888.*—Texarkana and Fort Worth R. P. O., train No. 1, ran through an open switch at Sherman, Tex., and collided with an empty

passenger train. The postal car was disabled, necessitating transfer of mails to baggage car. No injury to clerk or loss or damage to mails.

*March 6, 1888.*—Council Bluffs and Kansas City R. P. O., train No. 2, collided with a freight train near Hamburg, Iowa. No injury to clerks, car, or mails.

*March 8, 1888.*—Kansas City and Red Cloud R. P. O., train No. 15, collided with train No. 72 of the Columbus and Atchison R. P. O. at Humboldt, Nebr., on account of brakeman failing to turn switch in time. Some letters thrown from cases and damaged by water, but none lost. Clerks unhurt.

*March 11, 1888.*—Cincinnati and Chattanooga R. P. O. (night line), train No. 5, was wrecked near Burnside, Ky., and postal car had portion of floor torn up and steps broken off. No clerks hurt. Mails, badly scattered and slightly damaged by oil, were transferred to baggage car.

*March 12, 1888.*—Palatka and Punta Gorda R. P. O., train No. 19, collided with freight train at Webster, Fla., killing engineer and slightly injuring mail weigher. No injury to clerk or mails.

*March 14, 1888.*—Pacific Junction and McCook R. P. O. (east bound). Train took the side track at Atlanta, Nebr., to wait for the passing of a freight train. The engineer discovered that he was nearly out of water, and uncoupled his locomotive in order to run to Holdrege, Nebr., for a supply. Returning swiftly, the engine struck the train with considerable force, damaging the mail car and throwing a lot of letters from the cases to the floor, where a portion was damaged by oil. Clerks uninjured.

*March 14, 1888.*—Denver and Ogden R. P. O., train No. 8, was wrecked 1 mile east of Montrose, Colo., ditching two coaches and completely telescoping postal car. Mails thrown upon the floor, but recovered without loss or damage and transferred to express car. Railway Postal Clerk W. T. Newton considerably bruised.

*March 14, 1888.*—East Lynne and Brownington R. P. O., train No. 1, was wrecked one-half mile south of Clinton, Mo., the engine, mail car, and one coach leaving the track. No injury to clerk or mails.

*March 14, 1888.*—Williamsport and Port Clinton R. P. O., train No. 4, left the track 1 mile north of Port Clinton, Pa., damaging postal car and considerably bruising Clerk J. M. Decker. This is the last of a number of accidents in which Clerk Decker has been involved, and nearly always with injury to himself. No mails lost or damaged.

*March 16, 1888.*—Omaha and Ogden R. P. O., train No. 1, collided with a freight train at Bronson, Nebr., necessitating transfer of mails to express car. No injury to clerk or loss or damage to mails.

*March 16, 1888.*—New York and Pittsburgh R. P. O., train No. 8. As above R. P. O. was leaving the Broad Street Station at Philadelphia, Pa., it was run into by an engine which broke in the end of letter-car No. 21, seriously injuring Postal Clerk R. G. Caldwell, and slightly injuring clerks T. A. Warlow and J. R. McCoy. Considerable mails damaged by water, but none lost.

*March 17, 1888.*—Monett and Halstead R. P. O., train No. 3, was wrecked near Brooks Station, Kans., caused by spreading of the rails. Engine and mail apartment derailed, the latter turned on its side and so disabled that mails were transferred, without loss or damage, to caboose. Clerk unhurt.

*March 23, 1888.*—Cartersville and Talladega R. P. O., train No. 1, telescoped freight car near Lampa, Ala., wrecking postal-car, and slightly injuring Railway Postal Clerk H. B. Goodwin. No mails lost, damaged, or destroyed.

*March 24, 1888.*—Harrisburg and Martinsburgh R. P. O., train No. 1, ran through an open switch into freight cars standing on side-track near Gettysburgh Junction, Pa. Postal car slightly damaged. One sack of paper mail for Chambersburgh, Pa., damaged by water. Postal Clerks C. W. Boyer and H. Brinkman escaped—the former slightly bruised.

*March 24, 1888.*—Grafton and Chicago R. P. O. (E. D.), train No. 6, collided with a freight train at Littleton, W. Va. The postal car was badly damaged, necessitating transfer of mails to baggage car. No injury to clerks or loss or damaged to mails.

*March 26, 1888.*—Omaha and Ogden R. P. O., train No. 4, ran through an open switch at South Omaha, Nebr., breaking the front platform and roof of postal car No. 1160. Postal clerks escaped injury, except A. G. R. Calhoun, who was slightly injured by being thrown partly through the glass in the door. No mails lost or damaged.

*March 28, 1888.*—Boonville and Versailles R. P. O., train No. 184, was wrecked 8 miles north of Tipton, Mo. Mails transferred to box car without loss, a portion being slightly damaged by oil. No one hurt.

*March 28, 1888.*—Portland and Nazareth R. P. O., train No. 2, while rounding a curve near Penn Argyle, Pa., the mail apartment end of car No. 13 left the track over a 3-foot embankment and ran 100 feet. Letters were thrown out of case and somewhat damaged by oil, but none lost or destroyed. Clerk unhurt. Almost precisely the same accident occurred the following day (29th) to the same train and car.

*March 31, 1888.*—Grafton and Cincinnati R. P. O., train No. 4, ran through an open switch at Centre Belpre, Ohio, resulting in slight damage to postal car, but no injury to clerk or mails. The latter transferred to baggage car.

*April 1, 1888.*—Cairo and Texarkana R. P. O. As Postal Clerk Lord Harleston went to the car door for the purpose of delivering pouch to what he supposed was Macon post-office, the car lurched to the left side, and the lower door, having a defective bolt, flew open with the force of the motion of the car; the reverse side motion threw him through the open doorway and out against a bank, thereby causing concussion of the spine from which he has never recovered. Train was moving at the rate of 20 miles an hour at the time.

*April 4, 1888.*—Branch Junction and Pittsburgh R. P. O., train No. 3, ran into a land-slide west of Selina, Pa., throwing engine and postal car off the track. Mails delayed three hours, but not damaged. Clerk unhurt.

*April 5, 1888.*—Calmar and Chamberlain R. P. O., train No. 1, went through a bridge near New Hampton, Iowa. The express mails in baggage car were immersed in water and, when recovered, were removed to Sanborn, Iowa, opened and examined by railway postal clerks. They were found to be thoroughly water-soaked and in very bad condition. The letter mail and a small portion of paper mail (after they had been dried) were forwarded to destination. Six and one-quarter tie sacks of paper mail, from which the wrappers had been washed, could not be forwarded. The amount of mail involved consisted of thirteen pouches of letter mail and ten tie sacks of paper mail.

*April 5, 1888.*—Denison and Taylor R. P. O., train No. 506, ran over a horse 2 miles north of Wautaga, Tex., and was wrecked. No injury to clerks or loss or damage to mails. Delayed nine hours.

*April 5, 1888.*—Pinckneyville and Marion R. P. O., train No. 22, was derailed  $1\frac{1}{2}$  miles north of Creal Springs, Ill. No injury to clerk or mails.

*April 6, 1888.*—Texarkana and El Paso R. P. O., train No. 4, was

wrecked by a broken wheel under postal car 4 miles east of El Paso, Tex. Returned to El Paso and substituted car No. 304 for disabled one. No mails lost, but a portion damaged by oil. Clerk unhurt.

*April 6, 1888.*—Essex Junction and Boston R. P. O. Five pouches and 5 sacks of mail were burned on express train No. 52 at Bartonsville, Vt.

*April 7, 1888.*—Council Bluffs and Kansas City R. P. O., train No. 3, collided with freight-train No. 18, at Hall's Station, Mo. No injury to clerk or loss or damage to mails.

*April 9, 1888.*—Dallas and Kemp R. P. O., train No. 1, was derailed and wrecked 1 mile south of Crandall, Tex. R. P. Clerk W. H. Miller received a severe cut in the face, injury to the spine, a hurt on the knee, and a fracture of the nose, being totally incapacitated for duty. No loss or damage to the mails.

*April 10, 1888.*—Columbus and Albion R. P. O., train No. 69, was derailed 5 miles west of Genoa, Nebr., caused by spreading of the rails. Postal Clerk G. G. Whitmore slightly bruised. No loss or damage to mails.

*April 10, 1888.*—Helena and Portland R. P. O., train No. 2, ran into a drove of cattle at Lake, Wash., derailing several cars and tearing up 100 feet of track. No injury to postal-car clerk or mails. Arrived at Spokane Falls sixteen hours late.

*April 11, 1888.*—Kankakee and Seneca R. P. O., train No. 72, was wrecked between Wauponsee and Seneca, Ill. No injury to clerk or mails.

*April 12, 1888.*—Monett and Paris R. P. O., train No. 2, collided at Tuskahoma, Ind. T., with two flat cars, which were pushed on main track, where they ran down grade, causing the collision. No mails lost, but a few letters soiled by water. Clerk unhurt. Delayed twelve hours.

*April 12, 1888.*—Boston, Springfield and New York R. P. O. (night line), and Boston, Providence and New York R. P. O. While mail cars for above R. P. O.'s were being switched in yard of the Grand Central depot in New York, N. Y., they were thrown into depot without a brakeman, and, colliding with a train, postal car No. 58, of the former line, was damaged and mails thrown out of case. J. P. O'Neil, city distributor, had an arm wrenched, head bruised, and was incapacitated for duty. J. M. Bennett, of the latter line, was cut over the eye and had his hip bruised. P. H. O'Neil, also of the latter line, had his back badly bruised. No mails lost or damaged.

*April 14, 1888.*—Burlington and Council Bluffs R. P. O., train No. 5, collided with a freight train  $1\frac{1}{2}$  miles west of Creston, Iowa. Forward postal car was completely wrecked, and, immediately taking fire, was destroyed with all mail therein except 1 pouch of letter mail for Nebraska City, Nebr. The through-registered pouch—Chicago, Ill., to Council Bluffs, Iowa—was destroyed. Storage car, also, was burned, but all mail therein saved. W. W. Dungan, clerk in charge, reports loss of registry-receipt book, all schemes, and clerks' effects. No one injured.

*April 15, 1888.*—Kansas City and Oxford R. P. O. collided with a freight train at Kesterson, Nebr., and was wrecked, which necessitated transfer of mails to box car. No one injured nor mails lost or damaged.

*April 15, 1888.*—Pacific Junction and McCook R. P. O., train No. 4, while standing at Dorchester, Nebr., was run into by a backing engine. Water tank of the latter burst, flooding the postal car. Activity on the part of the clerks succeeded in saving the mail, with but a small portion damaged by water. No one injured.

*April 15, 1888.*—Chetopa and Larned R. P. O. train, No. 481, was derailed near Winfield, Kans. Postal car turned on its side and a portion of the mail damaged by oil, but none lost. Postal clerk unhurt.

*April 15, 1888.*—Fernandina and Orlando R. P. O. train, No. 8, was derailed near Bryceville, Fla., and Postal Clerk J. C. McKay slightly injured. Mails scattered, but none lost or damaged. Delayed one day.

*April 15, 1888.*—New York and Pittsburgh R. P. O., express train (P. R. R.) No. 37, collided with an engine near Thirtieth street, Philadelphia, Pa. Baggage car, containing closed mails, was overturned, and pouches for Philadelphia and Lancaster, which were piled near the door ready for delivery, were thrown against the stove and badly damaged by fire and water, but contents were forwarded to destination. About 2 sacks of paper mail from New York for Philadelphia were so damaged they could not be delivered.

*April 17, 1888.*—Rochester and Punxsutawney R. P. O. collided with freight train at Crawford Junction, Pa., badly damaging apartment car. Mails transferred without loss or damage to baggage car. No one hurt.

*April 21, 1888.*—New York and Dunkirk R. P. O., train No. 13, while running at a high rate of speed, engine left the track in consequence of a disabled wheel, completely wrecking it, together with six cars, and injuring engineer and fireman. Fortunately the postal car, by request, was on the rear of train and escaped injury.

*April 27, 1888.*—Omaha and McCook R. P. O., train No. 16, went through a bridge between Orleans and Alma, Nebr., precipitating the postal, baggage, express cars, and one passenger coach into the stream. Clerk-in-Charge James B. Martin escaped without injury. Clerk W. F. J. Comley had two ribs broken. Two persons were killed. The cars took fire, but Clerks Martin and Comley worked hard and succeeded in securing all mail, excepting about 100 letters and one-third of the sack of papers. Several registered letters were lost. Accident caused by supports to bridge being washed out by heavy rains.

*April 28, 1888.*—Buffalo and Emporium R. P. O. train was wrecked one-half mile south of Portville, N. Y., caused by spreading of rails. No mails lost or damaged, but Postal Clerk Wales Wasson and Helper Charles Keenan were both seriously injured, the former being cut and burned on the head, left shoulder and side bruised, left arm and hand burned, with other slight bruises and cuts on his face and body. Keenan had his left shoulder-blade broken. The postal car was the first to leave the track, going over an embankment 15 feet high, making a complete revolution. The trucks were torn off when the car turned. Clerk Wasson, notwithstanding his injuries, made up his mail to go south in locked pouches and forwarded them in care of baggage-men.

*May 2, 1888.*—Deming and Los Angeles R. P. O., train No. 19, collided with a freight train at White Water Station (n. o.), Cal. When tender of engine telescoped postal car 5 feet, entirely demolishing it. Some mail damaged by water, but all forwarded to destination, reaching Deming, N. Mex., four hours late. Clerk unhurt.

*May 10, 1888.*—Lyons and Sayre R. P. O., train No. 9, was run into by a coal train  $1\frac{1}{2}$  miles south of Ithaca, N. Y., wrecking engines, two coaches, postal, and baggage cars. Mail and supplies badly mixed, but none lost or damaged, nor was clerk injured. Accident caused by breaking of hose connecting air-brakes, thus stopping mail train. The freight followed behind, and could not be checked in time to avoid the casualty.

*May 11, 1888.*—Denver and Ogden R. P. O., train No. 7, was ditched 6 miles east of Delta, Colo. No injury to clerk. Mails transferred without loss or damage to express car.

*May 11, 1888.*—Rutland, Bennington and Troy R. P. O. train ran off track at Danby, Vt., considerably injuring R. P. Clerk J. P. Fonda. Mails somewhat damaged by oil, but none lost or destroyed.

*May 14, 1888.*—Atchison and Lenora R. P. O., train No. 401, was wrecked 10 miles east of Concordia, Kans. No injury to clerk nor loss or damage to mails.

*May 14, 1888.*—Express train No. 7, Atchison, Topeka and Santa Fé R. R., collided with two "wild" freight cars (loaded with naphtha and gunpowder) at Fountain, Colo. Six persons were killed, a number seriously wounded, and the depot and adjacent buildings blown to pieces. The mails were in charge of train baggage-man. The car was entirely consumed, but the pouches and nearly all the canvas mails were saved, but 2 or 3 sacks of papers being destroyed.

*May 15, 1888.*—Columbus and Atchison R. P. O., train No. 72, was wrecked one-half mile north of Elk Creek, Nebr. No injury to clerk or loss or damage to mails.

*May 16, 1888.*—Express train No. 3, Denver and Rio Grande Railway, wrecked near Salida, Colo., smashing baggage car. No loss or damage to mails.

*May 16, 1888.*—The wharf-boat at Moscow, Ohio, in which the mail from steamer *Bonanza* was locked, was destroyed by fire and a small amount of letter and paper mail was consumed.

*May 21, 1888.*—Jacksonville and Pensacola R. P. O., train No. 2, wrecked 6 miles east of Tallahassee, Fla., seriously injuring Postal Clerk J. C. Gregory and badly damaging the mails.

*May 23, 1888.*—Denver and Ogden R. P. O., train No. 7, caught fire from mattresses which were being taken over the road in the baggage end of car. The car was side-tracked at Nada, Colo., and allowed to burn up, after all efforts to extinguish the fire were found useless. All mail saved in good condition.

*May 28, 1888.*—Kane and Callery R. P. O., train No. 18, ran into a cyclone 1 mile west of Lucinda, Pa. The terrible wind and rain storm brought the train to a stand on account of flying boards, fence-rails, etc., when the cyclone lifted the train, including the engine, from the track and threw it on its side. About thirty people were injured, but none seriously. Mail car fell on right side, and letter mail remained in case and protected from the rain by sacks with which Clerk W. S. Copley covered it. Some paper mail wet, but none seriously damaged. After several hours' delay, clerk, mail, and passengers were transferred to baggage car. An additional delay was caused by the necessity for removing trees that had fallen across the track, over one hundred being removed in less than 6 miles. Reached Kane at 7 a. m., 29th, a delay of fifteen hours.

*May 29, 1888.*—Lynchburgh and Pocahontas R. P. O. car, while standing on side-track at Bonsacks, Va., was run into by a coal train and so damaged as to be unfit for further service. Most of the mail was thrown from case, and a portion slightly damaged by oil, but none lost or destroyed. E. S. Dennis, postal clerk, slightly injured.

*May 30, 1888.*—Tyler and Lufkin R. P. O., train No. 100, wrecked between Alto and Forest, Tex. Postal car badly disabled and abandoned. Trip completed in box car. Clerk uninjured. No mails lost or damaged.

*May 30, 1888.*—Henrietta and Dallas R. P. O., train No. 552, was wrecked near Pilot Point, Tex., caused by the breaking of axle under tender. No mail lost or damaged, and no one injured. Delayed six hours.

*June 4, 1888.*—Arkansas City and Warren R. P. O., train No. 558, was wrecked 5 miles east of Warren, Ark., turning over postal car. No injury to clerk or loss or damage to mails.

*June 8, 1888.*—The express pouch from Sterling to Denver, Colo. (U. P. Rwy. train No. 306), and which was in charge of train baggage-man, fell upon the stove and was considerably burned. Letters not badly damaged and were all forwarded to destination, with explanation to addressees.

*June 13, 1888.*—Herington and Dodge City R. P. O., train No. 21, ran into an open switch near Dodge City, Kans., wrecking engine and delaying departure of train No. 22. No injury to clerk or mails.

*June 15, 1888.*—Sedalia and Denison R. P. O., train No. 507, was attacked by robbers near Muscogee, Ind. T. Clerk-in-Charge W. P. Colton went to the door of the car, when the train came to a sudden stop, and was commanded to "Get back, or I'll shoot your head off!" A shot followed this order before he could change his position, taking effect in his left arm. Two robbers then entered the car; finding that it was not the express car, they compelled Clerk J. W. Jenks, of the crew, to accompany them to the express car, ordering him to enter it while they followed. After robbing it, they took Mr. Jenks some distance up the track and told him to return to his car. In consequence of the wound, Mr. Colton was incapacitated for duty sixty days.

*June 16, 1888.*—Washington and Wilmington R. P. O., train No. 23, collided with a freight train at Laurel Station, 8 miles north of Richmond, Va. Postal car badly damaged and rendered unfit for service. No mail lost and all clerks escaped injury except H. D. Burkheimer, who jumped from the train and fractured his right leg between the knee and thigh. Accident caused by failure of engineer of mail train to see the flagman on account of the smoke.

*June 16, 1888.*—Nordmont and Hartley Hall R. P. O., train No. 4, was wrecked between Mawr Glen and Muncy Valley, Pa. No injury to mails, though postal car was badly damaged. Clerk M. A. Phillips was considerably hurt, but took the mail in a conveyance to Valley P. O., from which it was forwarded to Laporte.

*June 16, 1888.*—Oswego and Binghamton R. P. O., train No. 4, ran onto an open switch at Homer, N. Y., and collided with a coal "gondola," killing one man. Postal Clerk R. F. Randall jumped from the train and was seriously bruised about the body, and had his left wrist sprained. No mails lost, but 1 sack damaged by water.

*June 22, 1888.*—Buffalo and Youngstown R. P. O., train No. 3, collided with gravel train at Miller's Station, Pa., demolishing engine and nine flat cars. Postal Clerks G. W. Moore and F. A. McCullough were thrown on the floor by the collision, but escaped injury. A few papers damaged by water. Delayed four hours.

*June 25, 1888.*—Dallas and Kemp R. P. O., train No. 1, was wrecked on a bridge 1 mile south of Kleburgh, Tex., throwing mail apartment into the stream. Postal clerk uninjured. Mail considerably damaged by water and some lost. Trip completed in flat car.

*June 26, 1888.*—Kansas City and Pueblo R. P. O., train No. 6, collided with rear end of express train No. 2, at Kinsley, Kans., disabling postal car of the former and two sleeping coaches of the latter. Six sacks of mail damaged. Some paper mail, of which no description can be given, was buried under the cars and could not be taken out by clerks. Accident caused by train No. 6 being late and running at a high rate of speed; the air brakes failed to work when applied.

June 26, 1888.—Montgomery and New Orleans R. P. O., train No. 3, was wrecked near Tensaw, Ala. R. P. O. Clerk A. F. Davis was mortally injured, dying of his wounds the next day. Clerk T. O. Luckie was slightly bruised. Mail car demolished and 1 pouch of letter mail lost.

### STATEMENTS OF FINANCIAL OPERATIONS.

In continuation of the plan adopted in my last annual report, I present the following condensed statements of the revenue, expenditure, and cost of the postal service for the fiscal years ending June 30, 1886, 1887, and 1888, charging to the two former years whatever expenditures have been made on account thereof since their termination, and to all three their estimated liabilities, respectively, now outstanding, as well as the amounts earned by the Pacific railroad companies and credited to them on the books of the Treasury Department as provided by law:

#### FISCAL YEAR ENDING JUNE 30, 1886.

##### REVENUE.

1. Ordinary postal revenue .....	\$43,597,871.08
2. Revenue from money-order business .....	350,551.87
Total gross receipts .....	43,948,422.95
Deduct amount charged to bad debts .....	12,174.25
Leaves total revenue .....	43,936,248.70

##### EXPENDITURES AND LIABILITIES.

##### Expenditures:

From July 1, 1885, to September 30, 1886 .....	\$50,627,553.37
From October 1, 1886, to September 30, 1887 .....	211,881.50
From October 1, 1887, to September 30, 1888 .....	12,020.34

50,851,455.21

##### Liabilities:

Estimated amount of outstanding indebtedness for various objects on account of the year .....

\$286.40

Amount due for transportation on Pacific railroads, for which no appropriation was made .....

251,101.61

251,388.01

51,102,843.23

Deficiency in revenue .....

7,166,594.52

##### COST OF POSTAL SERVICE.

Amount of expenditures and liabilities as above .....	\$51,102,843.22
Amount certified to the Secretary of the Treasury for credit to Pacific railroads, from July 1, 1885, to September 30, 1886 .....	\$1,112,138.40
From October 1, 1886, to September 30, 1887 .....	391.22
From October 1, 1887, to September 30, 1888 .....	142.38
Total amount certified .....	1,112,672.00
Total cost of the service .....	52,215,515.22
Excess of total cost of postal service over revenue .....	8,279,266.52

The receipts were \$7,166,594.52, or 14 per cent., less than the expenditures and outstanding obligations, and \$8,279,266.52, or 15.8 per cent., less than the total cost of the postal service, inclusive of the amount certified to the Secretary of the Treasury for transportation of the mail on Pacific railroads.

Compared with the previous fiscal year, there was an increase of \$1,375,404.87, or 3.2 per cent., in the revenue; an increase of \$1,320,224.13, or 2.6 per cent., in the expenditures and liabilities; and an increase, also, of \$1,335,974.47, or 2.6 per cent., in the estimated total cost of the service.

## FISCAL YEAR ENDING JUNE 30, 1887.

## REVENUE.

1. Ordinary postal revenue.....	\$48, 118, 273. 94
2. Receipts from money-order business.....	719, 335. 45
Gross revenue.....	<u>48, 837, 609. 39</u>

## EXPENDITURES AND LIABILITIES.

## Expenditures:

From July 1, 1886, to September 30, 1887.....	\$52, 391, 677. 43
From October 1, 1887, to September 30, 1888.....	363, 160. 40
	<u>52, 759, 837. 83</u>

## Liabilities:

Amount of outstanding liabilities for various objects on account of the year.....	\$75, 000. 00
Estimated amount due for transportation on Pacific railroads, for which no appropriation was made.....	300, 009. 87
	<u>375, 009. 87</u>

Total actual and estimated expenditures for the service of the year.....	<u>53, 134, 847. 70</u>
Deficiency in revenue .....	<u>4, 297, 238. 31</u>

## COST OF POSTAL SERVICE.

Amount of actual and estimated expenditures, as shown above....	\$53, 134, 847. 70
Amount certified to Secretary of the Treasury by the Auditor for transportation of the mails on the Pacific railroads, and by law not charged to the appropriations for the postal service, from July 1, 1886, to September 30, 1887.....	\$1, 187, 027. 33
From October 1, 1887, to September 30, 1888.....	11, 241. 72
	<u>1, 198, 269. 05</u>
Total cost of the service.....	<u>54, 333, 116. 75</u>
Excess of total cost of service over amount of revenue.....	<u>5, 495, 507. 36</u>

The receipts were \$4,297,238.31, or 8 per cent., less than the expenditures and outstanding obligations, and \$5,495,507.36, or 10 per cent., less than the total cost of the postal service, inclusive of the amount certified to the Secretary of the Treasury for transportation of the mail on Pacific railroads.

Compared with the previous fiscal year, there was an increase of \$4,889,186.44, or 11.1 per cent., in the gross revenue; an increase of \$2,032,004.48, or 3.9 per cent., in the expenditures and liabilities; and an increase, also, of \$2,117,601.53, or 4 per cent., in the estimated total cost of the service.

FISCAL YEAR ENDING JUNE 30, 1888.

## REVENUE.

1. Ordinary postal revenue .....	\$51,896,858.96
2. Receipts from money order business .....	798,317.83
Gross revenue .....	52,695,176.79

## EXPENDITURES AND LIABILITIES.

## Expenditures:

Amount expended to September 30, 1888, on account of the year ending June 30, 1888..... \$55,795,357.84

## Liabilities:

Amount of indebtedness for various objects certified to Auditor and not yet reported for payment (partly estimated) ..... \$375,000.00

Estimated amount of indebtedness not yet reported to Auditor (railroad service)..... 404,830.25

Estimated amount due for transportation on Pacific railroads, for which no appropriation was made..... 307,215.75

Estimated amount of indebtedness incurred, for which appropriation will be asked of Congress..... 3,000.00

1,090,046.00

Total actual and estimated expenditures for the service of the year.. 56,885,403.84

Estimated amount of deficiency of revenue to be supplied out of the general Treasury on account of the service of the year..... 4,190,227.05

## COST OF POSTAL SERVICE.

Amount of actual and estimated expenditures, as shown above..... \$56,885,403.84

Amount certified to the Secretary of the Treasury by the Auditor for transportation of the mails on the Pacific railroads, and by law not charged to the appropriation for the postal service..... 1,240,600.83

Total estimated cost of the postal service for the year..... 58,126,004.79

Deduct amount of gross revenue, as shown above..... 52,695,176.79

Leaves excess of estimated cost of service over amount of revenue... 5,430,827.88

The gross receipts of the fiscal year just ended were \$3,100,181.05, or 5.5 per cent., less than the disbursements on account of the year; \$4,190,227.05, or 7.3 per cent., less than the disbursements and outstanding obligations; and \$5,430,827.88, or 9.3 per cent., less than the estimated total cost of the postal service, inclusive of the amount certified to the Secretary of the Treasury for mail transportation on the Pacific railroads.

Compared with the previous year there was an increase of \$3,857,567.40, or 7.9 per cent., in the revenue; an increase of \$3,750,556.14, or 7.5 per cent., in the expenditures and liabilities; and an increase also of \$3,792,887.92, or 6.9 per cent., in the estimated total cost of the service.

The increase in the principal items of revenue over the previous fiscal year was \$3,873,288.88 from the sale of postage-stamps, stamped envelopes, newspaper-wrappers, letter-sheets, and postal-cards; \$78,982.38 in revenue from the money-order business; and \$14,784.07 from box rents. There was a decrease of \$31,874.47 in letter-postage paid in money, and a decrease, also, of \$75,905.03 in miscellaneous receipts.

In addition to the \$55,795,357.84 expended as above for service of the year, the sum of \$469,044.60 was paid on account of previous years,

making the total disbursement during the year \$56,264,402.44. Of the disbursements on account of previous years, \$206.66 was for a claim under a special act of Congress; \$12,020.34 was for 1886; \$88,657.20 was for compensation to postmasters readjusted under the act of March 3, 1883; and \$368.160.40 was for various objects for 1887.

The increase in expenditure for the free-delivery system was \$803,697.37, or 17.4 per cent.; for railroad transportation it was \$1,083,559.57, or 7.3 per cent.; and for compensation of postmasters, it was \$660,287.25, or 5.5 per cent.

Table No. 3, accompanying this report, gives a comparative statement of receipts and expenditures for the past three years.

The amount of expenditure authorized by the post-office appropriation bill was \$55,840,650.15, to which should be added \$109,015.64 for the special-delivery service, which does not require a specific appropriation, being paid from the fees; and \$578,482, provided for by the act of Congress approved October 19, 1888, for transportation of the mail on railroads, and for foreign mails, making the total sum appropriated \$56,528,147.79. In the item for compensation to postmasters, the expenditure was \$12,589,768.66, or \$889,768.66 in excess of the amount appropriated, for which a deficiency appropriation will have to be made by Congress. The expenditure under this head is always beyond the control of the Department, postmasters under the law being authorized to retain their compensation from the general postal receipts.

The unexpended balances of all the items of appropriation amounted to \$1,622,558.61.

In Table No. 2 will be found in detail a statement of the appropriations and expenditures.

#### REVENUE FOR THE FISCAL YEARS ENDING JUNE 30, 1889 AND 1890.

The increase in the ordinary postal revenue (excluding revenue from money-order business) for the fiscal year ending June 30, 1887, was at the rate of 10.3 per cent. over the revenue of the previous year, and the increase for the year ending June 30, 1888, was at the rate of 7.9 per cent. The receipts for the quarter ending June 30—the last quarter of the past year—were somewhat smaller than had been estimated by the Department, but this unexpected falling off in business it is thought will not continue during the present year, for special returns already received by the Department from thirty of the larger cities for the quarter ending September 30 show an increase of over 9 per cent. In estimating, therefore, for the current and coming years, it is not unreasonable to assume that an increase of 9 per cent. for each year will be maintained. Upon this basis the gross revenue for the years ending June 30, 1889 and 1890, is estimated at \$57,392,576.26 and \$62,508,658.12, respectively, as appears from the following statements:

##### FISCAL YEAR ENDING JUNE 30, 1889.

Amount of ordinary postal revenue for the fiscal year ending June 30, 1888 .....	\$51,896,853.96
Add 9 per cent. for increase .....	4,670,717.30
<hr/>	
Gives estimated amount of ordinary postal revenue for the fiscal year ending June 30, 1889 .....	56,567,576.26
Amount of estimated revenue from money-order business .....	825,000.00
<hr/>	

Total estimated gross receipts for the year ending June 30, 1889. 57,392,576.26

The amount appropriated for service of this year is \$60,860,233.74, or an excess over the amount of revenue estimated above of \$3,467,657.48, which will be drawn from the general Treasury should the total amount appropriated be needed.

## FISCAL YEAR ENDING JUNE 30, 1890.

Estimated amount of ordinary postal revenue for the fiscal year ending June 30, 1889 .....	\$56,567,576.26
Add 9 per cent. for increase .....	5,091,081.86
Gives estimated amount of ordinary revenue for the fiscal year ending June 30, 1890 .....	61,658,658.12
Amount of estimated revenue from money-order business.....	850,000.00
Total estimated gross receipts for the year ending June 30, 1890.	62,508,658.12

The probable amount of expenditure to be made in carrying on the business of the postal service for the year ending June 30, 1890, as shown by your estimates submitted to the Secretary of the Treasury, is \$66,812,073.02. The deficiency to be supplied from the general Treasury is therefore \$4,303,414.90.

## NEARNESS TO A SELF-SUSTAINING CONDITION.

From the foregoing statements it is seen that the revenue of the Department for the last fiscal year was not enough to meet its expenses by quite a large sum, and that the revenue of the current and the coming year will also be insufficient—a fact which is somewhat surprising, and in some respects to be regretted. But taking everything into consideration—notably, the immensity of the business of the Post-Office Department, now the greatest in the world, the radical reductions for several years past in the rates of postage, the large but necessary extension of the railway mail service, which is reaching nearly every nook and corner of the land, the unusual increase of free-delivery offices, at present numbering nearly 400, and the very liberal rates of compensation to postmasters, constituting, with the exception of railroad transportation, the greatest item of postal expenditure—I do not think that this condition of affairs is discouraging. On the contrary, there can be seen through it the certainty that before long, unless additional changes should be made in the rates of postage, the service will be in a self-supporting condition.

It should not be forgotten, either, that the Department is now annually transporting and handling, with precisely the same trouble and at the same expense as are involved in its other business, but without the slightest compensation therefor, millions of pounds of matter for Congress and the various other branches of the Government, for agricultural colleges and experiment stations, and for newspaper publishers throughout the country within their respective counties of publication. If the value of all this service could be added to the postal revenue, the balance-sheet of the Department would show but a small deficit for the past and the current fiscal year, or for the year to come; and that credit for this service *should* be given to the Department, I think no one will deny.

I am disposed to think, however, that so long as strict economy of administration continues to be the policy of the Post-Office Department—so long as its wants are supplied by Congress with the same liberal spirit that has been manifested for some years past—so long as the postal service faithfully fulfills, as it has, its high obligations to the people, it is of but little moment whether its revenue is adequate or not to fully satisfy its requirements. The following passage from the works of the celebrated Dr. Channing is so fairly expressive of the high mission of the Post-Office Department, its great value to the Union, and

the general policy that should govern its administration, that I can not forbear applying it to the present condition of things :

It does much towards making us one by admitting free communication between distant parts of the country which no other channel of intercourse could bring together. It binds the whole country in a chain of sympathies, and makes it in truth one great neighborhood. It promotes a kind of society between the sea-shore and the mountains. It perpetuates friendships between those who are never to meet again. It binds the family in the new settlement and the half-cleared forest to the cultivated spot from which it emigrated. It facilitates beyond calculation commercial connections and the interchange of products. On this account we always grieve to see a statement of the revenue accruing to government from the post-office. It ought not to yield a cent to the Treasury ; it should simply support itself. Such importance do we attach to the freest communication between all parts of the country, so much do we desire that the poor as well as rich may enjoy the means of intercourse, that we would sooner have the post-office a tax on the revenue than one of its sources.

#### AMOUNTS DRAWN FROM THE GENERAL TREASURY.

In addition to the receipts referred to in table No. 3, there were drawn from the general Treasury within the year the following amounts, on account of special and deficiency appropriations, viz :

For deficiency in the postal revenues for the year ending June 30, 1888, under the act approved March 3, 1887, Stats., vol. 24, chap. 388, page 570 .....	\$2, 564, 221. 27
For deficiency in the postal revenues for 1885 and prior years, under the act approved February 1, 1888, Public No. 4, page 31 (compensation of postmasters re-adjusted under act approved March 3, 1883) ..	160, 286. 05
For deficiency in the postal revenues for 1885 and prior years, under act approved February 1, 1888, Public No. 4, page 31 (claims) .....	49, 854. 79
For deficiency in the postal revenues for 1885 and prior years, under act approved March 30, 1888, Public No. 27, page 17 (compensation of postmasters re-adjusted under act approved March 3, 1883) .....	380, 321. 44
For deficiency in the postal revenues for 1885 and prior years, under the act approved March 30, 1888, Public No. 27, pages 18, 25, and 26 (claims) .....	6, 136. 92
<b>Total drawn during the year .....</b>	<b>3, 160, 820. 47</b>

#### TRANSACTIONS AT TREASURY DEPOSITORIES.

The accounts during the year show the following receipts and disbursements at Treasury depositories, viz :

Balance subject to draft June 30, 1887 .....	\$6, 516, 674. 40
Amount of outstanding warrants June 30, 1887 .....	82, 237. 64
<b>Deposits:</b>	
On account of postal revenues .....	\$22, 877, 485. 05
On account of grants from the general Treasury .	3, 160, 820. 47
	<hr/> 26, 038, 305. 52
	32, 637, 217. 56
<b>Amount of warrants paid during the year ending June 30, 1888 .....</b>	<b>26, 542, 398. 14</b>
<b>Balance at depositories June 30, 1888 .....</b>	<b>6, 094, 819. 42</b>
<b>Outstanding warrants June 30, 1888 .....</b>	<b>111, 102. 56</b>
<b>Balance subject to draft June 30, 1888 .....</b>	<b>5, 983, 716. 86</b>

Of the \$22,877,485.05 of postal revenue, \$22,156.54 was deposited through national-bank depositories. The balance on hand June 30, 1888, in national-bank depositories, was \$5,935.11.

## SUSPENSE AND COMPROMISE ACCOUNTS AND BAD DEBTS.

As appears by the following statement, taken from the report of the Auditor, the postal revenue has gained \$672.38 during the last fiscal year from the balancing of what are known as the suspense and the compromise and bad-debt accounts:

Amount credited to the postal revenue on suspense account .....	\$4,049.85
Amount due the Government from late postmasters and charged against the revenue on compromise and bad-debt account.....	3,377.47
Gain by suspense.....	672.38

The following extract from the report of this office for the fiscal year ending June 30, 1885, clearly explains the principle upon which the Government either gains or loses by the above-named accounts:

The Post-Office Department is accountable for the postal revenues as soon as they are realized at the post-offices, and they are entered into the accounts as reported quarterly by postmasters, the system differing in this respect from that of the general Treasury, which acknowledges only revenue that has actually been deposited. Out of this feature of the postal system grow bad debts, compromise and suspense accounts. To bad debts are charged balances due by late postmasters and uncollectible, resulting of course in a reduction of the amount of revenue reported. A like result follows in the case of suspended accounts, in which the balances due the Government are found too small (usually less than \$1) to justify unusual efforts for collection after failure by the ordinary means. On the other hand, the Government derives the benefit from small balances (also usually less than \$1) found due late postmasters and not paid to them. Compromise accounts, of course, always result in a loss to the Government. The effects in all these cases are felt upon the revenues for the year in which the accounts are closed.

## NEW FORM OF QUARTERLY POSTAL ACCOUNT.

As a matter indirectly connected with the affairs of this office, I take pleasure in reporting that the use by postmasters of the new form of quarterly postal account and the record of postal business, adopted shortly after the commencement of the last fiscal year, has been satisfactory, both as regards the transaction of business at post-offices and the examination and audit of accounts in the office of the Auditor. I understand that fewer delinquencies as to the prompt and correct rendition of accounts by postmasters have occurred during the year than was formerly the case, and that the Auditor has been able to settle accounts with greater exactness and with fewer outstanding cases at the end of each quarter than ever before. As time goes on, the new system will probably work still more satisfactorily.

## APPROPRIATIONS, EXPENDITURES, AND ESTIMATES FOR THE SERVICE OF THIS OFFICE.

The appropriations for the service of this office during the fiscal year amounted to \$1,242,900, of which \$75,872.09 remains unexpended. The only obligation unpaid is a small sum due for letter-sheet envelopes for the six months ending June 30, 1888, the bill for which has not been rendered.

The expenditure for this office for the service of the fiscal year was \$1,167,027.91, or \$90,527.82 more than for the preceding year. The principal items of increase were \$62,147.15 for manufacture of stamped envelopes, \$17,680.23 for manufacture of postal-cards, and \$8,826.55 for manufacture of adhesive postage-stamps.

The amount expended under each item will be found in Table No. 3, accompanying this report.

The amount required for service of this office for the fiscal year ending June 30, 1890, is estimated at \$1,385,051, an increase of \$131,095, or 10.4 per cent., over the amount appropriated for the current year. Full explanation of these estimates will be found in Table No. 1, hereto appended.

## WORK OF THE FINANCE DIVISION.

The work of the finance division of this office for the fiscal year may be briefly stated as follows:

There were 4,454 contracts for mail service received during the year from the office of the Second Assistant Postmaster-General, and 21,529 orders of the Postmaster-General, recognizing mail service not under contract, curtailing or extending service, or modifying previous orders, all of which contracts and orders were entered upon the books of the division for reference when acting upon certificates of the Auditor of the Treasury for the Post-Office Department for payment of mail contractors and other creditors of the Department.

The number of certificates received from the Auditor and acted upon was 92,570, an increase of 10,067 over the number received for the previous fiscal year.

In addition to the above there were 7,387 certificates received from the Auditor, upon which 7,387 transfer drafts, covering the sum of \$817,051.44, were drawn against postmasters having a surplus of postal revenue in favor of late postmasters, or postmasters whose revenues were insufficient to meet the demands upon their offices for payment of railway postal-clerks, rent, and other authorized expenses.

Accounts were kept with the Treasury, nine subtreasuries, and forty-one designated depositories, involving, with the amount on hand subject to draft at the beginning of the year, the sum of \$32,554,979.92, against which 92,570 warrants were issued, aggregating \$26,571,263.06.

The number of post-office warrants and transfer drafts drawn, and the number of certificates of deposit received, entered, and passed to the Auditor, during the year, compared with the number for the previous year, are shown by the following table:

	Fiscal year ending June 30, 1887.	Fiscal year ending June 30, 1888.	In crease.
Number of warrants.....	82,503	92,570	10,067
Number of transfer drafts.....	8,371	7,387	*984
Number of certificates of deposit.....	211,400	236,729	25,329
Total.....	302,274	336,686	34,412

\* Decrease.

The number of accounts of contractors on the books of the division on June 30, 1888, was as follows, viz:

Railroads.....	1,995
Mail contractors, star service.....	14,146
Sub-contractors, star service.....	9,444
Mail contractors, steamboat service.....	127
Sub-contractors, steamboat service.....	10
Mail messengers.....	5,906
Carriers at offices supplied by a special carrier.....	2,695

Total number of accounts, requiring the same number of quarterly payments..... 34,323

This is an increase over the preceding year of 10,004.

There were also prepared and forwarded 3,774 letters relating to the business of the division, 92,570 circulars relating to the issue of warrants, 54,470 circulars instructing postmasters as to their duties in depositing postal balances, and demanding balances on postal account, etc.

#### CASES FOR INVESTIGATION BY THE CHIEF POST-OFFICE INSPECTOR.

The number of cases made up in the finance division during the fiscal year and referred to the chief post-office inspector for investigation into the accounts of postmasters or late postmasters, for withholding postal funds from deposit, for improper use of postage-stamps, for rendering false vouchers for clerk-hire or rent, and for fraudulent returns of stamps canceled, was 607, or 414 less than were given out in the previous year. The number of such cases prepared after reports of investigation had been received, for the final action of the Department, was 96, in all of which cases the Auditor was requested, through formal orders of the Postmaster-General, to charge the postal accounts of the offending officials, under the provisions of the act of Congress approved June 17, 1878, to the amount of \$40,991.23, or \$86,066.54 less than for the previous year.

The inspection of the accounts of postmasters, under the general system inaugurated some time since, has been of great benefit to the postal service, as is now being seen in the promptitude with which accounts are rendered and deposits of postal balances made.

The number of general inspection reports received from the chief post-office inspector during the year was 24,845, the summary of postal account in every one of these cases being carefully examined and verified.

#### ACCOUNTABILITY FOR KEY DEPOSITS.

Several of the cases referred to in the foregoing paragraph comprehend an offense which, though not occurring very often, is yet frequent enough to justify a remedy through the enactment of a special law—the only thorough remedy, indeed, that can be applied. I allude to the appropriation by postmasters, for private use, of what is known as the “key-deposit fund.” Under the postal regulations every renter of a post-office lock-box in any building owned or leased by the Government is required to make a deposit of 50 cents with the postmaster upon being furnished with a box key, in order to insure its return when the rental ceases, or to indemnify the Government in case the key is lost. Moneys thus received, called the “key-deposit fund,” are simply held by the postmaster in trust, to be returned to the depositors, respectively, upon the surrender of their keys, or, in the event of the postmaster’s retirement from office, to his successor.

As long as a postmaster remains in office there is little or no trouble experienced by depositors in securing the return of their money whenever demanded; for the great majority of postmasters are by character honest and faithful, and most of those who are otherwise inclined are restrained from default in so small a matter as this by the fear of consequent removal from office. But when a postmaster has defaulted in some other branch of his official business, or goes out of office in debt to the Government, it is too often the case that the key-deposit fund is appropriated to his own use, in which event the depositor has no means of recovery except to bring an action at law against the appropriator; for the money thus appropriated is not a part of the postal revenue, is

never paid into the Treasury, and there is no authority of law for any expenditure out of legitimate postal receipts to reimburse the loser. Of course, whenever any such default occurs, the depositor is subjected in nine cases out of ten to absolute loss; for the amount involved is so trifling, individually considered, that a lawsuit for recovery would be altogether injudicious and probably unavailing.

Although the propriety of making deposits so made to postmasters a part of the postal revenue is somewhat doubtful, owing to questions of ownership in cases where the boxes and keys of post-offices are furnished by the Treasury Department, or in cases where the same thing is done by proprietors of post-office buildings leased by the Government, I am satisfied that some means should be adopted whereby indemnity can be made to all key depositors in case of failure to return the deposits on demand. The best way, perhaps, to accomplish this is in every case to make the sureties of a postmaster liable for moneys received by him in trust under the postal regulations from time to time promulgated, and to authorize the restoration of such moneys as a proper postal expenditure. If this can not be done except under special law, I respectfully recommend that the matter be brought to the attention of Congress.

#### DEAD-LETTER FUND.

The money taken from dead letters for which no owners could be found, and that realized from the auction sale of unclaimed articles accumulated in the Dead Letter Office, which was turned over to the finance division during the fiscal year, was \$10,534.79.

This money was disposed of as follows, viz :

Amount received .....	\$10,534.79
Amount of current funds deposited in the Treasury at Washington, D. C. ....	\$10 253.81
Amount realized from sale of foreign and uncurrent funds by the postmaster at New York and deposited with the Assistant Treasurer at New York.....	256.77
Total amount deposited.....	10,510.58
Amount of loss sustained from sale of uncurrent funds, from counterfeits, and from mutilated minor coins.....	24.21
	<hr/> 10,534.79

The report of the Auditor states the receipts from dead letters for the year to have been \$9,117.72, or \$1,392.86 less than shown above. This is explained by the fact that in his previous annual report the Auditor included this \$1,392.86 as part of the revenue of the year ending June 30, 1887, it being in reality, however, the receipts for July and August of the fiscal year following.

#### WORK OF SIGNING WARRANTS AND DRAFTS.

The work of signing warrants drawn in payment of money due mail contractors and other creditors of the Department has grown to such proportions as to be now a very great burden upon the Third Assistant Postmaster-General, who has, under the provisions of the act of Congress approved February 25, 1882, been specially delegated by the Postmaster-General to perform this duty.

Prior to 1882 most of the payments on account of the postal service were made through postmasters in cash, the payments being subject, of course, to examination and audit in their accounts. There were consequently but a limited number of warrants drawn. Since 1882, how-

ever, the principle of paying postal indebtedness directly out of the Treasury or sub-treasuries, by warrants drawn thereon, has been considered a safer method of disbursement, and it has been therefore very greatly extended. The following table will show the number of warrants drawn on postal account and the amounts covered thereby since 1873:

Fiscal years.	No. of warrants.	Amount.	Fiscal years.	No. of warrants.	Amount.
1873 .....	8,005	\$9,709,737.85	1881 .....	14,713	\$13,748,207.25
1874 .....	10,649	11,559,441.06	1882 .....	38,851	19,072,353.51
1875 .....	12,278	11,918,751.15	1883 .....	48,278	20,242,516.32
1876 .....	13,456	11,113,493.59	1884 .....	70,408	22,012,467.96
1877 .....	12,593	11,100,126.57	1885 .....	74,659	24,641,848.22
1878 .....	11,466	9,923,171.72	1886 .....	72,999	24,308,814.69
1879 .....	12,718	9,908,271.89	1887 .....	82,503	25,525,706.96
1880 .....	13,940	9,926,268.29	1888 .....	92,570	26,571,263.06

Including transfer and collection drafts, the number of these papers signed during the past fiscal year amounts to about one hundred thousand. As this duty is performed almost wholly by the Third Assistant Postmaster-General, who can not, under the interpretation heretofore put upon the law, delegate it or any part of it to another, it will be seen that whenever payments are certified by the Auditor in very large numbers, which happens for about two months in every quarter, the time of the Third Assistant Postmaster-General must be almost exclusively taken up in going through this work. The effect is, of course, to prevent him from giving that close and intelligent attention to other branches of his duty which their great importance demands, and which, if not attended to, may at any time subject him to censure.

As an illustration of the demands upon my time made by this exacting work, I may mention that ever since my appointment to the office of Third Assistant Postmaster-General I have been desirous of giving to the affairs of the postage-stamp agency, and the other agencies for the distribution of stamped paper, an exhaustive personal examination; but up to this time, principally for the reason mentioned, I have not been able to carry this wish into effect. I feel that some relief from so continuous and confining a duty ought to be provided; and as the work involved in it is merely mechanical, or in other words does not admit of any examination into the correctness of the warrants to be signed, I can not see any serious objection to the delegation by the Third Assistant Postmaster-General of at least a part of the duty to some official subordinate, or at any rate to the authorization of the acting head of the office to sign these warrants whenever the Third Assistant Postmaster-General may be absent. Indeed, such a delegation of authority might be absolutely necessary in case of illness of the Third Assistant Postmaster-General, or in case of any protracted vacancy in the office.

In view of the above, I urgently recommend that Congress be requested to amend the law above referred to, so as to admit of the signing of warrants, when necessary, by any officer of the Department who may be acting as Third Assistant Postmaster-General, or who, in great pressure of business, may be specially assigned to this duty.

#### THE SPECIAL-DELIVERY SYSTEM.

The special-delivery system has met with a reasonable amount of patronage during the past fiscal year, and has, I am persuaded, been conducted by postmasters generally with increased efficiency. I present the following statement of the year's business:

For the whole country the Auditor reports that the amount of fees allowed in postmasters' accounts during the year for special delivery is \$109,015.64. Allowing for cases where no fees were paid—as, for example, in cases of delivery by letter-carriers or other salaried employés of post-offices—these figures would indicate a total of about 1,434,400 special-delivery letters received during the year at all offices, the special-delivery stamps on which would amount to \$143,440. Deducting from this the amount allowed postmasters, and there is left a total profit to the Government on the year's business of over \$34,424.

At the letter-carrier offices, from which exact returns have been received, the business of the year will appear from the following statement (see table No. 16):

1. The total number of pieces of all matter received for special delivery at all the letter-carrier offices was 1,220,276, of which 899,491, or nearly 74 per cent., came through the mails from other than the offices of delivery, and 320,782, or 26 per cent., were of local origin.

2. The total number of pieces delivered by the regular messengers was 1,164,668, or over 95 per cent. of the whole, leaving 55,608, or less than 5 per cent., as the number delivered by letter-carriers or other salaried employés, including the few where delivery was impossible.

3. The value of the special-delivery stamps on the pieces received was \$122,027.60. The amount of special-delivery stamps sold at the letter-carrier offices, ascertained from returns made by postmasters to this office, aggregates \$92,149.20.

4. The average number of messengers employed during each month of the year was 768.

5. The average time consumed in the delivery of matter after reaching the respective offices of destination was 21 minutes.

Statistics in detail of the business at each of the letter-carrier offices in existence on the 1st of July, 1888, are given in Table No. 16 of this report.

I renew the recommendation made in my last annual report concerning the establishment of the pneumatic-tube system, or some equivalent underground means of rapid transit, for special-delivery messages at a few of the prominent cities of the country. I have received information in various ways during the year which convinces me that at least some investigation of the matter is desirable.

#### DIVISION OF POSTAGE-STAMPS, STAMPED ENVELOPES, AND POSTAL-CARDS.

During the year there were issued to postmasters, through the work of this division, of the various kinds and denominations of stamped paper 2,700,635,170 pieces, valued at \$50,636,321.84, as against a total of 2,503,170,139 pieces, valued at \$46,619,680 65, for the preceding year, an increase of 7.89 per cent. in number and 8.62 per cent. in value.

The several issues, by aggregates, are as follows:

	Number.	Value.
Ordinary adhesive postage-stamps.....	1,867,173,140	\$36,293,183.00
Special-delivery stamps.....	1,331,790	133,179.00
Newspaper and periodical stamps.....	3,464,418	1,588,425.00
Postage-due stamps.....	10,805,572	283,954.00
Stamped envelopes, plain.....	186,741,000	3,634,508.44
Stamped envelopes, printed request.....	196,625,250	4,242,611.90
Newspaper wrappers.....	50,269,500	584,804.50
Letter-sheet envelopes.....	2,427,000	55,821.00
Postal-cards.....	381,797,500	3,819,835.00
Total.....	2,700,635,170	50,636,321.84

Tables showing the separate issues of stamped paper will be found at the end of this report, marked Nos. 5, 6, and 7.

*Adhesive stamps.*—Of ordinary postage-stamps issued during the year there was an increase over the issues of the previous year of 120,187,620, or 6.88 per cent., in number, and of \$2,519,027, or 7.46 per cent., in value; of special-delivery stamps, an increase of 85,850, or 6.89 per cent., in number, and \$8,585, in value; of newspaper and periodical stamps, an increase of 432,823, or 14.28 per cent., in number, and \$224,011.20, or 16.42 per cent., in value; of postage-due stamps, an increase of 2,559,038, or 31 per cent., in number, and \$48,818, or 20.76 per cent., in value.

*Stamped envelopes and newspaper wrappers.*—Of ordinary stamped envelopes issued during the year there was an increase over the issues of the previous year of 22,439,550, or 13.66 per cent., in number, and \$437,687.04, or 13.69 per cent., in value; of special-request envelopes, an increase of 25,521,250, or 14.92 per cent., in number, and \$543,451.80, or 14.69 per cent., in value; of newspaper wrappers, an increase of 4,063,650, or 8.79 per cent., in number, and \$47,940, or 8.93 per cent., in value.

*Letter-sheet envelopes.*—Of letter-sheet envelopes, of which only one denomination is issued, there has been a decrease as compared with the issue of the previous year of 2,683,000, or 5.25 per cent., in number, and \$61,709 in value. This result, considered in connection with the issues of letter-sheet envelopes for the previous year, seems to indicate that there is no great popular demand for them. Out of a total of 7,536,500 letter-sheets issued to postmasters from the date of their introduction to June 30 last, 5,249,233 have been reported to be sold, leaving 2,287,267 as unsold stock still on hand.

*Postal-cards.*—Of postal-cards issued to postmasters during the year there was an increase over the issues of the previous year of 24,858,250, or 6.96 per cent., in number, and \$248,830, or 6.97 per cent., in value. The number of postal-cards issued, as shown in the tables appended to this report (Nos. 5, 6, 7, and 10), do not include supplies sent to stock the distributing subagencies at Chicago and Saint Louis.

*Past issues of postage-stamps, etc.*—Tables showing the issues of stamped paper of the several kinds since the dates of their introduction—being a continuation of similar tables included in my last report—will be found hereto appended, marked Nos. 8, 9, and 10.

*Registered-package, tag, official and dead-letter envelopes, etc.*—In addition to the supplies above enumerated, there were issued for the use of the postal service 11,627,400 registered-package envelopes, 1,341,000 registered tag envelopes, 2,228,500 envelopes for returning dead letters, 31,671,250 official envelopes for postmasters and other postal officials, and 4,378 newspaper and periodical stub-books.

These figures show an increase of 625,450, or 5 per cent., in registered-package and tag envelopes; of 847,800, or 2.5 per cent., in dead-letter and official envelopes; and of 1,473,250, or 3 per cent., in all kinds, over the issues of the preceding year.

#### REQUISITIONS.

The following statement shows the number of requisitions from postmasters upon which the several kinds of supplies were furnished:

For ordinary postage-stamps .....	169, 185
For postage-due stamps .....	14, 906
For newspaper and periodical stamps .....	10, 609
For stamped envelopes, plain .....	90, 037
For stamped envelopes, request .....	133, 452
For postal-cards .....	76, 670

For registered-package envelopes.....	61,575
For tag envelopes.....	11,778
For official envelopes.....	35,874
For newspaper and periodical receipt books.....	2,681
For letter-sheet envelopes.....	1,573
Total .....	608,340

## PARCELS.

The number of separate parcels in which these supplies were put up and forwarded to postmasters was as follows, viz :

Ordinary postage-stamps.....	174,017
Newspaper and periodical stamps.....	10,609
Postage-due stamps.....	15,018
Stamped envelopes, plain .....	128,486
Stamped envelopes, printed request .....	98,728
Postal-cards .....	85,006
Registered-package envelopes.....	61,805
Tag envelopes for registered parcels .....	90,920
Official envelopes .....	36,120
Newspaper and periodical receipt books .....	4,386
Letter sheets .....	1,583
Total.....	706,678

## REDEMPTION OF SPOILED STAMPS AND STAMPED ENVELOPES.

The value of spoiled, unserviceable, and unsalable stamps and stamped envelopes received from postmasters and redeemed during the past fiscal year is \$135,264.38, for which credits in favor of the remitting postmasters were duly reported to the Auditor. The number of cases comprehended in these and similar credits since 1885 is shown in the following statement :

Year ending June 30—	
1885 .....	7,411
1886 .....	13,952
1887 .....	20,602
1888 .....	11,367

Making due allowance for an abnormal increase during the years 1886 and 1887, due to the redemption of 3 and 6 cent stamps and stamped envelopes which by reason of the reduction in the letter rate of postage had become practically useless, this business has increased from 1885 to 1888 at the rate of about 15 per cent. a year. This is very much more than it should be. The ratio of increase in spoiled or unserviceable stamped paper redeemed from year to year, if nothing unusual occurs—such as a change in the rates of postage, for example—ought to diminish rather than increase. At any rate, it should not increase at a greater ratio than the general business of the whole postal service increases, which, on an average, is much less than 15 per cent. It is hoped that in future this work will show a falling off, rather than an increase.

## POSTAGE ON SECOND-CLASS MATTER.

The weight of second-class matter sent in the mails during the fiscal year ended June 30, 1888, not including matter circulated free within the county of publication, was 143,662,918 pounds, or over 71,831 tons, and the amount of postage collected was \$1,436,629.18. This is an increase of 13.8 per cent., as compared with the business of 1887.

The number of post-offices at which second-class matter was mailed is 7,463, an increase over the previous year of 463, or 6.6 per cent. The number of new publications admitted to the mails during the year is 3,076.

Collections were made during the year to the amount of \$4,954.09, from publishers and news agents, for matter mailed at the second-class rate of postage which should have been charged at a higher rate. This is an increase of \$1,831.72 over the amount collected for like irregularities during the preceding year.

Attention is invited to Table No. 11, appended to this report, showing the collections of second-class postage at all first-class post-offices during the year, in comparison with the collections of the previous year.

#### INCREASED USE OF STAMPED ENVELOPES.

It is quite gratifying to notice that the use of stamped envelopes, particularly special-request envelopes, is, so far as the issues to postmasters are an indication, increasing. The percentage of increase during the year of the former is 13.6 over the issue of the previous year; of special-request envelopes the percentage of increase is 14.9. These rates of increase are far beyond the average rates.

Upon the supposition that the prominence given to the subject of stamped envelopes in my last annual report has had something to do with this unusual increase in their issues, and in the hope of a still further increase, I think it not improper to extract from that report the following statement of some of the advantages attending the use of stamped envelopes over that of adhesive postage-stamps:

There are many advantages resulting from the use of stamped envelopes, both to the consumer and to the Department, which should always give them preference, wherever they can be conveniently used, over the adhesive stamps. In the hope that it will encourage the use of stamped envelopes, particularly the special-request envelopes, I avail myself of this opportunity to present a statement of some of the advantages referred to:

1. In case of the non-delivery of letters inclosed in special-request envelopes, they are returned direct to the senders. The long delay and uncertainty incident to the return of ordinary undelivered letters—to say nothing of the necessary invasion of their privacy in the Dead Letter Office—are thus avoided.

2. Where stamped envelopes are used to inclose letters there is never any detention of them for lack of postage, the reverse of which is the case where, when other envelopes are used, an insufficient amount of postage in adhesive stamps is applied. Detention of letters for this reason is not infrequent.

3. Stamped envelopes are very cheap. One of the kinds most commonly used—the No. 4½ first quality—is sold at the rate of only \$1.80 a thousand, in addition to the postage, while the third quality of the same size is sold at \$1 a thousand, or ten for a cent.

4. The quality of all the stamped envelopes is excellent. The first quality is of finely finished paper, the second quality is the same except that the paper is a trifle lighter, and the third quality—a manilla paper, of smooth finish and good writing surface—is of great strength and durability. They may therefore, be sent long distances in the mails without injury.

5. In case stamped envelopes are spoiled by their owners in printing or misdirecting them, they are redeemable at the post-office, at their postage value, in postage-stamps or other envelopes. In similar cases where adhesive stamps are used, the stamps, to be of value, must be detached from the envelopes and regummed.

The advantages to the Government from the use of stamped envelopes are quite as important, comprehending the facility for handling and distributing in the mails the letters inclosed in them, owing to their similarity in size and shape, the fixation of the stamp in the most convenient place for canceling, the impossibility of their being cleansed of their canceling marks and used a second time, and, where special-request envelopes are used to inclose letters, the saving of labor in post-offices and the Dead-Letter Office in cases where the letters are found to be undeliverable.

The following table, giving the number of stamped newspaper wrappers, of plain stamped envelopes, and of special-request envelopes issued annually from 1877 to the close of the fiscal year 1888, shows the gradually increasing popularity of the request over the plain form of stamped envelope:

Year ended June 30.	Newspaper wrappers issued.	Plain envelopes issued.	Special-request envelopes issued.	Total.	Per cent. of request envelopes.
1877 .....	21,991,250	84,285,700	64,374,500	170,651,450	37.72
1878 .....	27,200,500	88,514,600	67,845,250	183,560,350	36.96
1879 .....	29,697,000	80,806,700	67,058,250	177,561,950	37.77

## REDUCTION IN COST OF STAMPED ENVELOPES.

The present contract for supplying the Department with stamped envelopes and newspaper wrappers was made in 1886, the contract term beginning on the 1st of October of that year. The amount saved under this contract as compared with the prices of the previous contract, for the nine months ending June 30, 1887, was shown by my last annual report to be \$119,488.77; the amount similarly saved during the fiscal year ending June 30, 1888, is \$163,475.60, making a total saving since the beginning of the contract of \$282,964.37. The items of saving during the past year are shown by the following table:

Quality.	Number of envelopes.	Cost under contract of—		Saving.	
		1882.	1886.	Amount.	Per cent.
First .....	328,048,600	\$733,585.90	\$594,823.09	\$138,762.81	18.9
Second .....	12,554,100	25,738.94	18,683.06	7,055.88	27.4
Third .....	4,729,500	8,217.08	4,918.89	3,298.19	40.1
Circulars .....	33,487,500	45,927.41	37,098.33	8,829.08	19.2
Newspaper wrappers .....	50,269,500	49,766.80	44,237.16	5,529.64	11.1
Total .....	*429,089,200	863,236.13	699,760.53	163,475.60	18.9

\* Four million five hundred and nine thousand and fifty envelopes, costing \$8,240, were issued during the year, for which no corresponding style was issued under the contract of 1882.

## STAMP, ENVELOPE, AND POSTAL-CARD AGENCIES.

The work at the several agencies for the distribution of postage-stamps, stamped envelopes, and postal-cards has been conducted satisfactorily throughout the year. Only three packages during the entire year were lost in transmission—two from the postage-stamp agency and one from the stamped-envelope agency—and these were of inconsiderable value.

The standing force of the several agencies during the year was as follows:

Postage-stamp agency:

One agent at a salary of.....	\$2, 500
One clerk at a salary of.....	1, 500
Four clerks, each at a salary of \$720 .....	2, 880
One laborer at a salary of.....	680

Making a total for salaries of..... 7, 560

Stamped-envelope agency:\*

One agent at a salary of.....	2, 500
One clerk at a salary of.....	1, 800

The force of the postal-card agency was reduced on the 1st of July last one clerk of the \$1,000 grade, so that the amount applicable to compensation of employes during the current fiscal year is \$8,800. This decrease of force was made on account of the reduction of work at the agency caused by the establishment of a subagency for the distribution of cards at Saint Louis, Mo., allusion to which is hereinafter made.

It will be noticed in the above statements that most of the employes at the postage-stamp agency are given a smaller compensation than those at either of the other agencies—a discrimination that is unfair, and that I can attribute to no other cause than oversight in the preparation and submission of the annual estimates of appropriations. It is certainly not due to any lack of efficiency among the employes at the postage-stamp agency, or to any less requirement from them in the matter of careful, or continuous, or responsible work. They are justly entitled, in my opinion, to higher compensation than they now receive. I take pleasure, therefore, in recommending that at the end of the present fiscal year a small addition to the pay of five of these employes be made, sufficient to increase the annual compensation of each to \$900 per annum. This will necessitate an enlargement of the appropriation for the expenses of the agency to the amount of about \$1,000, provision for which I have ventured to make in the table of estimates hereto annexed.

SUBAGENCY FOR DISTRIBUTION OF POSTAL CARDS AT CHICAGO.

The subagency at Chicago, Ill., for the distribution of postal-cards, a detailed account of the establishment and advantages of which was given in my last annual report, has been operated during the year with

\* The statement here given covers the present standing force of the agency, but it is not quite exact as to the entire force employed during the year. The total expenditure for employes, including the agent, and temporary clerks whose occasional employment is absolutely necessary, was \$15,806.58.

entire satisfaction. It has not materially interfered with the usual business of the post-office, it has not caused any additional expense to the government, and, as has been heretofore demonstrated, it will eventually save a great deal of money. The number of cards sent to this subagency since its establishment and the issues to postmasters up to June 30, 1888, are shown in the following statement:

Number of cards shipped to subagency up to June 30, 1888 .....	150,000,000
Number of cards issued by subagency to June 30, 1888 .....	117,800,500
Number on hand July 1, 1888.....	32,199,500

#### SUBAGENCY AT SAINT LOUIS, MO.

In addition to the subagency at Chicago, Ill., referred to above, there was established a short time prior to the close of the fiscal year ending June 30, 1888, an agency for a like purpose at Saint Louis, Mo. This agency is under the immediate direction of the postmaster, is situated in the post-office building, is governed by precisely the same rules as those which prevail at Chicago, and is, to a proportionate extent, attended with the same advantages to the postal service. Up to this time over 19,000,000 cards have been sent to this subagency, most of which have been distributed to postmasters. The field of distribution for the agency is comprehended within the States of Arkansas, Colorado, Kansas, Kentucky, Missouri, and Texas, and the Territories of Arizona, Indian, and New Mexico. The first issue of cards from the agency was made on an order sent from the Department on the 15th of June, 1888.

#### PROPOSED SUBAGENCY AT ATLANTA, GA.

The proposed establishment of a subagency at Atlanta, Ga., for the distribution of postal cards and stamped envelopes, allusion to which was made in my last annual report, has been found to be not yet expedient—first, because of the lack of room in the present post-office building necessary for the purposes of the agency; and, secondly, because, without considerable expense, proper safeguards could not be given in this building to the storage of such a large amount of stamped paper as would be required to make the agency of any advantage to the service. When the post-office building at Atlanta is enlarged (an act authorizing which was, I understand, passed at the late session of Congress), there will be no impediment in the way of establishing the contemplated agency. The field of its distribution will probably comprise the States of Virginia, North and South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Tennessee.

#### ENVELOPE MACHINE AT CINCINNATI EXPOSITION.

Just prior to the close of the fiscal year arrangements were made by your direction with the stamped-envelope contractors, by which one of their most improved envelope-machines was erected at the Centennial Exposition of the Ohio Valley and Central States, which began on the 4th of July, 1888, at Cincinnati, Ohio, and by which it has since been operated as a part of the display made by the Post-Office Department under authority of the act of Congress approved May 28, 1888. Up to the present time, in the operation of this machine, 1,408,500 first-quality stamped envelopes of the No. 4½ size have been made, 850,000 of which have been sent to postmasters, and the remainder of which will be dis-

posed of in the same way. These envelopes have all been made under the same safeguards as surround the manufacture of stamped envelopes at the regular manufactory at Hartford, Conn., and of course have been or will be paid for as they are issued upon the terms of manufacture prescribed by the standing contract with the Department. I understand that the operation of this machine has proved to be a very interesting feature of the postal exhibit at the exposition.

#### CONTRACT FOR LETTER-SHEET ENVELOPES.

I think it proper to call your special attention to the contract under which letter-sheet envelopes are now furnished to the Department, the following account of which contract was given in the report of this office for the year ending June 30, 1886:

Upon representations that there was a public demand for articles of this character, it was early determined by you to carry the law into operation under such conditions as should involve the Government in no risk or expense. A proposition satisfying these conditions was made by the United States Sealed Postal Card Company of New York, the owners, through letters-patent, of a device that seemed to possess more than ordinary merit. The proposition was accepted, and articles of contract were entered into under date of October 24, 1885. The contract provided that the contractor should bear all the cost connected with the manufacture and issue of the envelopes; the dies and plates to be used for printing the stamps were to be engraved and furnished at the expense of the contractor, subject to the approval of the Postmaster-General, and by such parties as should be satisfactory to him, and they were to become the absolute property of the United States as soon as made, and to be at all times subject to the order and control of the Department. All the work was to be done under the supervision of an agent of the Department, and subject to the approval of the Postmaster-General or his duly authorized representative. A bond, in the sum of \$20,000, with approved sureties, was exacted to protect the interests of the Government and to insure the faithful performance of the contract. By a supplemental contract, executed on the 12th day of August, 1886, the contractor was also required to provide for the transportation of the envelopes to all post-offices where the Postmaster-General should decide to place them on sale, the carriers employed to do the work to be subject to the approval of the Postmaster-General. The safe-delivery of the envelopes to the points of destination was guaranteed by a bond of \$50,000. The consideration to be paid the contractor was at the rate of \$2.85 per 1,000 for such envelopes as should actually be sold, payments to be made quarterly upon reports from the postmasters through whose offices the sales were effected. In the event that the envelopes should prove unsalable, they were to be destroyed without compensation to the contractor. The right was reserved to the Postmaster-General to annul the contract at his discretion. The price fixed for the sale of the sheets was at the rate of \$3 per 1,000, in addition to the postage, an increase of 15 cents over the cost of manufacture having been made to cover the clerical expenses of sale at the post-offices. In short, no chance was left through which the Government might become a loser through the effort to introduce the letter-sheet envelopes. On the contrary, all the contingencies of profit or loss are in favor of the Government.

Under this contract issues of letter-sheet envelopes were begun on the 18th of August, 1885, to a few of the larger post-offices; subsequently the issues were extended to all first and second class offices; and since June 20, 1887, every Presidential office the postmaster at which had made requisition for them has been supplied. Full information concerning these envelopes has been given to postmasters and the public, no unusual delay has occurred in supplying them as ordered, and every opportunity has been offered by the Department to have their utility and convenience thoroughly tested. The public, however, as may be inferred from the following statement of the quarterly sales of the envelopes since their introduction, does not seem to desire them:

Number sold during quarter ending—

September 30, 1886.....	1,122,457
December 31, 1886.....	1,185,976
March 31, 1887.....	751,057

Number sold during quarter ending—

June 30, 1887.....	421, 563
September 30, 1887.....	475, 436
December 31, 1887.....	536, 630
March 31, 1888.....	401, 586
June 30, 1888.....	354, 528

From the above it is seen that there has been a declining demand for these letter-sheet envelopes ever since their introduction. I do not think this can be due to any radical fault in the envelope itself, for it is of very simple and convenient form, and it is made of fairly good paper. It can hardly be due either to the price of the envelopes, for they are sold at only \$3 a thousand, in addition to the postage value, or at the rate of three for a cent, a not unreasonable price; nor can it be because the public has not had a full opportunity to purchase them, for, as before said, they have for more than a year past been obtainable at every place in the country of any considerable population. No matter, however, from what cause their unpopularity springs, it is plain that people do not want them to any considerable extent, so that I am inclined to doubt whether the Department will be justified in further continuing their issue.

If they could be comprehended in the regular contract for other stamped envelopes, thus enabling the Department to have the benefit of public competition in furnishing them, I should see no objection to the continuance of their issue, even though there might never be any great demand for them. But it must be remembered that the design of these letter-sheets is patented, and that if they are to be furnished at all, they can only be obtained from the present contractors, giving them a monopoly—though it may be an unremunerative one—which is in opposition to the spirit of the law at least. Besides this, it is a labor of no small magnitude every quarter to ascertain the sales of these letter sheets at the several offices to which they have been supplied—a labor which is absolutely necessary under the contract.

I may add that if it be deemed desirable to terminate the contract it can be done without any difficulty or loss to the Government, the Postmaster-General having the right to end the contract at any time he may think it proper to do so, and to withdraw from post-offices all the sheets that may remain unsold. The following clause of the contract covers this latter point:

4. That the Postmaster-General shall have the right, whenever, in his opinion, there shall be an insufficient public demand for the letter-sheet envelopes herein provided for, to withdraw from sale all of them that may be outstanding in any of the post-offices to which they have been furnished, and to cancel them in any manner that he may deem proper; in which event, the contractor shall be allowed for the sheets so canceled only such amount as they may be sold for as waste paper.

#### NEW CONTRACT FOR REGISTERED PACKAGE AND OTHER OFFICIAL ENVELOPES.

During the year a new contract was entered into by the Department with the Plimpton Manufacturing Company and the Morgan Envelope Company, doing business together at Hartford, Conn., for the supply of registered package, tag, dead-letter, and official envelopes for the present fiscal year. A copy of this contract is hereto appended, marked No. 29. Its specifications and conditions are substantially the same as those of the contract for the preceding year, but the prices are somewhat higher, and there are two additional sizes of envelopes called for by it. The following statement exhibits the prices under the two contracts:

Kinds.	Per thousand under old contract.	Per thousand under present contract.	Kinds.	Per thousand under old contract.	Per thousand under present contract.
No. 1.....	\$0.78	\$0.82	No. 9.....	\$3.25	\$3.30
No. 2.....	.96	.95	No. 10.....	3.72	4.00
No. 3.....	1.23	1.30	No. 11.....	4.43	4.50
No. 4.....	1.70	1.80	No. 12*.....		4.75
No. 5.....	1.94	2.05	No. 13*.....		5.00
No. 6.....	2.28	2.35	No. 14*.....	4.75	5.50
No. 7.....	4.13	4.25	No. 15*.....	7.70	7.75
No. 8.....	2.12	2.25			

\* Nos. 12 and 13 of the present contract are sizes not included in the former contract. Nos. 14 and 15 are what have heretofore been known as Nos. 12 and 13, respectively.

On the estimated number of the several kinds of envelopes to be required under and during the term of this new contract, the aggregate increase of cost to the Government over what would have been paid at the prices of the old contract will amount to about \$3,500. This, it can be truly said, is an inconsiderable increase, which may have been due to higher prices prevailing generally in the envelope trade, to higher prices of paper, or to some other legitimate cause. It has been suspected, however, that the increase resulted from an understanding among leading envelope makers, or at least among those who were apparent competitors for the contract. If this suspicion be correct, the future contracts to be made by the Department for similar articles will probably be controlled by similar combinations of bidders—a contingency that may well excite some alarm. Whether it be correct or not, however, I am thoroughly persuaded that such a combination is in its nature sufficiently adverse to the interests of the Government to justify its prohibition by law. It is therefore a question that may without impropriety be brought to the attention of Congress.

#### MANUFACTURE OF STAMPED PAPER BY THE GOVERNMENT.

Before the present fiscal year expires the Department will be compelled to advertise for proposals for manufacturing adhesive postage-stamps and postal-cards for the contract term beginning July 1, 1889, and ending June 30, 1893. It is not inappropriate, therefore, at this time to consider whether the system under which the Department now procures its supplies of these articles, or, for that matter, of any kind of the stamped paper used in the postal service, is the best; or, to put the case to a plain issue, whether, instead of relying upon private enterprise to furnish these representatives of value, amounting now to the enormous sum of nearly \$50,000,000 a year, it is not much better that the Government itself shall make them, under somewhat the same system, and by the same establishment—namely, the Bureau of Engraving and Printing of the Treasury Department—which now produces the bonds, Treasury notes, internal-revenue stamps, and all other kinds of public securities. For my part I do not hesitate to declare it to be my conviction, after having given the subject mature consideration, that the Government ought to take upon itself the manufacture of every kind of stamped paper used in the payment of postage—adhesive stamps, stamped envelopes, letter-sheets, and postal-cards—just as soon as the necessary arrangements to that end can be completed. The reasons upon which my conviction rests are these:

1. It is fair to presume that the Government can make its postage-stamps and postal-cards, and probably its stamped envelopes, as cheaply as they can be procured from private establishments. When the last

postage-stamp contract was about being let, the Bureau of Engraving and Printing submitted an estimate upon which it proposed to do the work at but a trifle more than the rates bid by the company to whom the contract was awarded; and it is not unlikely that the Bureau could have taken the work even at these rates without loss. Whether this be so or not, it is not perhaps unsafe to say that the Bureau would now undertake to do the work, if required by law to do so, upon a like condition to that which I think was prescribed when the work of printing Treasury notes was originally transferred to it—namely, that it shall not cost any more than the Government now pays for it.

2. As intimated in a previous paragraph of this report, in connection with the manufacture of registered package and other official envelopes, there is now—in this era of trusts and combinations—a perpetual danger of exorbitant prices for articles furnished the Government, through a secret understanding among bidders. In the matter of furnishing stamps and stamped envelopes, this is particularly to be apprehended, inasmuch as there are but few establishments throughout the whole country that have the facilities for doing the work, and the arrangement of a combination would be therefore comparatively easy. I do not think it necessary to discuss the question as to whether combinations among manufacturers or dealers to exact higher prices for their goods from the public is right or wrong; but I have no doubt, so far as concerns supplies to the Government, which is but the representative of all the people, that either there should be perfectly free and genuine competition amongst the persons who are invited to furnish such supplies, or the Government, as far as is practicable, should protect the public interests by itself making the goods. In the long run, economy and convenience would probably be subserved by the latter course.

3. The manufacture of public securities or representatives of value by private establishments is always, I think, attended with more risks to the public interests than where the work is done directly by the Government. In the latter case, at any rate, there would be no division of responsibility for correct management between the Government and any private institution. If it should be determined to have stamped paper made in this way, every detail of the work could be under the eyes of Government officers, selected with especial reference to their capacity and honesty; the system under which the work should be done would be the Government's own devising, to be prescribed, if thought necessary, by law; and the vast values produced, instead of being kept in private vaults and under private control, would be in the permanent custody of public officers, behind the locks and bars of the public Treasury. I speak of this matter, of course, abstractly, and without any special reference to the contractors who are now furnishing the Government with stamped paper: their reputation is deservedly high, and it gives me pleasure to state that their obligations under their contracts with the Department, so far as my observation extends, have been uniformly met with honorable exactness and promptitude.

In accordance with the foregoing views, I recommend that Congress be requested to insert some such provision as the following in the next act making appropriations for the postal service:

That upon the expiration of the present contracts for the manufacture of adhesive stamps and other stamped paper issued under the direction of the Post-Office Department, the work of making such stamped paper shall, if before that time considered advisable by the Postmaster-General and the Secretary of the Treasury, be performed by the Bureau of Engraving and Printing of the Treasury Department, under such regulations as the said officers shall jointly prescribe, the cost of the work to be relatively no greater than the cost under existing contracts, including the expenses of

the several agencies: *Provided*, That the stamped paper hereinabove referred to shall always be supplied in sufficient quantities and kinds to meet the wants of the Post-Office Department, to be from time to time made known by the Postmaster-General or any proper official under him, and shall be turned over to that Department promptly as called for, and issued by its designated officials under methods of distribution similar to those now in operation. And payment for the stamped paper thus issued shall be made by warrants on the Treasurer of the United States in favor of the Bureau of Engraving and Printing, payable out of the appropriations now and to be hereafter made for the purpose, the bills to be rendered monthly by such Bureau, and to be regularly audited by the Sixth Auditor in the same manner as other bills for the postal service are audited: *And provided further*, That the Secretary of the Treasury is hereby authorized to provide whatever facilities are needed in the way of machinery, paper, gum, and other supplies to carry the above provision into effect.

I may add that in the furnishing of adhesive stamps and postal-cards there will probably be but little inconvenience in transferring the work of manufacture to the Bureau of Engraving and Printing, as this work is directly in the line of what is now done in that establishment. In the manufacture of stamped envelopes, there will be more or less of inconvenience and difficulty; but I do not doubt that if the necessary authority be given, the transfer can be made so as eventually, if not at once, to work to the advantage of the Department.

#### DIVISION OF REGISTRATION.

The fees collected on registry business during the year ending June 30, 1888, amounted to \$1,125,154.40, which shows an increase of \$90,477.60, or 8.7 per cent., over the amount collected during the previous year. Everything considered, this is a gratifying increase.

The classification and number of pieces of matter registered during the year are as follows:

Domestic letters .....	9,465,414
Domestic parcels .....	1,066,572
Total domestic .....	10,531,986
Foreign letters .....	674,607
Foreign parcels .....	44,951
Total foreign .....	719,558
Letters and parcels free—on Government business .....	2,425,625
Aggregate .....	13,677,169

Statistics of registry business in greater detail will be found in Tables Nos. 12, 13, 14, and 15.

#### LOSSES.

As appears by statistics kept by the chief post-office inspector, the total number of reported losses of registered matter during the fiscal year ending June 30, 1888, was 4,820, of which 3,978 were fully investigated and reports thereon made. From these reports the following results are ascertained:

Number of cases in which the complaints of loss were found to be groundless .....	2,700
Number of cases in which articles lost were recovered or made good to the owners .....	713
Total cases in which no loss was sustained .....	3,413
Number of cases where loss occurred through burning of post-offices and postal cars, wrecking of postal cars, and other unavoidable accidents .....	224
Number of cases of loss in which the cause was not ascertained .....	128
Number of cases of loss through fault or criminality of postal employes .....	213
Total investigated cases .....	3,978

If we assume that of the investigated cases, one-third will turn out to be actual losses (and this has been the estimated proportion for five years past), we have 845 cases of loss which occurred or were reported during the year, or one in every 15,334 domestic letters and parcels registered. This is a very marked improvement on the record of the preceding year—an improvement attributable to two general causes: one, the increased efficiency of postal officials, as shown by the fact that with nearly 9 per cent. more registration business than in the year preceding, the total number of reported losses was about 10 per cent. less; another, the prompt and energetic methods that are now pursued in the investigation of irregularities, as shown by the fact that with 10 per cent. less cases of reported loss, there were 23 per cent. more recoveries. In connection with this latter fact, I take a great deal of pleasure in bearing testimony to the intelligent, zealous, and unremitting efforts of the chief post-office inspector and his corps of assistants in looking after business relating to the registry system. Their work is to a great extent brought directly to the attention of this office for review, or opinion, or for other action, giving me ample opportunity to see the thoroughness with which it is generally done, and justifying unstinted commendation therefor.

I respectfully refer to the report of the chief inspector for fuller details of the investigation of registration losses than are here given.

#### IMPROVED SYSTEM IN REGISTRY DIVISIONS OF LARGE POST-OFFICES.

The work of systematizing the office methods of large post-offices in registration business has been continued, and fifteen of the thirty leading cities have now been provided with special registration blanks and records, in the use of which they have been specially instructed. Some of these offices have had necessary architectural and mechanical changes introduced, thus giving them in all respects a consistent plan for working registered mail in masses, with checks and balances of such a character that innocent officials may be better protected and the field of investigation narrowed in all cases of presumed or actual loss. This work is to be continued until the registry divisions of all the more important offices are brought into practical uniformity.

As showing how great a proportion of the immense registration values of the country is handled, at some stage of working, at the thirty most important registration centers, the statistics for the last fiscal year are given as follows:

At all post-offices (57,376) the number of pieces of matter registered was .	13,677, 169
Out of this total, the thirty leading cities registered .....	2,769, 149
They also delivered .....	7,432, 320
And they handled in transit.....	6,438, 307

#### MORE SPACE AND BETTER MECHANICAL ARRANGEMENTS NEEDED FOR REGISTRY DIVISIONS IN GOVERNMENT BUILDINGS.

The recommendation of the Postmaster-General in his last annual report, that the Department be provided with an architect thoroughly familiar with post-office requirements to design the interior space and fixtures of post-offices, either under construction or to be leased, applies with especial force to the handling of registered matter in large post-offices. The custody and manipulation of the immense values involved, and the different duties of recording, enveloping, sorting, pouching, checking, and receipting inward and outward with postal clerks, carriers, and the

public, so that all transfers may be made without objectionable contact and without danger, require much planning and forethought. In but few of the new post-office buildings have the best results been obtained in the adaptation of the architect's plans to the prosecution of post-office business, so that the work has frequently to be performed with surroundings far from safe or convenient, requiring more clerical labor and involving greater delays to the service and to the public. With correct plans, based on a broad experience, far better provision could have been made without added expense in the buildings. As far as it has been possible with such means as I could command, I have endeavored to remedy some of these defects by making and devising designs for registry space and fixtures at different post offices; but so far as concerns new post-office buildings to be erected, to say nothing of the large number of new buildings to be leased, it will be impossible for me to give any such full attention to the plans, so far as they affect the registry service, as an architect could give who had familiarized himself with the needs of the different branches of post-office work.

As showing the great importance of perfecting and improving the registry system from a Government standpoint, attention is called to Table No. 15, appended to this report, which gives the Government values in the registered mail for the fiscal year as aggregating over \$911,000,000.

#### INTERNATIONAL REGISTERED POUCH EXCHANGES.

No extension of this system has been made during the year, although some additional advantages have been gained through correspondence in perfecting the system as it has heretofore existed.

Registration losses, which were formerly of frequent occurrence on the New Brunswick border, have entirely ceased since the establishment last year of through pouches for registered matter exchanged with that province and the province of Nova Scotia.

Correspondence with the Mexican post-office department for the establishment of through exchanges of registered pouches has been continued, but, owing to questions at issue with respect to the locks to be used, no positive arrangements have so far been agreed upon; but as the completion of another great section of the Mexican railway system has effected a saving of twenty-four hours in the dispatch of registered matter between the greater portion of the United States and the Mexican States, and as another great extension of railway, now about completed, will make a still further saving of time, it is manifest that some satisfactory through-pouch system will at no distant day be established between the two countries.

A through registered pouch exchange has been established between New York and Eagle Pass, Tex., which up to the Mexican border gives greater expedition and security to the valuable registered matter passing by the route already completed. Soon, however, this exchange will be abandoned for a more advantageous one with Laredo, Tex., to connect with the new railway extension above alluded to.

#### IMPROVED FOREIGN REGISTERED-LETTER BILL.

In 1885 a memorandum was prepared for the use of the United States representatives at the Universal Postal Union Convention at Lisbon, advocating the adoption of a manifold bill with coupon receipt to supersede the less convenient standard form of foreign registered-letter bill prescribed for countries of the Postal Union; but as the proposed im-

provement was not presented to the Postal Congress by our representatives, no action was taken on the subject. An arrangement, however, has been made with the postal administration of the United Kingdom for the use of such a bill in transmitting registered matter to Great Britain, under which perfectly satisfactory results have been realized. Correspondence has been opened, too, during the year, with the postal departments of five transpacific countries to secure the adoption of a similar form of bill in dispatches of registered matter from San Francisco. The Hawaiian postmaster-general has favorably responded; so have the postmasters general of New South Wales, Victoria, and Queensland.

Among the great advantages gained by the use of this bill may be named, more and better spaces for description of registered articles; the saving of labor which the manifold process does; and the later closing of registered bags. The latter advantage is very important at San Francisco, where the time between arrival of overland trains and the sailing of steamers is very short. The chief advantage of the manifold bill, however, is its coupon feature, securing a direct receipt for all registered pieces from the postmaster at the foreign exchange office, and thus enabling our own exchange postmasters to furnish positive answers to inquiries concerning the safety of individual registered pieces thus dispatched.

#### DOMESTIC EXCHANGES OF THROUGH REGISTERED MATTER.

The number of exchanges for registered matter in the domestic mails, under the through-pouch, inner-sack, and brass-lock systems, the workings of which have several times been described in previous annual reports of this office, has increased considerably during the year. The following are the numbers of these exchanges in existence June 30, 1888:

Through registered-pouch exchanges .....	422
Inner-sack exchanges .....	410
Brass-lock exchanges.....	222
Total .....	1,054

#### DIVISION OF FILES, RECORDS, AND MAILS.

The total number of letters and parcels received, opened, and examined during the year in this division was 1,220,000, an increase of 34,740 over the number of the previous year.

Among these letters and parcels, 492 contained money, and 11,367 contained stamps, stamped envelopes, and postal-cards returned to the Department by postmasters for redemption. The number of registered letters received was 13,142.

Of the letters received, 17,875 were briefed and recorded, and filed after final action was taken upon them. The number of letters written and copied in the office, and mailed, was 30,163. This does not include circular letters and short communications with regard to routine matters not sufficiently important to require more formal action.

#### MAILING OF BOOKS AS SECOND-CLASS MATTER.

I respectfully renew the recommendation made in my last annual report, that books, falsely represented to be periodicals, and now going through the mails at the pound rate of postage, be charged the same

as other third-class matter; and I repeat here the statements I made in support of this recommendation:

Under the law the conditions upon which a publication shall be admitted to the second class of mail matter are as follows:

1. It must regularly be issued at stated intervals, as frequently as four times a year, and bear a date of issue, and be numbered consecutively.
2. It must be issued from a known office of publication.
3. It must be formed of printed sheets, without board, cloth, leather, or other substantial binding, such as distinguish printed books for preservation from periodical publications.
4. It must be originated and published for the dissemination of information of a public character, or devoted to literature, the sciences, arts, or some special industry, and having a legitimate list of subscribers: *Provided, however*, That nothing herein contained shall be so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates. (Act of March 3, 1879, section 14, 20 Stats., 359.)

Under these conditions—which were intended to distinguish what are generally known as newspapers and periodicals from books—it may be demonstrated that almost anything in the nature of a book, provided it be without board, cloth, leather, or other substantial binding, may be brought within the privileges of the second-class rate of postage, and the object of the law accordingly defeated.

Let it be supposed, for example, that a publisher wishes to issue the works of Shakspeare in such a way as to secure the privilege of the pound rate of postage when the book is sent in the mails. Every one knows that such a publication is a book, no matter how it may be published; it is certainly not a newspaper or a periodical in the universally accepted sense of these words. The publisher, however, means to have it admitted as such, so he arranges to issue it monthly, giving each part a number and a date, places upon the title page a statement of the place of publication, and binds the parts in paper covers. He thus easily complies with three of the above-mentioned conditions. Next, he publishes a prospectus in which the publication is claimed to be devoted to literature, and he secures through his agents subscribers to the work, in this way complying with the fourth condition of the law.

It must not be supposed that this is merely a hypothetical case. Instances of this exact character have occurred. The postmaster at New York has called attention to the fact that a dictionary—nothing more nor less—issued in this way, was passed through the mails at the pound rate of postage. Not only this, but tons upon tons of books—called “Libraries” or “Series”—being purely and simply paper-covered books or reprints of books, having, probably, no list of subscribers other than booksellers, who buy them just as they buy other books—are every day going through the mails as second-class matter. And the number is constantly on the increase. Unless a check is put to this abuse there is no telling to what extent it will go. Already the mailing of matter of this character, together with pretended sample copies of publications, reference to which is made hereafter, has become so great that the intelligent and careful handling of it at many offices is impossible; so that there is little doubt that a great deal of matter unquestionably subject to a higher rate of postage is constantly smuggled through the mails as second-class matter.

I can not believe that the law was ever intended to allow this class of literature—some of it of very questionable value—to go through the mails at the rate of a cent a pound, while the Bible, the school-book—every other good book that reputable publishers issue under its true character—has to bear postage at the rate of 8 cents a pound.

As a remedy for the evil I suggest the passage by Congress of the following:

“That hereafter no publications shall be admitted to the mails as second-class matter that are but books or reprints of books, whether they be issued complete or in parts, whether they be bound or unbound, or whether they be sold by subscription or otherwise.”

A bill embodying the above recommendation was during the last session of Congress introduced into the House of Representatives, and passed without serious objection, but it was not favorably acted on by the Senate.

#### SAMPLE COPIES OF NEWSPAPERS.

Elsewhere in this report I have urged, in case the letter rate of postage should be reduced, that other changes of postage be also made. Among these changes it was suggested that the rate of postage on sample copies of newspapers and periodicals, which are in the nature of

advertisements or business circulars, should be charged the same rate of postage as third-class matter. The following extract from my last annual report may show good reasons for this suggestion:

Under the law as it now stands, publishers and news agents have the right to mail sample copies of their publications at the same rate as for copies to actual subscribers; and as no limit to this privilege is prescribed, postmasters are bound to receive, in every case where a publication is legitimate, any number of sample copies that may be offered. The result is that in many cases publications intended primarily for advertising purposes, and for free circulation, or circulation at nominal rates, originally presented under the guise of bona fide publications, and purporting to have legitimate lists of subscribers, obtain the privilege of admission to the second class, and almost immediately afterwards their publishers flood the mails with sample copies, or copies gratuitously issued. Many cases have come to my notice where there is reason to believe that immense editions of such publications are sent through the mails in accordance with previous guaranties to advertisers; that is to say, the publishers have not aimed to obtain subscribers, but simply to issue their periodicals as advertising sheets with a guaranty to their patrons of a large circulation. It is not an exaggeration to say that in some of these cases the sample copies are perhaps a hundred-fold the edition to bona fide subscribers.

It may be said that in all such cases as these the character of the publication is manifest, and that the postmaster has it in his power to make the facts known to the Department, so that the evil may be corrected. But the difficulty is, as before intimated, that the publication when admitted has all the characteristics of second-class matter, and being thus admitted, the publisher has the right to mail unlimited quantities of it; in the second place, it is not always possible for the postmaster or the Department, without a special investigation, to determine whether the publication is being issued gratuitously or not; and, thirdly, when the publication is discovered to be merely for advertising purposes, it is only after millions of copies have been circulated at the pound rate.

Aside from cases of this kind, it is perhaps a common thing for even legitimate periodicals to begin business with a merely nominal list of subscribers, depending mainly upon the continuous issue of specimen copies to build up a profitable subscription list.

It seems to me that the law was never intended to give to enterprises of the foregoing character the privileges they are now enjoying; and it never could have been foreseen that the very liberal rate of postage on legitimate newspapers and periodicals would be taken advantage of by the publishers of mere rubbish, to the injury of genuine publications.

A remedy for the wrong might, perhaps, be secured by limiting the number of sample copies to a reasonable proportion of the actual subscription list, and to require that every copy sent out as a sample copy should be marked as such under penalty; and never to permit the mailing, except at third-class rates, of even this proportion of sample copies without permission previously obtained from the Department.

#### DEFECTIVE METHOD OF PAYING NEWSPAPER POSTAGE.

The experience of another year has served to deepen my conviction that the method now in operation under which publishers pay postage on second-class matter is improper, and ought to be changed. I therefore think it advisable to renew my recommendation on this subject, as shown in the following extract from my last annual report:

One of the defects referred to lies in the peculiar method of paying and receiving postage on this class of matter. Instead of being required to place upon the matter mailed postage-stamps in appropriate amounts to pay the postage, as is the rule with all other classes of mail matter, publishers are permitted to bring their publications in bulk to the post-office, and there pay the necessary amount of postage in money, the postmaster giving a receipt therefor, made out on a blank taken from a book of forms kept for the purpose, and attaching to the retained stub of the receipt a corresponding amount of postage-stamps from the stock in his hands, which stamps he is expected to cancel. Quarterly reports of the amounts thus collected are required to be made to the Department, accompanied with the stubs containing the canceled stamps.

Under such a system it seems to me that fraud against the Government is comparatively easy. If, for example, the postmaster should fail to receipt to the publisher when matter is mailed (and this has frequently occurred, whether by design or not is immaterial) it is next to impossible to ascertain whether the necessary stamps have

been attached to the stub of the receipt book or not; and so long as the postmaster may attach in any such case as small an amount of stamps as may suit his purposes, he may, of course, retain the surplus in money without fear of detection. The chance of discovering such a fraud, if the publisher should lose his receipt when one is given—an other thing of common occurrence—is equally remote. In passing, it may be remarked that the failure of the publisher to take a receipt, or his loss of it after he gets it, should not excite surprise; for, as the law requires postage to be paid at the time of mailing—or, in other words, as the postmaster is forbidden to give credit for postage—the actual mailing of the matter is *prima facie* evidence of the payment of the postage. So that receipts, except as mere memorandums of mailing, are valueless, and publishers as a rule are probably careless about demanding or retaining them. But even if the postmaster should give the receipt in every case, and the publisher should safely keep it, the Department still may be easily defrauded, for, except in cases where postmasters are suspected of fraud and special investigations are thereupon made, the receipts are never called in and examined; indeed the verification of postmasters' returns by a comparison with these receipts would, owing to the immense number of them, be impracticable without a large increase of the force of the Department; so that in actual practice, the postmaster's return, if it agrees with the amount of stamps found attached to the accompanying stubs, is accepted unquestioningly, without knowing whether it is fraudulent or not.

A case of fraud of this character which occurred about a year ago in the Chicago post-office, where a subordinate of the postmaster was by chance found to have been for years in the habit of retaining large sums of money derived from second-class postage—the returns made to the Department not giving the slightest indication of the fraud—is an illustration of how easily the thing may be done. Besides these opportunities for fraud, there is the further one for collusion with the publisher, in which event nothing can be done to prevent or detect the cheat, unless either the publisher or the postmaster should voluntarily confess it. The opportunity is still better where the postmaster, as is sometimes the case, is also the publisher. I do not mean to be understood as intimating that frauds of this character exist; my purpose is simply to show that the system admits of their ready perpetration.

Besides the above objections to the system, there is the additional one that, from the absence of stamps on matter mailed as second-class, the fact of prepayment of the postage is in very many cases of necessity a matter of doubt to the delivering postmaster. There being on the matter no evidence whatever of prepayment, not even at times a printed statement that the publication has been regularly entered as second-class matter, the delivering postmaster can not, in any case where his doubts may be excited, protect the Government against wrong without delaying the matter and making special inquiry of the Department or the sending postmaster. In the great majority of cases he must simply take it for granted that everything is right and deliver the matter without inquiry. I have reason to believe that a great deal of this matter goes through the mails either without prepayment at all or paid at a lower rate of postage than is required by the law and the regulations. In fact, the quantity of second-class matter that, by reason of the low rate of postage, is now going through the mails is so great that proper examination, even at the mailing offices, is often impossible.

Again, this peculiar system of paying postage necessitates the examination of postmasters' books and returns at the Department, a corps of clerks being usually kept busy on this work. Every quarter tons of the stubs, containing the canceled newspaper stamps, are sent to the Department for comparison with postmasters' reports, and although this work is but of small importance as a means of detecting fraud, it is of value in correcting mistakes that now very frequently occur, but which would not occur under a different system.

It is hardly necessary to state, that if publishers were required to purchase stamps of suitable denominations, running, say, from a minimum value of one-eighth of a cent to any required value above that, or what, perhaps, would be better, to use stamped bands or labels so made that their use would necessitate their cancellation, and to attach such stamps or bands to the matter mailed, in every instance of separate address, similarly to what is done with all other classes of matter, all opportunity for fraud or abuse, as above indicated, and all cumbrous and unnecessary machinery in the collection of postage and the examination of returns, would disappear.

Without being prepared at this time to go into particulars, I think it only necessary to say that I am strongly inclined to believe that if the necessary authority were given by an amendment of the present law, a new system embodying such a change could be devised which would not materially interfere with the convenience of publishers—except to require them to perform labor that is properly their own—and without interfering with the present rate of newspaper and periodical postage, except, perhaps, where single copies of papers might be mailed, in which event a slight excess over an exact fraction of the pound rate would be necessary.

A similar case of defalcation to that which is referred to in the above extract, as having occurred at Chicago, was discovered during the past

year at the post-office in this city, the delinquent being a trusted official who was able to carry on his thieving for years without giving rise to suspicion. The amount lost to the Government through him is not positively known, but is probably \$4,000 or \$5,000. The importance of the case, however, is not so much in the amount of money lost as in the fact that the system will permit of just the same thing anywhere else.

#### CONTRAST WITH THE POSTAL SERVICE OF OTHER NATIONS.

Dating from the adoption of the Federal Constitution, the postal service of the United States is now in the one-hundredth year of its existence, a peculiarly appropriate time, it would seem, for some one to give an account of its humble beginning and wonderful growth. With this idea, I have several times intended to prepare a historical sketch of the Department as a part of the report of this office; but I regret to say that so far I have not been able to see my way clear to the satisfactory performance of such a task. I have, however, collected some interesting statistics showing in tabular form the growth of several branches of the postal service, being mainly an extension of a similar table prepared some years ago by a very intelligent officer of the Department, and I have had made an abstract, as nearly complete as the time at my disposal would allow, of the most important of existing and former laws relating to the postal service, going back even to colonial times, which two papers I have ventured to add to this report as a part of the appendix (see papers Nos. 18 and 19).

I have also been able to gather some interesting statistics of the postal business of several countries of the Universal Postal Union, which afford such an excellent means of contrasting the service of the United States with that of other great nations that I think it entirely proper to introduce them here. From these figures it will be seen that in nearly every item of its vast postal business the United States of America, though commencing its career just a century ago with but seventy-five post-offices and a gross annual postal revenue scarcely more than double the daily receipts now of only one of its great offices, stands conspicuously ahead of every other nation in the world. These statistics are, I believe, the latest that are obtainable, those for Great Britain being mostly taken from the report of the postmaster-general for the year ending March 31, 1888, and those for Germany and France from the last tabulation published by the International Postal Bureau at Berne, Switzerland. Those which give the number of letters and other pieces of matter transmitted in the mails of the United States are of especial interest, as they are the first accurate statistics of that character ever published.

Beginning with the number of post-offices in operation, we find that the United States stands first among the nations. The figures, in contrast with those for Germany, Great Britain, and France, the three next great countries of the Postal Union, are as follows:

United States, June 30, 1888.....	57,376
Germany, December 31, 1886 .....	18,688
Great Britain, March 31, 1888 .....	17,587
France, December 31, 1886 .....	7,296

Excluding Germany, the United States has about as many post-offices as all the countries of Europe combined, and it is adding to the number at the rate of over 2,000 a year. In this feature of its administration it manifests a liberality beyond that of any other great nation; for while the establishment of every new office adds immediately to the cost of the service, the receipts are not correspondingly increased. In fact, the question of revenue in the establishment of new offices is never

taken into consideration, the aim of the administration being to give to every community as soon as possible the means of postal intercourse with other places. The liberality of its policy in this respect is forcibly illustrated by contrasting it with that of Russia, which, with more than twice the extent of territory and nearly double the population of the United States, has not one-tenth the number of post-offices.

In gross postal revenue the United States stands first, also, among nations, as is shown by the following statement:

United States—year ending June 30, 1888 .....	\$52, 695, 176. 79
Germany*—year ending March 31, 1888 (the amount being ascertained by adding 5 per cent. to the amount reported by the International Bureau for the preceding year) .....	45, 194, 357. 00
Great Britain*—year ending March 31, 1888 .....	42, 362, 346. 00
France*—year ending December 31, 1887 (the amount being ascertained by adding 5 per cent. to the amount reported by the International Bureau for the preceding year) .....	28, 779, 301. 00

Allowing for a reasonable increase of receipts in Germany, Great Britain, and France (5 per cent. is above their average annual increase), so that their business may be brought down to June 30, 1888, will still leave the United States greatly in the lead; and this, too, be it remembered, notwithstanding its rates of postage, from which the bulk of all postal revenue is derived, are, everything considered, lower than those of the other countries.

In the total length of mail routes the United States is vastly ahead of all other countries. The following are the respective lengths, those for Great Britain being ascertained by adding 10 per cent. to an estimate furnished in 1886 by the secretary of the General Post-Office at London:

Routes.	United States (year ending June 30, 1888).	Germany (year ending Dec. 31, 1886).	Great Britain (year ending Mar. 21, 1888).	France (year ending Dec. 31, 1886).
	<i>Miles.</i>	<i>Miles.</i>	<i>Miles.</i>	<i>Miles.</i>
Railroad .....	143, 713	23, 066	19, 525	20, 957
Steamboat .....	11, 058	1, 372	2, 750	198
All other .....	*249, 205	61, 447	22, 000	44, 179
Total .....	403, 976	85, 885	44, 275	65, 334

\* Not including carrier routes in cities.

The length of mail routes of all kinds in the United States probably now exceeds that of the whole of Europe, omitting France and Russia.

In the mileage of mail service annually performed the United States is immeasurably ahead of all other nations, the contrast with the three countries above named being shown in the following figures:

Kind of service.	United States (year ending June 30, 1888).	Germany (year ending Dec. 31, 1886).	Great Britain† (year ending Mar. 31, 1888).	France (year ending Dec. 31, 1886).

\* In giving the revenue of Great Britain and France the income from the telegraph service is omitted; in the case of Germany the income from the telegraphs is also left out, together with that arising from the service of couriers and the transportation of travelers—none of these branches of business being comprehended in the postal system of the United States.

† The amounts for Great Britain are ascertained by adding 10 per cent. to an estimate furnished two years ago by the secretary of the general post-office in London.

‡ Not including carrier service in cities.

Coming now to what is the best criterion of the magnitude of the postal service proper—the number of pieces of matter transmitted in the mails—we find that the United States is greatly in advance of the other nations. The following are the statistics :

United States (year ending June 30, 1888) :

Letters mailed, not including free letters on Government business .....	1,769,800,000
Postal-cards mailed .....	370,300,000
Newspapers and periodicals mailed (second-class matter) .....	1,063,100,000
Pieces of third and fourth class matter mailed (books, circulars, parcels of merchandise, etc.) .....	372,900,000
<b>Total .....</b>	<b>3,576,100,000</b>

(The calculations upon which the above statistics are obtained will be found in paper No. 17, appended to this report.)

Great Britain (year ending March 31, 1888) :

Letters delivered, not including free letters on Government business .....	1,512,200,000
Postal-cards delivered .....	188,700,000
Book packets and circulars delivered .....	329,500,000
Newspapers delivered .....	152,300,000
Parcels delivered .....	36,732,000
<b>Total .....</b>	<b>2,279,532,000</b>

Germany (year ending December 31, 1886) :

Letters, not including free letters on Government business .....	720,497,240
Postal-cards .....	245,282,540
Newspapers and periodicals sent to subscribers .....	523,873,340
Miscellaneous articles of printed matter .....	210,103,220
Samples of merchandise and parcels .....	116,305,070
<b>Total .....</b>	<b>1,816,066,390</b>

France (year ending December 31, 1886) :

Letters, not including free letters on Government business .....	591,451,811
Postal-cards .....	35,923,379
Newspapers and periodicals sent to subscribers .....	92,957,793
Miscellaneous articles of printed matter .....	713,103,439
Samples of merchandise and parcels .....	28,953,858
<b>Total .....</b>	<b>1,463,249,280</b>

The average number of pieces of mail matter to every inhabitant of the several countries named, taking the last census as the basis of the calculation, is now about as follows :

United States .....	pieces per capita..	71
Great Britain .....	do .....	61
Germany .....	do .....	41
France .....	do .....	37

As may be inferred from the foregoing, the postal expenditure of the United States is larger than that of any other country, a fact which should not, however, carry with it the idea that the postal service here is otherwise than economically conducted. The gross amount of expenditures of each of the several nations before named is as follows :

United States, year ending June 30, 1888 .....	\$55,795,357.84
Germany, year ending March 31, 1888 (amount being ascertained by adding 5 per cent. to the amount reported by the International Bureau at Berne for the preceding year) .....	*44,348,939.00
Great Britain, year ending March 31, 1888 .....	†28,876,935.00
France, year ending December 31, 1887 (amount being ascertained by adding 5 per cent. to amount reported by the International Bureau for the preceding year) .....	*28,327,666.00

\* These amounts take in the cost of the telegraph service and all other expenses of the postal service.

† This amount does not include expenses of the telegraph service.

In the cheapness of postage on letters, cards, and newspapers, the United States is also at the head of the world. The following statement will demonstrate this:

United States—

Rate on letters.....	2 cents an ounce.
Rate on newspapers.....	1 cent a pound.
Rate on postal-cards.....	1 cent each.

Great Britain\*—

Rate on letters.....	2 cents an ounce.
Rate on newspapers.....	1 cent each.
Rate on postal-cards.....	1 cent each.

Germany—

Rate on letters.....	2½ cents a half ounce.
Rate on newspapers.....	½ cent each (not over 1½ ounces).
Rate on postal cards.....	1¼ cent each.

France—

Rate on letters.....	3 cents a half ounce.
Rate on newspapers.....	¾ cent per copy.
Rate on postal cards.....	2 cents each.

### ONE-CENT RATE OF POSTAGE.

As some attempt has already been made in Congress to reduce the letter rate of postage to one cent an ounce—a bill to that end having been referred to the Senate Committee on Post-Offices and Post-Roads on the 11th of October of this year—it is not unlikely that this important question will be further agitated during the coming session of Congress, and, it may be, pressed to an affirmative decision. If this action should hereafter appear to be impending (I express no opinion as to the present expediency of such a reduction), I respectfully urge that the following general schedule of postage rates be recommended to Congress:

1. What is now called the letter rate to be 1 cent for every 2 ounces, instead of 1 cent for every ounce as proposed.
2. The newspaper and periodical rate to be the same as now—1 cent a pound.
3. What is called the third-class rate to be the same as now—1 cent for every 2 ounces.
4. What is called the fourth-class rate to be 1 cent for every 2 ounces, instead of 1 cent an ounce as at present.
5. The rate on transient newspapers to be 1 cent for every 2 ounces, instead of 1 cent for every 4 ounces as at present.
6. All serial paper-covered books now going through the mails under the guise of periodicals to be charged 1 cent for every 2 ounces.
7. All sample copies of newspapers and periodicals to be charged 1 cent for every 2 ounces.

Concerning the first of these suggestions, it may be said that an increase merely in the unit of weight of letters, from 1 ounce to 2 ounces, would not materially add to the weight of the mails; that is to say, the average weight of letters, which is now less than half an ounce, would not be perceptibly increased by increasing the permissible weight for a single rate. Consequently, the postal revenue would not be materially affected by such a change.

As to the suggested change in the unit of weight of fourth-class matter from one ounce to two ounces, I apprehend that few persons will see any reasonable ground for objecting to it. The present discrimination against fourth-class matter is not just in itself; or, in other words, it is

\* For letters above one ounce in weight, the rates of postage in Great Britain are fixed upon a descending scale from the unit rate here given.

not just that a discrimination should be made as between this and the third class of matter; and if so radical a change in the rates of postage as a reduction from two cents to one cent on letters is to be made, surely the postal revenue can stand the removal of the distinction in postage now made between books and merchandise.

So with regard to the change suggested in the rate of postage on transient newspapers. No one can see any just reason for admitting this class of printed matter to the mails at a less rate than that for books or merchandise; and as no hardship would be imposed on anybody by reducing the standard of weight from four to two ounces, that should be done at least for the sake of uniformity.

As to books that are falsely claimed to be periodicals, and as to sample copies of newspapers and periodicals now burdening the mails at the pound rate of postage (most of them being in reality not genuine sample copies), I refer to previous paragraphs in this report for reasons why the rate of postage on them should be increased.

If the above suggestions were adopted, we should have but two classes of mail matter—the first class consisting of letters and miscellaneous matter, at the rate of a cent for two ounces, and the second class consisting of newspapers and periodicals sent by publishers and news agents, at the rate of a cent a pound. Except as to second-class matter, all the present distinctions—many of them unnecessary and unreasonable—between the several kinds of mail matter, in the way of postage, nature of the matter, manner of wrapping, permissible writing, etc., would be wiped out; and with them would be removed the temptation to petty fraud, now so often yielded to by people using the mails, in concealing written matter in matter of a lower class; the annoyance that so often occurs from the detention of matter for insufficient postage; the public dissatisfaction growing out of strictness in rulings as to classification of matter, and to differences in such rulings; the necessity for requiring that any matter should be subject to examination; and the liability of miscarriage to letters which now so often occurs by the accidental concealment of them in unsealed envelopes or parcels of other matter.

#### ABUSE OF THE FRANKING PRIVILEGE.

Within the past two or three months a number of cases have been brought to my attention involving gross abuse of the franking privilege, in one instance the frank of a member of Congress having been forged upon envelopes bearing unfrankable matter, and in the other cases the genuine franks of Senators and members of Congress having been used by some unknown persons to convey through the mails political pamphlets and other campaign literature in no sense entitled to free transmission; and the circumstances surrounding these cases rather justify the belief that large quantities of unfrankable matter have been thus unlawfully transmitted. There is no reason for believing that any of the gentlemen whose franks have been so misused were guilty of any impropriety in the matter themselves; the wrong in most of the cases has resulted from the delegation of authority to frank, the persons so delegated either directly abusing it or by carelessness permitting others to do so. It would not seem of much importance, however, to ascertain just how the thing occurred. The law has been grossly violated, the postal revenue to more or less extent has been invaded, and the same or other parties may again at any time pursue the practice.

The exercise of the franking privilege has, throughout the entire

history of the Department, been attended with constant abuse; indeed, this seems to be almost inseparable from the granting of the privilege. Under the present law, at any rate, offenses against it are so easy of perpetration that they are almost invited; for, in the first place, the delegation of authority to frank may be to as many persons as may be deemed necessary by the franking official, who is not personally responsible for the wrongful exercise of such authority; in the second place, the frank may be put on the matter to be mailed with a hand-stamp, in the custody of which the parties employed to use it may be careless, or which anybody may easily imitate; in the third place, no postmaster can possibly distinguish between a genuine and a forged frank; and finally, even if the abuse is manifest, it is almost impossible to ascertain the perpetrator, and even if he could be discovered there is, strange to say, no punishment prescribed by statute for the offense.

It seems to me that the principle of franking matter by the signature, either written or stamped, of public officials is wrong and ought to be discontinued. I am clearly of the opinion that Senators and Members of Congress should not be required to pay postage on official matter sent by them to their constituents or others. Indeed, I am satisfied that much of their private correspondence partakes somewhat of the nature of public business, and therefore should not be a source of expense to them for postage. But instead of permitting such matter to go through the mails free under the signature of the official who sends it, I think it would be far better to have the postage paid, as in the case of private matter, by the attachment of stamps, which could be bought by the official out of a regular allowance to be made to him for the purpose. I accordingly respectfully recommend that Congress be urged to abolish the franking privilege so far as it applies to Members and Senators, and that a regular yearly allowance for the purchase of postage-stamps be made to them instead. By such a plan every Senator and Member would be placed upon an exact equality. No one could make use of the mails beyond his own allowance unless he paid therefor out of his own pocket; no misuse of the allowance could possibly occur any more than occurs in using the allowance now made to Senators and Members for stationery; no unauthorized persons could make use of the mails to carry free unofficial matter as is now done; and the postal service would get a considerable addition to its revenue for service which is now entirely unpaid for.

The franking privilege as it is now enjoyed by agricultural colleges and agricultural experiment stations should, I think, be also abolished; but as the free use of the mails by these institutions is an entirely proper thing, they might be furnished through the Department of Agriculture with such free penalty-envelopes and labels as would be necessary for their use.

#### ORGANIZATION.

The organization of this office is as follows :

Office proper of Third Assistant Postmaster-General :	
Third Assistant Postmaster-General.....	1
Chief clerk .....	1

#### EFFICIENCY OF OFFICE FORCE.

It is hardly necessary to say, in conclusion, that the work of the office, in all its branches, during the year, has been promptly and satisfactorily performed. No errors of any moment have been made, no failure to fully meet the requirements of the service has occurred, and I have had no occasion at any time to censure a single employé for official or personal misbehavior. On the contrary, I have had cause to congratulate myself and the Department upon the uniform good conduct and efficiency of the entire force—a fact which I take great pleasure in bringing to your notice.

Yours, very respectfully,

H. R. HARRIS,

*Third Assistant Postmaster-General.*

Hon. DON M. DICKINSON,

*Postmaster-General.*

#### No. 1.—*Explanation of estimates of appropriations for the office of the Third Assistant Postmaster-General for the fiscal year ending June 30, 1890.*

#### POST-OFFICE DEPARTMENT, OFFICE OF THIRD ASSISTANT POSTMASTER-GENERAL, Washington, D. C., November 9, 1888.

SIR: I have the honor to submit the following estimates of appropriations for the service of this office for the fiscal year ending June 30, 1890 :

1. For manufacture of adhesive postage and special-delivery stamps .....	\$155, 874
2. For pay of agent and assistants to distribute stamps, and expenses of agency .....	9, 006
3. For manufacture of stamped envelopes, newspaper wrappers, and letter-sheets .....	852, 351
4. For pay of agents and assistants to distribute stamped envelopes, newspaper wrappers, and letter-sheets, and expenses of agency .....	16, 000
5. For manufacture of postal-cards .....	228, 781
6. For pay of agent and assistants to distribute postal-cards, and expenses of agency .....	7, 800
7. For registered-package, tag, official, and dead-letter envelopes .....	109, 745
8. For ship, steam-boat, and way letters .....	2, 500
9. For engraving, printing, and binding drafts and warrants .....	3, 000
10. For miscellaneous items .....	1, 000
Total .....	1, 386, 051

The following statements will explain the manner in which the above amounts are obtained:

## ADHESIVE POSTAGE-STAMPS.

It is assumed that the ratio of increase in expenditure for the manufacture of adhesive stamps during the current over the past fiscal year will be 8 per cent., which is somewhat less than the increase of postal revenue for the past over the preceding year. It is further assumed that for the year ending June 30, 1890, the ratio of increase over the current year will be 9 per cent., which may be a little more than the ratio of increase in the revenue, but which it is deemed prudent to allow. Upon this basis the amount of appropriation required is shown by the following calculation:

Expenditure for stamps issued during the fiscal year ending June 30, 1888 .....	\$132,411.00
Add 8 per cent. for increase .....	10,592.88
Gives estimated amount of expenditure for fiscal year ending June 30, 1889.....	143,003.88
Add 9 per cent for increase .....	12,870.35
Gives estimated cost for the fiscal year ending June 30, 1890 .....	155,874.23

The contract now in force for the manufacture of adhesive stamps will expire on the 30th of June, 1889; but although the rates fixed by it are very low, it is not expected that they will be increased under a new contract.

The current appropriation for adhesive stamps is \$144,148.

## STAMPED ENVELOPES, NEWSPAPER WRAPPERS, AND LETTER SHEETS.

Owing to the fact that greater fluctuations in the issues of stamped envelopes are more likely than in the case of adhesive stamps, a higher ratio of increase is taken as the basis of the estimate for these articles—9 per cent. being thought reasonable for the current over the past fiscal year, and 10 per cent. for the next over the current year. The amount of the appropriation required is therefore as follows:

Cost of stamped envelopes, newspaper wrappers, and letter sheets issued during the fiscal year ending June 30, 1888.....	\$710,884.93
Add 9 per cent. for increase .....	63,979.64
Gives estimated cost for the year ending June 30, 1889.....	774,864.57
Add 10 per cent. for increase .....	77,486.45
Gives estimated cost for the fiscal year ending June 30, 1890 .....	852,351.02

As the present contract for stamped envelopes will not expire until September 30, 1890, no change of prices will occur until then.

The appropriation for the present year is \$756,687.

## POSTAL CARDS.

As the ratio of increase in the issues of postal-cards for the past year has not been as great as that for either adhesive stamps or stamped envelopes, it is not thought necessary to take so high a ratio as the basis for the next appropriation. Seven per cent. increase for the current over the past, and the same for the next over the current year, is probably sufficient. At this rate the appropriation needed will be as follows:

Cost of postal-cards issued to postmasters and subagencies for the fiscal year ending June 30, 1888 .....	\$199,826.50
Add 7 per cent. for increase .....	13,987.85
Gives estimated sum required for year ending June 30, 1889 .....	213,814.35
Add 7 per cent. for increase as before.....	14,967.00
Gives estimated amount for year ending June 30, 1890 .....	228,781.35

The present contract for the manufacture of postal-cards will expire on the 30th of June, 1889; but it is not likely that the charges for manufacture will be increased under a new contract.

The appropriation for the present fiscal year is \$212,455.

## REGISTERED PACKAGE, TAG, OFFICIAL, AND DEAD-LETTER ENVELOPES.

The cost of the registered package, tag, official, and dead-letter envelopes, issued during the past year, was \$87,488.60, or \$2,475.11 more than for the previous fiscal year. A much greater increase may be expected for the current and the next fiscal year, both by reason of an increase of prices for the envelopes as shown by the new contract now in force, which will very likely be greater under the next contract, and by a probable

increase in the number of envelopes to be issued. It is hardly thought safe to estimate upon a lower basis of increase than 12 per cent. for each year.

The following calculation shows the amount required upon this basis :

Amount of expenditure for the fiscal year ending June 30, 1888.....	\$87, 488. 60
Add 12 per cent. for increase .....	10, 498. 63
.....	<hr/>
Gives amount required for current fiscal year.....	97, 987. 23
Add 12 per cent. for increase as before.....	11, 758. 47
.....	<hr/>
Gives amount required for year ending June 30, 1890 .....	109, 745. 70

The present appropriation is \$102,865.

The contract for the above-described envelopes is made yearly. The present contract will expire June 30, 1889.

#### POSTAGE-STAMP, STAMPED-ENVELOPE, AND POSTAL-CARD AGENCIES.

For conducting the business of the several agencies, it is estimated that the following sums will be required, viz :

For the postage-stamp agency.....	\$9, 000
For the stamped-envelope agency .....	16, 000
For the postal-card agency .....	7, 800

These amounts correspond with the appropriations for the present fiscal year, except in the case of the postage-stamp agency, the estimate for which is increased \$1,000. This is done for the purpose of increasing the pay of five employés, four of whom now get but \$720 a year and one but \$650. As these clerks are usefully and constantly employed on the same character of work as at the other agencies, it is thought to be but fair that they should have their pay increased to at least \$900 per annum, which would bring about something like equality.

#### SHIP, STEAMBOAT, AND WAY LETTERS.

Under the law, owners or masters of vessels not regularly engaged in the transportation of the mails are entitled to compensation on their arrival in port for letters brought and delivered by them to post-offices for transmission to destination. In every case the amount thus paid the owner or master of a vessel is collected by the postmaster at the office of delivery, in addition to the regular postage, which amount is therefore made good to the Government.

The appropriation for the current year is \$2,500, which is estimated to be sufficient for the coming year.

#### ENGRAVING, PRINTING, AND BINDING DRAFTS AND WARRANTS.

This appropriation is for the purchase of drafts and warrants used for payment to creditors, transfers of funds to and from postmasters, and collection of balances due the Department. The drafts and warrants are prepared and furnished by the Bureau of Engraving and Printing of the Treasury Department.

The expenditure for the fiscal year ending June 30, 1888, was \$2,445.50; but as the number of warrants and drafts used will be increased somewhat during the present and next fiscal years, I think it prudent to increase the usual estimate. For the year ending June 30, 1890, the amount required will be \$3,000.

#### MISCELLANEOUS.

The amount of appropriation for miscellaneous expenditures for this office is estimated at \$1,000, which is the amount that has been appropriated for several years past. The entire sum is never expended; but as many contingencies that can not be foreseen may at any time occur, it is deemed proper to ask for the usual amount.

The increase of the estimates for the next fiscal year over the expenditures for the last fiscal year is shown in the following tabular statement :

Items.	Expenditure year ending June 30, 1888.	Estimates of appropriation year ending June 30, 1890.	Increase of estimates for the year 1890 over expenditures for the year 1888.

No. 17.—*Calculations showing the number of letters, postal-cards, newspapers and periodicals, and pieces of third and fourth class matter, mailed at all the post-offices of the United States during the year ending June 30, 1888.*

## LETTERS.

Estimate based on the number of stamps issued:

The number of adhesive postage-stamps issued during the year, exclusive of postage-due, special-delivery, and newspaper and periodical stamps, is .....	1,867,173, 140
Deduct the number probably used to pay fees on registered matter (the actual number of private pieces of matter registered being 11,251,544) .....	13,000,000
Leaves as the number of adhesive stamps issued usable for postage on all classes of matter except newspapers and periodicals, for which special stamps are required ...	1,854,173, 140
Deduct again for cases where more than a single stamp was used to pay postage on a single piece of matter, say 2 per cent. of the whole number (see Note 1 below) .....	37,083, 462
Leaves as the number of adhesive stamps that may be said to represent separate pieces of mail matter .....	1,817,089, 678
To get at the number of letters represented by these figures, deduct the number of stamps probably used on third and fourth class matter (circulars, miscellaneous printed matter, and merchandise), say 20 per cent of the whole (see Note 2 below) ...	363,417, 935
Leaves the number of adhesive stamps that represent letters .....	1,453,671, 743
Add to this the number of stamped envelopes and letter-sheets issued, not including stamped newspaper wrappers and ungummed stamped envelopes used for circulars. ....	352,315, 750
Makes an aggregate of .....	1,805,987, 493
Deduct from this the probable number of stamps (adhesive and embossed) issued in excess of the number actually sold and used, say 2 per cent. (see Note 3 below) .....	36,119, 750
Net remainder representing an equivalent number of letters mailed during the year..	1,769,867, 743
Or, in round numbers, 1,769,800,000.	

The following estimate, based upon postmasters' returns of letters collected by carriers at all the free-delivery post-offices, produces substantially the same result as the foregoing, and therefore tends to establish its correctness:

Number of letters collected by carriers at all the free-delivery post-offices during the fiscal year ending June 30, 1888, as reported by postmasters .....	760,113, 963
Deduct for possible errors in the reports of postmasters, say 5 per cent. ....	38,005, 698
Leaves probably correct number collected by carriers .....	722,108, 265
Assuming that the carriers collect 80 per cent. of all letters mailed in the free-delivery cities, one-fourth of the above number should be added to it as representing the 20 per cent. mailed directly at the post-offices and stations. ....	180,527, 066
Total number of letters mailed at free-delivery offices .....	902,635, 331
As the free-delivery offices collect about 51 per cent. of the postal revenue derived from letters, it is assumed that the above represents that percentage of all the letters mailed in the whole country. Add, therefore, for the 49 per cent. mailed at other than free-delivery offices .....	867,236, 868
Total letters mailed at all post-offices during the year .....	1,769,872, 199
Or, in round numbers, 1,769,800,000.	

NOTE 1.—From statistics published in the Report of the Third Assistant Postmaster-General for 1886, it appears that the proportion of letters weighing over a single unit of weight, or 1 ounce each, was about  $1\frac{1}{2}$  per cent. of the entire number mailed during two given periods at twenty of the leading post-offices. Taking the whole country, the percentage would not be far from this. Two per cent., assumed in the above estimate, is not excessive.

NOTE 2.—From the statistics referred to in the preceding note, it would seem that of the entire number of pieces of matter mailed at twenty of the leading post-offices, about 40 per cent. were unsealed parcels and circulars. This is a well-known fact, however, that the great commercial cities of the country—making up these twenty offices—mail a vastly greater proportion of parcels and circulars than do the smaller places—so much greater that, massing the whole country, probably not 20 per cent. of the pieces of matter mailed, other than postal-cards and second-class matter, consists of parcels and circulars. This is indicated by the fact that of the entire number of stamped envelopes issued, not more than 19 per cent. are made up of newspaper wrappers and ungummed envelopes used for circulars, of which at least three-fourths go to the very large cities. It is further indicated by the fact that, as shown by exact statistics published in this report, the proportion of parcels to letters registered is about 1 to 9, or say 12 per cent. A further slight indication is afforded by the statistics of undelivered matter sent to the Dead Letter Office—only about 2 per cent. of such matter consisting of parcels. The assumption that 20 per cent. of the adhesive stamps issued are used for third and fourth class matter is about fair.

NOTE 3.—The difference between the value of stamps issued and stamps sold will not average 2 per cent. annually.

## POSTAL-CARDS.

Estimate based on the issue of cards:

Number of postal-cards actually issued to postmasters during the fiscal year ending June 30, 1888 .....	381,797, 500
Deduct 3 per cent. for excess of cards issued over the number sold and used (the percentage of difference being probably slightly greater than in the case of adhesive stamps and stamped envelopes) .....	11,453, 925
Leaves as the number which may be said to have been mailed during the year .....	370,343, 575
Or, in round numbers, 370,300,000.	

## NEWSPAPERS AND PERIODICALS (SECOND-CLASS MATTER).

## Estimate based on postmasters' returns:

The actual weight of newspapers and periodicals mailed by publishers and news agents during the fiscal year ending June 30, 1888, as shown by reports made to the Third Assistant Postmaster-General, and verified in his office, was 143,662,918 pounds, which, at the rate of six pieces to the pound, will give as the total number of pieces mailed.	861, 977, 502
Add for newspapers mailed free by publishers in the county of publication, say one-tenth of the above number of pounds, at the rate of 14 papers to the pound.	201, 128, 085
Gives as the total number mailed.	1, 063, 105, 587
Or, in round numbers, 1,063,100,000 pieces.	

## THIRD AND FOURTH CLASS MATTER (BOOKS, MERCHANDISE, ETC.)

## Estimate based on issues of stamps:

In the calculation showing the number of letters mailed it was estimated that there were used on third and fourth class matter during the fiscal year ending June 30, 1-88, adhesive postage-stamps to the number of 363,613,935. On an average of $1\frac{1}{4}$ stamps to every piece of such matter mailed the total number of pieces represented by this number of stamps would be.	290, 891, 148
Add to this the number of stamped newspaper wrappers and ungunned stamped envelopes for circulars issued, less 2 per cent. for excess of number issued over number sold and used.	82, 081, 860
Total, representing the number of pieces of third and fourth class matter mailed during the year.	372, 973, 008
Or, in round numbers, 372,900,000 pieces.	

## RECAPITULATION.

Letters mailed during the year.	1, 769, 800, 000
Postal-cards mailed.	370, 300, 000
Newspapers and periodicals mailed by publishers and news agents.	1, 063, 104, 000
Pieces of third and fourth class matter mailed.	372, 900, 000
Aggregate.	3, 576, 100, 000

## VERIFICATION OF ABOVE ESTIMATES.

The foregoing estimates are verified by their substantial agreement with the amount of revenue derived from the sale of postage-stamps, etc., as reported by the auditor. The following calculation will demonstrate this:

1,769,800,000 letters mailed, averaging in the amount of postage, say, $2\frac{1}{2}$ cents apiece*.	\$36, 280, 909
1,063,100,000 newspapers, etc., postage on which, from verified reports, was	1, 436, 620
370,300,000 postal-cards, amounting to	3, 703, 000
372,900,000 pieces of third and fourth class matter, postage on which, at an average of $1\frac{1}{4}$ cents each,† was	6, 711, 400
Add for value of stamps used to pay registry fees‡.	1, 125, 154
Add for value of special-delivery stamps,‡ say	125, 000
Add for value of postage-due stamps used,‡ say	175, 000
Total.	49, 557, 083
Amount realized during the year from the sale of stamps, as reported by the auditor, which substantially agrees with the above.	49, 544, 272

No. 18.—*Abstract of laws relating to the postal service in the United States from the year 1639 to the present time.*

## COLONIAL PERIOD.

*Massachusetts.—Order of the general court, 1639.*—"It is ordered that notice be given that Richard Fairbanks his house in Boston is the place appointed for all letters which are brought from beyond the seas, or are to be sent thither to be left with him, and he is to take care that they are to be delivered or sent according to the direction. And he is allowed for every letter a penny, and must answer all miscarriages through his own neglect in this kind."

\* In estimating the average postage to a letter, allowance must be made for the fact that a large number, known as drop letters, are mailed at other than free-delivery offices at only a cent apiece.

† Out of the total number of pieces of matter of these classes mailed, it must be remembered that over 82,000,000, as shown in a preceding calculation, are positively known to be only 1 cent each, consisting of 1-cent newspaper wrappers and ungunned 1-cent envelopes.

‡ These items all enter into the auditor's aggregate of stamps sold.

*Massachusetts.*—*May, 1677.*—Mr. John Hayward appointed by the court “to take in and convey letters according to their direction.”

*Virginia.*—*Act of assembly, March 13, 1657.*—“That all letters superscribed for the public service shall be immediately conveyed from plantation to plantation to the place and person directed, under a penalty of 1 hogshead of tobacco for each default; and if any extraordinary charge arise thereby, the commissioners of each county are hereby authorized to judge thereof and levy payment of the same. These superscriptions are to be signed by the governor, council, or secretary, or any commissioner of the quorum, or any of the committee appointed for the militia.”

*Virginia.*—*Act of assembly, March 23, 1661.*—Provides that all letters superscribed for the service of his majesty or the public service shall be immediately conveyed from plantation to plantation to the place and person directed under a penalty of 350 pounds of tobacco for each default. “If there is any person in the family where the said letters come as can write, such person is required to indorse the day and hour he received them, that the neglect or contempt of any person stopping them may be better known and punished accordingly.”

*Virginia.*—*Act of assembly, March 16, 1692.*—For encouraging the erection of a post-office under letters patent granted to Thomas Neale, dated February 17, 1692. (This act was conditional, and was never carried into effect.)

*New York.*—1672.—Establishment of a “post to go monthly from New York to Boston;” postage to be prepaid.

*New York.*—*December 6, 1702.*—The Postmaster-General ordered that the post between Boston and New York should set out once a fortnight during the months of December, January, and February.

*Pennsylvania.*—*Act of provincial assembly, March, 1583.*—“Every justice of the peace, sheriff, or constable within the respective counties of this province and territories thereof, to whose hands or knowledge any letter or letters shall come directed to or from the governor, shall dispatch them within three hours at the furthest after the receipt or knowledge thereof, to the next sheriff or constable, and so forwards as the letters direct, upon the penalty of 20 shillings for every hour’s delay. And in such cases, all justices of the peace, sheriffs, or constables are herewith empowered to press either man or horse for that purpose, allowing for a horse or man 2 pence a mile, to be paid out of the public stock.”

*Pennsylvania.*—*Act of general assembly, May, 1693.*—“To the end that mutual correspondences may be maintained, and that letters may speedily and safely be dispatched from place to place: Be it enacted by the authority aforesaid, that a general post-office may be erected by Andrew Hamilton, at Philadelphia, from whence all letters and packets may be with all expedition sent into any of the parts of New England and other the adjacent colonies in these parts of America, at which said office all returns and answers may be received.

“And be it further enacted by the authority aforesaid, that it shall be lawful for the said Andrew Hamilton, or some other as shall be appointed by the King, to be Postmaster-General in these parts, and his deputy or deputies in that office, to demand, receive, and take for the postage of all such letters so by him conveyed or sent by post, as follows:

“All foreign letters from Europe, the West Indies, or any part beyond the seas, 2 pence each single letter which is to be accounted such, although it contain bills of lading, invoices, gazettes, etc., and for each packet of letters, 4 pence. And if packets of letters lie at the office unclaimed for the space of forty-eight hours, the postmasters then sending them forthwith to the respective houses of the persons to whom they are directed, 1 penny more for every such letter or packet. And for all foreign letters outward bound there shall be delivered into the post-office 2 pence each letter or packet. The port or inland letters to or from New York to Philadelphia, 4 pence half penny; to or from Philadelphia to Connecticut, 9 pence; to or from Philadelphia to Rhode Island, 12 pence; to or from Philadelphia to Boston, 15 pence; to or from Philadelphia to the eastern parts of New England beyond Boston, 19 pence; to or from Philadelphia to Lewis, Maryland, and Virginia, 9 pence; to and from every place within 80 miles of Philadelphia, 4½ pence. All letters belonging to the public to be received and dispatched free of all charges, and the post to pass ferriage free at all ferries within this province, town of New Castle, and country depending. Provided always, that the said Andrew Hamilton shall within three months next ensuing prefix certain days of his setting forth and return, and shall continue constant posts to pass from Philadelphia to New York, and from Philadelphia to New Castle.”

*Pennsylvania.*—*Act of assembly, May, 1697.*—Increasing the rates of postage, and paying the postmaster £20 a year for three years.

*South Carolina.*—*Ordinance ratified September 10, 1702.*—Whereas several foreign letters are imported into this part of the province, therefore, for the maintenance of mutual correspondence and prevention of many inconveniences that may happen from miscarriages of the same, and that an office may be managed so that safe dispatch

may be had, which is most likely to be effected by erecting one general post-office for that purpose:

Be it therefore enacted by his Excellency John Granvill, esq., palatine, etc., that every master of a ship shall deliver all letters in his custody to Mr. Edward Bourne, and to no other person, and he is required to make an exact list of such letters which shall be fixed in some public place in the house of the said Bourne, there to remain thirty days; and on delivery of each letter he shall write opposite the name of the person addressed the name of the person to whom the letter is delivered; and the said Bourne shall receive for each and every packet or letter received and delivered one-half royal and no more. If he refuses to perform all or every of these particulars, he shall forfeit for each offense the sum of 40 shillings. And the said Bourne is hereby appointed postmaster to receive all such letters as aforesaid, and no other person whatsoever, anything in the act for raising a public store of powder for the defense of this province, ratified October 8, 1695, contained to the contrary notwithstanding. (Repealed by act of September 17, 1703.)

*South Carolina.*—*Ordinance ratified March 28, 1778.*—An act for the erecting of a post-office within the State of South Carolina.

Regulations for the post-offices within the State, in addition to such as are already made by the honorable Continental Congress:

As soon as public offices are established within this State commanders of vessels must deposit all letters addressed to persons within this State, or to any of the United States of America, in the nearest post-office. The master of a vessel delivering such letters shall be entitled to receive from the deputy postmaster of such office 1 shilling and 3 pence currency for every letter so delivered, and the person addressed shall pay to the deputy postmaster 2 shillings and 6 pence for each letter. If letters are not called for within twenty-four hours, the postmaster of the town shall send the letter to the person addressed, and may demand 1 shilling and 3 pence for his trouble more than if the letter were delivered at the post-office. If the addressee can not be found, the postmaster shall advertise it if not called for within twenty days, and shall be allowed the expense of advertising. The postmaster shall keep his office open from 9 until 1, and from 5 to 7, excepting Sundays in the morning. Postmasters are exempt from militia duty. Post riders shall have preference in crossing ferries. As soon as post-offices are established in this State by the Continental Congress, or the laws of the State, it shall not be lawful for any person to ride post on any public post-road for the carriage of more than ten letters on any private account, under a penalty of £20.

*Act of Parliament, 9th Queen Anne (1710), chapter x.*—Provides that a postmaster-general shall be appointed for North America from and after June 11, 1711; that a chief letter office be erected at New York; and establishes rates of postage as follows:

All letters and packets from London to New York, in North America, and thence to London: Single, 1 shilling; double, 2 shillings; treble, 3 shillings; ounce, 4 shillings.

All letters, etc., from any part of the West Indies to New York: Single, 4 pence; double, 8 pence; treble, 1 shilling; ounce, 1 shilling and 4 pence.

All letters from New York to Charleston, the chief office in North and South Carolina, and from Charleston to New York: Single, 1 shilling 6 pence; double, 3 shillings; treble, 4 shillings 6 pence; ounce, 6 shillings.

All letters, etc., from Charleston aforesaid, to any place not exceeding 60 English miles: Single, 4 pence; double, 8 pence; treble, 1 shilling; ounce, 1 shilling 4 pence.

All letters, etc., from Charleston aforesaid, to any place not exceeding 100 English miles: Single, 6 pence; double, 1 shilling; treble, 1 shilling 6 pence; ounce, 2 shillings.

Places where posts are not yet settled to pay according to these rates.

The charge for every person riding post to be 3 pence for every horse-hire or postage for every English mile, and 4 pence for the person riding as guide for every stage; each person being entitled to carry a bundle of goods weighing less than 80 pounds free, the same "to be laid on the horse rid by the guide."

Only the postmaster-general and his deputies to provide horses or furniture for persons riding post.

If the postmaster fail to furnish horses, etc., to any person riding post within half an hour after demand, conveyance may be obtained elsewhere, and the postmaster shall forfeit the sum of £5.

Debts for postage not exceeding £5 are to be recovered as small tithes are.

*Act of Parliament, 4th George III (1763), chapter xiv.*—Allows letters on the public service sent to and from the public officials of the higher ranks to pass through the mails free of postage; and empowers the postmaster-general to authorize certain persons to indorse upon such letters and packets the fact that they are on public

business; printed votes, proceedings in Parliament, and newspapers sent without covers, or in covers open at the side, to go free.

*Act of Parliament, 5th George III (1765), chapter xxx.*—Repeals the act of 1710, fixing the rates of postage of letters between London and the British dominions in America and places within the said dominions, and establishes the following rates to take effect October 10, 1765:

For every single letter over 350 miles, and not exceeding 450 miles, 22 cents.

For every single letter over 450 miles, 25 cents.

For every double letter, double the said rates.

For every triple letter, triple the said rates.

For every packet weighing 1 ounce avoirdupois, to pay at the rate of four single letters for each ounce, and in that proportion for any greater weight.

*Act February 20, 1792, section 10.*—Letters and packets passing by sea to and from the United States, or from one port to another therein, in packet-boats or vessels, the property of or provided by the United States, shall be rated and charged as follows:

For every single letter, 8 cents.

For every double letter, 16 cents.

For every triple letter or packet, 24 cents.

For every letter or packet brought into the United States, or carried from one port therein to another by sea, in any private ship or vessel, 4 cents, if delivered at the place where the same shall arrive; and if directed to be delivered at any other place, with the addition of the like postage as on domestic letters.

*Act February 20, 1792, section 13.*—The postmasters to whom such letters may be delivered shall pay to the master, commander, or other person delivering the same, except the commanders of foreign packets, 2 cents for every such letter or packet.

*Act February 20, 1792, section 19.*—Letters and packets to be received and conveyed by post, free of postage, under certain restrictions:

All letters or packets to or from the President of the United States and the Vice-President of the United States.

All letters or packets, not exceeding 2 ounces in weight, to or from Senators, Representatives, Secretary of the Senate, and Clerk of the House of Representatives, during their actual attendance in any session of Congress and twenty days after such session.

All letters to or from the Secretary of the Treasury, Assistant Secretary of the Treasury, Comptroller, Register, Auditor, Treasurer, Secretary of State, Secretary of War, commissioners for settling accounts between the United States and individual States, Postmaster-General, and Assistant Postmaster-General.

*Provided,* No person shall frank or inclose any letter or packet not his own; but public letters or packets, from the Treasury Department, may be franked by the Secretary, Assistant Secretary, Comptroller, Register, Auditor, or Treasurer.

Each person shall deliver to post-office every letter or packet inclosed to him for other persons, that postage may be charged.

*Act February 20, 1792, section 21.*—Printers of newspapers authorized to send one

*Act March 3, 1863, section 21.*—Fixes the maximum standard weight for the single rate of letter-postage at one-half ounce avoirdupois.

*Act March 3, 1863, section 22.*—Fixes the rate of postage on domestic letters not exceeding one-half ounce in weight at 3 cents, and 3 cents additional for each additional half-ounce or fraction thereof, to be prepaid by postage-stamps affixed.

*This was the first law which established a uniform rate of postage on letters regardless of distance to which matter was to be transmitted.*

*Act March 3, 1863, section 23.*—Fixes the rate of postage on drop-letters not exceeding one-half ounce in weight at 2 cents, and 2 cents added for each additional half-ounce or fraction thereof, to be prepaid by postage-stamps affixed; "but no extra postage or carriers' fee shall hereafter be charged or collected upon letters delivered by carriers, nor upon letters collected by them for mailing or delivery."

*Act March 3, 1863, section 24.*—Mailable matter wholly or partly in writing, or so marked as to convey further information than is conveyed by the original print in case of printed matter, or sent in violation of law or regulations touching the inclosure of matter which may be sent at less than letter rates, and all matter on which no different rate is provided by law, subject to letter postage: *Provided*, That book-manuscript and corrected proof, passing between author and publisher, may pass at the rate of printed matter: *And provided*, That the publishers of newspapers and periodicals may print or write upon their publications sent to subscribers the address and the date when the subscription expires, and may inclose receipt for payment and bills for subscription.

*Act March 3, 1863, section 25.*—All matter not enumerated as mailable, and to which no specific rates of postage are assigned, subject to letter postage.

*Act March 3, 1863, section 26.*—Double rates of postage to be collected on delivery on any matter on which postage is required to be prepaid at the mailing office: *Provided*, Such matter reaches its destination without such prepayment.

*Act March 3, 1863, section 27.*—Postmaster-General authorized to provide for transmitting unpaid and duly-certified letters of soldiers, sailors, and marines, and all other letters which, from accident, appear to have been deposited without prepayment of postage; but in all cases of letters not prepaid, except certified soldiers' and naval letters, the same shall be charged with double rates of postage, to be collected on delivery.

*Act March 3, 1863, section 28.*—*That when any writer of a letter on which the postage is prepaid shall indorse in writing or in print thereon upon the outside thereof his name and address with the request that the same be returned to him if not called for or delivered within any number of days (not to exceed 30 days), any such letter shall not be advertised nor treated as a dead letter, but shall be returned direct, etc.*

*By virtue of this law special-request envelopes were subsequently introduced.*

*Act March 3, 1863, section 29.*—Postage on return dead letters, not registered as valuable, 3 cents for the single rate; registered as valuable, double rates.

*Act March 3, 1863, section 30.*—Letters may be forwarded from office of destination to any other office, with additional charge of postage therefor.

*Act March 3, 1863, section 31.*—Postmaster-General authorized to pay 2 cents each for all letters conveyed in any vessel not employed in carrying the mail from one place to another in the United States, or from any foreign port to any port within the United States and deposited in the post-office at the port of arrival. If for delivery within the United States, double rates of postage.

*Act March 3, 1863, section 32.*—Provides that fee on registered letters shall not exceed 20 cents.

*Act March 3, 1863, section 33.*—Fixes the maximum standard rate for the single rate of postage on printed matter, and also on miscellaneous matter, at 4 ounces avoirdupois, subject to the exception in the next section.

*Act March 3, 1863, section 34.*—The rate of postage on transient matter of the second class, and on miscellaneous matter of the third class (except circulars and books), shall be 2 cents for each 4 ounces or fraction thereof on one package to one address, to be prepaid by stamps affixed; double these rates for books. Unsealed circulars, not exceeding three in number, 2 cents, adding one rate for three additional circulars or less number to one address.

*Act March 3, 1863, section 35.*—Postage on matter of the second class, issued once a week or more frequently, from a known office of publication, and sent to regular subscribers, shall be as follows: For newspapers and other periodical publications, not exceeding 4 ounces, and passing through the mails or post-offices of the United States, the rate for each quarter shall be, for publications issued once a week, 5 cents; twice a week, 10 cents; three times a week, 15 cents; six times a week, 30 cents; seven times a week, 35 cents; and in that proportion, adding one rate for each issue more frequent than once a week. For weight exceeding 4 ounces and not exceeding 8 ounces, an additional rate, and an additional rate for each additional 4 ounces or fraction thereof; postage to be prepaid for not less than one quarter nor more than one year, at either the office of mailing or delivery, at the option of the subscriber.

Weekly newspapers, to each subscriber within the county where the same are printed and published, one copy free of postage.

*Act March 3, 1863, section 36.*—Postage on mailable matter of the second class, issued less frequently than once a week, from a known office of publication, and sent to subscribers, shall be as follows: Upon newspapers, magazines, and other periodical publications, not exceeding 4 ounces, passing through the mails or post-offices of the United States, the rate for each such paper or periodical shall be 1 cent, and an additional rate of 1 cent for each additional 4 ounces or fraction thereof: *Provided*, That the Postmaster-General may provide for the transportation of *small* newspapers in packages at the same rate by weight when sent to one address; postage must be prepaid at office of mailing or delivery, at option of subscriber, for not less than one quarter nor more than one year.

*Act March 3, 1863, section 37.*—Publishers may inclose in their publications to subscribers bills for subscription, and may write or print on their publications or their wrappers name and address of subscribers and the date when subscription expires; but any other inclosure or addition in writing or in print shall subject the same to letter postage.

*Act March 3, 1863, section 39.*—Postmaster-General authorized to prescribe the manner of wrapping all matter not charged with letter postage nor lawfully franked; if not so wrapped and secured, the same shall be subject to letter postage.

No. 20.—*Contract for furnishing registered-package, tag, official, and dead-letter envelopes during the fiscal year ending June 30, 1889.*

This contract, made this 14th day of May, one thousand eight hundred and eighty-eight, and executed in quadruplicate, between the United States of America, acting by Don M. Dickinson, Postmaster-General, of the first part, and the Plimpton Manufacturing Company (a corporation duly created, organized, and doing business under and by virtue of the laws of the State of Connecticut), by L. B. Plimpton, its president, and the Morgan Envelope Company (also a corporation duly created, organized, and doing business under and by virtue of the laws of the State of Massachusetts), by Elisha Morgan, its president, as principals (said corporations being jointly engaged in the manufacture of envelopes), and Henry S. Dickinson, of Springfield, Mass., and M. S. Chapman, of Hartford Conn., as sureties, of the second part, witnesseth :

Whereas the Postmaster-General, in compliance with law, caused an advertisement, bearing date the 9th day of March, 1888, to be published in certain newspapers in the United States, inviting proposals for furnishing, in accordance with the specifications prepared under his directions, such registered-package, tag, official, and dead-letter envelopes as might be ordered for the use of the Department, postmasters, and the postal service during the fiscal year beginning on the 1st day of July, 1888, a printed copy of which advertisement and specifications is hereunto annexed and made a part hereof, as follows :

“PROPOSALS FOR REGISTERED-PACKAGE, TAG, OFFICIAL, AND DEAD-LETTER ENVELOPES.

[Advertisement.]

“POST-OFFICE DEPARTMENT,

“Washington, D. C., March 9, 1888.

“Sealed proposals will be received at this Department until 12 m. on Thursday, the 12th day of April, 1888, for furnishing such registered-package, tag, official, and dead-letter envelopes as may be ordered for the use of the Department, postmasters, and the postal service during the fiscal year commencing on the 1st day of July, 1888.

“Samples of the envelopes for which proposals are invited, showing the different sizes and qualities required, with blank forms of bids, and specifications giving full information, may be had on application to the Third Assistant Postmaster-General, Washington, D. C.

“DON M. DICKINSON,  
“Postmaster-General.

“SPECIFICATIONS FOR FURNISHING REGISTERED-PACKAGE, TAG, OFFICIAL, AND DEAD-LETTER ENVELOPES.

“DESIGNATION AND SIZES OF ENVELOPES.

“The designation and sizes of the envelopes referred to in the foregoing advertisement are as follows :

No. 2.— $3\frac{3}{8}$ by $6\frac{3}{8}$ inches.	No. 7.— $5$ by $10\frac{3}{8}$ inches.	No. 12.— $7\frac{3}{8}$ by $10$ inches.
No. 3.— $3\frac{7}{8}$ by $8\frac{7}{8}$ inches.	No. 8.— $3\frac{3}{8}$ by $5\frac{3}{8}$ inches.	No. 13.— $7\frac{3}{8}$ by $11$ inches.
No. 4.— $4\frac{3}{8}$ by $6\frac{3}{8}$ inches.	No. 9.— $5\frac{3}{8}$ by $7\frac{3}{8}$ inches.	No. 14.— $9$ by $13\frac{3}{8}$ inches.
No. 5.— $4\frac{3}{8}$ by $9\frac{3}{8}$ inches.	No. 10.— $6$ by $9$ inches.	No. 15.— $12$ by $15$ inches.

“Sizes may be slightly larger than called for above, but no smaller.

“COMPOSITION AND QUALITY OF PAPER.

“The paper from which the Nos. 1, 2, 3, and 4 envelopes are manufactured must be composed in the proportion of 95 per cent. of jute butts and 5 per cent. of South Carolina clay (excluding all other material except the necessary coloring matter), and must weigh  $34\frac{3}{8}$  pounds per ream of 500 sheets measuring  $22\frac{3}{8}$  by 30 inches, or in that proportion. In the process of manufacture the jute butts must be washed four hours in the washing-engines and beaten eight hours in the beating-engines, and the stock passed through a Jordan engine. The paper must be rosin-sized in the engine and made on a Fourdrinier machine. It must also be well calendered and finished, and the same in color, quality, tensile strength, and in all other respects, as the paper in the sample envelopes furnished to bidders and to be made a part of the contract.

“The paper from which the Nos. 5, 6, 7, 9, 10, 11, 12, 13, 14, and 15 envelopes are manufactured must be composed in the proportion of 30 per cent. of No. 1 rope manila, 30

per cent. of No. 2 rope (consisting of about equal parts of manila, hemp, and sisal), 30 per cent of jute butts, and 10 per cent. of South Carolina clay, excluding all other material except the necessary coloring matter, and must weigh 47 pounds per ream of 500 sheets measuring  $22\frac{1}{2}$  by 30 inches, or in that proportion. In the process of manufacture the rope and jute butts must be washed six hours in the washing-engines and beaten nine hours in the beating-engines, and the ingredients passed through a Jordan engine. The paper must be rosin-sized in the engine, and made on a Four-drinier machine. It must be well calendered and finished, and the same in color, quality, tensile strength, and in all other respects, as the sample envelopes furnished to bidders and to be made a part of the contract.

"The paper from which the tag envelopes for registered packages (No. 8) are to be manufactured must be composed wholly of jute butts (except the necessary coloring matter), and must weigh 90 pounds per ream of 500 sheets measuring  $22\frac{1}{2}$  by 30 inches, or in that proportion. In the process of manufacture the jute must be washed four hours in the washing-engines, and beaten five hours in the beating-engines and passed through a Jordan engine. The paper must be rosin-sized in the engine. It must be well calendered and finished, and the same in color, quality, tensile strength, and in all other respects, as the sample envelopes furnished to bidders and to be made part of the contract.

"All or any of the different papers used may be required to be water-marked with such designs as may be approved by the Postmaster-General. All paper furnished or used shall be subject to the supervision and approval of the Postmaster-General or his authorized agent before and after being manufactured into envelopes.

"The Postmaster-General shall have the right to cause inspection to be made, when and in such manner as he may desire it, of the process of manufacturing the paper in all its several stages, and of stationing an agent, for the purpose of inspection, at the mill or mills where the paper is made; in which latter case the contractor will be required to furnish such agent with a properly furnished room in the mill without charge, and give him every needful facility for carrying out his duty.

"Water-marked paper for any of the envelopes that may be spoiled in process of manufacture, or condemned as unfit for use, shall not be used or sold by the contractor in its manufactured state, but shall be reduced to pulp, or otherwise destroyed, without cost to the Government.

"Such spoiled or rejected paper shall not be made over for use in registered package or official envelopes.

#### "STYLE OF MANUFACTURE.

"The envelopes must be made in the most thorough and workmanlike manner, after the styles and of the cuts shown by the samples furnished to bidders; the joints to be well and securely fastened and with such quality of gum, free from offensive odor, as will secure perfect and permanent adhesion of the paper, and the flaps to be thoroughly gummed with the same or other equally suitable material. The envelopes shall be in all respects subject to the approval of the Postmaster-General or his duly authorized agent.

#### "PRINTING.

"The envelopes must bear such printing as the Postmaster-General may direct, and the registered package and tag envelopes (Nos. 7 and 8) will be required to be printed in vermilion or some other approved brilliant color, equal to that on the sample. All of the other envelopes must have printed on them the name of the Department, the words "Official Business," and the penalty provided by law for their misuse, besides such other printing as the Postmaster-General may at any time direct. When ordered in separate quantities of 500 of the Nos. 1, 2, and 4 sizes, or of 250 of the Nos. 3, 5, and 6 sizes, or in larger quantities, for the use of postmasters, they will, in addition to the foregoing printing, bear also the name of the post-office for whose use they are intended; when ordered in less quantities, they will bear, in addition to the other printing, the words, "Post-Office at," with a blank space for the name of the post-office to be written in. The printing on the samples is intended to show in a general way some of the forms that will be required.

#### "PACKING, ETC.

"The envelopes must be banded in parcels of twenty-five, packed in strong paste-board or straw boxes (not inferior to No. 50 unlined western straw-board), securely bound with linen or cotton cloth on the corners and edges, and of such weight, quality, and construction as shall be approved by the Postmaster-General; and when intended to be sent direct to postmasters, each box shall contain not less than 100 of the Nos. 7 and 8 sizes and not less than 250 of the Nos. 1, 2, 3, 4, 5, and 6, or larger quantities as may be ordered for the principal post-offices; the boxes to be well and se-

curely wrapped in strong manila paper and properly sealed, so as to bear safe transportation by mail. But when required to be sent to the Post-Office Department, each box may contain not less than 500 of any one size and style of printing, in which case the wrapping may be dispensed with, in the discretion of the Postmaster-General.

"When 4,000 or more envelopes of the Nos. 1, 2, 3, and 4, and 2,000 or more of the other numbers, are required to fill the order of a postmaster, or when larger lots of any kind are ordered to be sent to the Department, they must be packed in strong wooden cases and properly addressed; no case shall contain more than 25,000 of the Nos. 1, 2, 3, and 4, nor more than 10,000 of the other sizes; but when less than 4,000 are required to be sent to a postmaster, a proper label of direction must be placed on each package, all of which shall be done and furnished by the contractor without additional charge.

"The sizes designated as Nos. 1, 3, 4, 5, 6, 7, and 8 are used mainly by postmasters, and sizes Nos. 2, 9, 10, 11, 12, 13, 14, and 15, mainly in the Post-Office Department; but the right is reserved to order any or all of the different sizes for use of the Post-Office Department, of postmasters, and of postal officers generally.

#### "STOCK ON HAND.

"The contractor shall at all times keep on hand a stock of the several kinds of envelopes sufficient to promptly meet all orders of the Department, and to provide against any and all contingencies that may be likely to occur during the existence of the contract; and said envelopes shall be held subject to the control of the Postmaster-General or his duly authorized agent or agents; and the Postmaster-General shall have the right to require the contractor, at any time during the existence of the contract, to provide an extra quantity of envelopes, not exceeding a supply for three months.

"The Postmaster-General reserves the right to impose a fine upon the contractor, in such sum as he may deem proper, to be deducted in the settlement of accounts, for the failure to have on hand at any time a sufficient supply of envelopes with which to promptly meet all just requirements of the Department.

"In the event that the exigencies of the public service shall require the acceptance by the Department of any envelopes which, in the opinion of the Postmaster-General or of his duly authorized agent, are inferior in any respect to the requirements of the contract, the right is reserved to the Postmaster-General absolutely to fix the price thereof, and to pay for such inferior envelopes any compensation less than the regular price fixed by the contract that may seem to him just and reasonable under all the circumstances, which shall be a complete discharge of all liability on the part of the Government for such envelopes.

"On failure to promptly furnish any article or articles specified in the contract, the Postmaster-General reserves the right to purchase such article or articles in the open market; and if a greater price be paid than that prescribed by the contract for like articles, the difference shall be charged to the contractor. Failure to furnish any articles within a reasonable time after the same shall have been ordered may be regarded by the Postmaster-General as a sufficient cause for the annulment of the contract.

#### "AGENT—OFFICE ROOM—INSPECTION.

"An agent of the Department will have supervision of the manufacture, storage, and issue of the envelopes, and he shall, at all times, have full and free access to the apartments where they (or anything entering into their construction) are manufactured and stored, for the purpose of inspecting the same.

"The contractor shall furnish the resident agent of the Department and his clerks suitable and properly furnished office rooms connected with the premises on which the envelopes are made, for the transaction of the business of the agency, without cost to the Government; also a properly furnished room for the use of the post office in mailing the envelopes, if the same should be required by the Postmaster-General.

"The contractor, his employes and agents, shall conform to such regulations as the Department may from time to time adopt for the security of the Government in any respect.

#### "DELIVERY.

"The contractor must be ready to commence the delivery of the envelopes on the 1st day of July, 1888, when the contract term begins; and thereafter they must be promptly furnished and delivered, complete in all respects, in such quantities as may be required to fill the orders of the Department. The envelopes may be required to be delivered in separate packages, as above provided for, at the post-office or at the agency at the place where the same are manufactured, or at the nearest adjacent large

post-office with adequate facilities for handling and mailing the envelopes, or at a railway post-office, or at the Post-Office Department, at Washington, D. C., in the discretion of the Postmaster-General; or deliveries may be required to be made at any of the places mentioned in the foregoing, and also at the Post-Office Department, at Washington, D. C., as may be directed by the Postmaster-General.

“STOCK ON HAND AT EXPIRATION OF CONTRACT.

“The contractor may be required, in the discretion of the Postmaster-General, to continue the issue until the same shall be exhausted, of the envelopes that may remain on hand at the expiration of the contract term, at the prices and upon the conditions prevailing while the contract is in force. The right is also reserved to the Postmaster-General to authorize the issue by the present contractors of such envelopes as may remain in their hands at the close of their contract term, and the new contractor shall not be entitled to damages on account of such issues during the new contract term.

“AWARD.

“The contract will be awarded on the basis of the probable number of each of the several kinds of envelopes to be required, as determined by the issues for the year ended December 31, 1887, as follows:

No. 1 .....	18, 011, 700	No. 6 .....	1, 737, 500	No. 11 .....	7, 500
No. 2 .....	2, 647, 500	No. 7 .....	11, 993, 150	No. 12 .....	15, 000
No. 3 .....	11, 129, 450	No. 8 .....	1, 447, 400	No. 13 .....	15, 000
No. 4 .....	305, 250	No. 9 .....	1, 000	No. 14 .....	7, 750
No. 5 .....	1, 675, 500	No. 10 .....	5, 000	No. 15 .....	250

“Bids must be made separately for each item in the foregoing list, the bidders stating in their proposals the price per thousand envelopes, including everything to be done or furnished as set forth in these specifications; and the contract may be awarded, in the discretion of the Postmaster-General, item by item to different bidders, or as a whole to the lowest responsible bidder in the aggregate, the amount of a bid to be ascertained by extending the above issues at the prices bid respectively, and then aggregating the amounts of the several items.

“It must be understood, however, that the proposals made under this advertisement and these specifications shall impose the obligation to furnish at the prices bid all the envelopes ordered by the Department during the contract term, without reference to the numbers above stated, subject to the provision as to those on hand at the termination of the present contract. Should the use of any of the above kinds of envelopes be discontinued during the contract term, the contractor will not be entitled to any compensation for damages on account of such discontinuance.

“Each bid must include all the different items designated in the foregoing.

“The contractor will not be required to pay royalty on envelopes manufactured from samples furnished by the Department.

“PROPOSALS—AGREEMENT—BOND.

“Each proposal must be signed by the person, partnership, or corporation making it, and when made by a partnership the name of each partner thereof must be disclosed; and if the proposal be made by a corporation, the Department must be informed of its name, place of business, object of organization, and business, and the names of the officer authorized to bind it by contract; and it must be accompanied with a guaranty, signed by at least two responsible guarantors, that the bidder shall, within ten days after being called upon to do so, execute a contract, with at least two good and sufficient sureties of the character and to be certified as hereinafter required, to furnish promptly, and in quantities as ordered, the article or articles to be furnished by him, and faithfully and diligently to keep, perform, and abide by each and every of the requirements, provisions, and terms of such contract, and these specifications to be thereto annexed, the responsibility and sufficiency of the signers to such guaranty to be certified to by the postmaster or United States district attorney where the bidder resides; and by such contract the contractor and his sureties shall covenant and agree that in case the said contractor shall fail to do or perform all or any of the covenants, stipulations, and agreements of said contract on the part of the said contractor to be performed, as therein set forth, the said contractor and his sureties shall forfeit and pay to the United States of America the sum of twenty thousand dollars, for which full and absolute sum the said contractor and his sureties shall be jointly and severally liable, as fixed, settled, and liquidated damages, and not as a penalty, to be sued for in the name of the United States. Such sureties shall justify their responsibility by affidavit, showing that they severally own and possess property of the clear value in the aggregate of \$40,000 over and above all debts and liabilities and all property by law

exempt from execution, to be sworn to before a district or circuit judge of the United States and to be approved by him.

"If the bidder to whom the first award may be made should fail to enter into a contract, as herein provided, then the award may be annulled, and the contract let to another or other bidders under these specifications, and so on until the required contract is executed; and such next accepted bidder shall be required to fulfill every stipulation embraced herein as if he were the original party to whom the contract was awarded.

"The contract will also provide that if at any time during its continuance the sureties, or either of them, shall die, or become irresponsible, the Postmaster-General shall have the right to require additional and sufficient sureties, which the contractor shall furnish to the acceptance of the Postmaster-General within ten days after notice; and in default thereof, the contract may be annulled.

"The contract may be required to be executed in quadruplicate.

#### "RESERVATIONS.

"The Postmaster-General reserves the right to reject any and all bids if, in his judgment, the interest of the Government shall require it; also the right to annul the contract if, in his opinion, there shall be a failure at any time to perform faithfully any of its stipulations, or in case of a willful attempt to impose upon the Department envelopes inferior to those required by the contract.

#### "PAYMENTS.

"Payments for envelopes actually issued and delivered to postmasters will be made monthly, after proper examination and verification of accounts, and promptly upon the fulfillment of orders for envelopes sent to the Post-Office Department. Accounts shall be kept and rendered in such manner and form as the Postmaster-General may prescribe.

"Payments may be withheld by the Postmaster-General if it shall appear to his satisfaction that the contract has not been complied with in any particular.

#### "CONTRACT NOT ASSIGNABLE.

"The contract can not, in any case, be lawfully transferred or assigned.

#### "EXTENSION.

"Should the interest of the Government require, the contract may be extended beyond the time named, not exceeding three months, by order of the Postmaster-General, and the contract prices and all conditions herein set forth shall govern in such extended contract.

#### "BLANK FORMS—SAMPLES—ADDRESS OF PROPOSALS.

"Blank forms for bids, with samples attached, showing sizes, style of manufacture and quality of the paper, will be furnished upon application; and all proposals must be made upon these blank forms, securely enveloped and sealed, marked on the envelope "Proposals for Registered Package and Official Envelopes," and addressed to the Third Assistant Postmaster-General, Washington, D. C.

"DON M. DICKINSON,

*"Postmaster-General.*

"POST-OFFICE DEPARTMENT,

*"Washington, D. C., March 9, 1888."*

Whereas upon the opening in public on the 12th day of April, 1888, of the proposals received in answer to said advertisement of March 9th, 1888, it appeared that there were three proposals, the names of the bidders and the amounts of their respective bids, based on the actual numbers of envelopes issued during the year ended March 31, 1888, being as follows:

1. The Whitcomb Envelope Company, of Worcester, Mass.	\$98,056.36
2. The White, Corbin and Company, of Rockville, Conn.	95,779.96
3. The Plimpton Manufacturing Company and Morgan Envelope Company, of Hartford, Conn.	94,295.73

Whereas it appeared that the proposal of the Plimpton Manufacturing Company and Morgan Envelope Company was the lowest in the aggregate for all the envelopes

called for, being \$1,484.23 less than the bid of the White, Corbin and Company, the next lowest bidder;

And whereas the Postmaster-General, by an order dated the 14th day of April, 1888, awarded the contract for furnishing said envelopes to the said Plimpton Manufacturing Company and Morgan Envelope Company, which order was duly recorded in the Official Journal of the Post-Office Department, and numbered 78:

Now, therefore, in consideration of the premises and of the stipulations hereinafter set forth, the said Plimpton Manufacturing Company and Morgan Envelope Company, contractors, and their sureties, parties of the second part, do hereby jointly and severally undertake, covenant, and agree to and with the United States of America, and do bind themselves in manner following, to wit:

First. That the said contractors shall furnish and deliver promptly and in quantities as ordered, and subject to the approval of the Postmaster-General in all respects, all the registered package, tag, official, and dead-letter envelopes, of the sizes and kinds called for in the specifications, that they may be called upon to furnish during the fiscal year beginning on the 1st day of July, 1888.

Second. That the paper for the several kinds of envelopes to be furnished, as numbered in the specifications, shall be made of the materials, in the manner, and according to the conditions following, that is to say:

The paper from which the Nos. 1, 2, 3, and 4 envelopes are to be manufactured shall be composed in the proportion of 95 per cent. of jute butts and 5 per cent. of South Carolina clay (excluding all other materials except the necessary coloring matter) and shall weigh  $34\frac{1}{2}$  pounds per ream of 500 sheets measuring  $22\frac{1}{2}$  by 30 inches, or in that proportion. In the process of manufacture, the jute butts shall be washed four hours in the washing engines, and beaten eight hours in the beating engines, and the stock passed through a Jordan engine. The paper shall be rosin-sized in the engine and made on a Fourdrinier machine; it shall also be well calendered and finished, and the same in color, quality, tensile strength, and in all other respects, as the paper in the samples attached to and made a part of this contract.

The paper from which the Nos. 5, 6, 7, 9, 10, 11, 12, 13, 14, and 15 envelopes are to be manufactured shall be composed in the proportion of 30 per cent. of No. 1 rope manila, 30 per cent. of No. 2 rope (consisting of about equal parts of manila, hemp, and sisal), 30 per cent. of jute butts, and 10 per cent. of South Carolina clay, excluding all other material except the necessary coloring matter, and shall weigh 47 pounds per ream of 500 sheets measuring  $22\frac{1}{2}$  by 30 inches, or in that proportion; in the process of manufacture the rope and jute butts shall be washed six hours in the washing engines and beaten nine hours in the beating engines, and the ingredients passed through a Jordan engine; the paper shall be rosin-sized in the engine, and made on a Fourdrinier machine; it shall be well calendered and finished, and the same in color, quality, tensile strength, and in all other respects, as the paper in the samples attached to and made a part of this contract.

The paper from which tag envelopes for registered packages (No. 8) are to be manufactured shall be composed wholly of jute butts (except the necessary coloring matter), and shall weigh 90 pounds per ream of 500 sheets measuring  $22\frac{1}{2}$  by 30 inches, or in that proportion. In the process of manufacture the jute shall be washed four hours in the washing engines and beaten five hours in the beating engines and passed through a Jordan engine. The paper shall be rosin-sized in the engine. It shall be well calendered and finished, and the same in color, quality, tensile strength, and in all other respects, as the paper in the sample attached to and made a part of this contract.

All or any of the different papers used shall be water-marked with such designs as may be approved by the Postmaster-General; and all paper furnished or used shall be subject to the supervision and approval of the Postmaster-General or his authorized agent before and after being manufactured into envelopes.

Water-marked paper for any of the envelopes that may be spoiled in the process of manufacture, or condemned as unfit for use, shall not be used or sold by the contractors in its manufactured state, but shall be reduced to pulp, or otherwise destroyed, without cost to the Government; and that such spoiled or rejected paper shall not be made over for use in registered package or official envelopes.

Third. That the envelopes shall be made in the most thorough and workmanlike manner, after the styles and of the cuts shown by the samples hereto attached and made a part hereof; the joints to be well and securely fastened, and with such quality of gum, free from offensive odor, as will secure perfect and permanent adhesion of the paper, and the flaps to be thoroughly gummed with the same or other equally suitable material; and they shall be fully equal in quality and style of manufacture to the samples hereto attached, and shall be subject in all respects to the approval of the Postmaster-General or of his duly authorized agent.

Fourth. That the envelopes shall bear such printing as the Postmaster-General shall direct, and the registered package and tag envelopes (Nos. 7 and 8) shall be printed in vermilion or some other approved brilliant color equal to that on the

sample; that all of the other envelopes shall have printed on them the name of the Department, the words "Official Business," and the penalty provided by law for their misuse, beside such other printing as the Postmaster-General may at any time direct; that when ordered in separate quantities of 500 of the Nos. 1, 2, and 4 sizes, or of 250 of the Nos. 3, 5, and 6 sizes, or in larger quantities, for the use of postmasters, they shall, in addition to the foregoing printing, bear also the name of the post-office for whose use they are intended; that when ordered in less quantities they shall bear, in addition to the other printing, the words "Post-office at," with a blank space for the name of the post-office to be written in.

Fifth. That the envelopes shall be banded in parcels of 25, packed in strong paste-board or straw boxes (not inferior to No. 50 unlined Western straw-board), securely bound with linen or cotton cloth on the corners and edges, and of such weight, quality, and construction as shall be approved by the Postmaster-General; that when intended to be sent direct to postmasters, each box shall contain not less than 100 of the Nos. 7 and 8 sizes, and not less than 250 of the Nos. 1, 2, 3, 4, 5, and 6 sizes, or larger quantities as may be ordered for the principal post-offices; that the boxes shall be well and securely wrapped in strong manilla paper and properly sealed, so as to bear safe transportation by mail; but when required to be sent to the Post-Office Department, each box may contain not less than 500 of any one size and style of printing, in which case the wrapping may be dispensed with, in the discretion of the Postmaster-General; that when 4,000 or more envelopes of the sizes Nos. 1, 2, 3, and 4, and 2,000 or more of the other numbers, are required to fill the order of a postmaster, or when larger lots of any kind are ordered to be sent to the Post-Office Department, they shall be packed in strong wooden cases and properly addressed, no case to contain more than 25,000 of the Nos. 1, 2, 3, and 4, nor more than 10,000 of the othersizes; that when less than 4,000 are required to be sent to a postmaster, a proper label of direction shall be placed on each package, all of which shall be done and furnished by the contractors without additional charge.

Sixth. That the contractors shall at all times keep on hand a stock of the several kinds of envelopes sufficient to promptly meet all orders of the Department, and to provide against any and all contingencies that may be likely to occur during the existence of this contract; that the said envelopes shall be held subject to the control of the Postmaster-General or his duly authorized agent or agents; and that the contractors shall also, at any time during the existence of this contract that they may be called upon by the Postmaster-General to do so, provide an extra quantity of envelopes, not exceeding a supply for three months.

Seventh. That the contractors shall be ready to begin the delivery of the envelopes on the 1st day of July, 1888, when the term of this contract begins; and thereafter they shall be promptly furnished and delivered, complete in all respects, in such quantities as may be required to fill the orders of the Department; that the envelopes after being inspected and prepared for mailing under the direction of the agent of the Department shall be delivered to the railway post-office or post-offices or postal cars in the city of Hartford, Connecticut, in such manner, in such quantities, at such times, and under such regulations as may be prescribed at any time by the Postmaster-General or his duly authorized agent; and that the Postmaster-General shall have the right, at any time during the existence of this contract, to require the delivery of the envelopes, or any portion of them, to be made either at the post-office or at the agency in the city of Hartford, Connecticut, or at the nearest large adjacent post-office with adequate facilities for handling and mailing them, or at the Post-Office Department at Washington, D. C., in such quantities as he may prescribe.

Eighth. That this contract shall not be transferred or assigned.

Ninth. That accounts of envelopes furnished and delivered shall be kept and rendered in such manner and form as the Postmaster-General may prescribe.

And the United States of America, party of the first part, hereby contracts and agrees:

1st. To pay the said Plimpton Manufacturing Company and Morgan Envelope Company for envelopes delivered and accepted in pursuance of this contract, and subject to all its conditions, at the following rates specified in their proposals, viz:

Per 1,000.		Per 1,000.	
For No. 1.—3 $\frac{3}{4}$ by 5 $\frac{1}{2}$ .....	\$0.82	For No. 9.—5 $\frac{1}{2}$ by 7 $\frac{1}{2}$ .....	\$3.30
For No. 2.—3 $\frac{3}{4}$ by 6 $\frac{1}{2}$ .....	.95	For No. 10.—6 by 9.....	4.00
For No. 3.—3 $\frac{3}{4}$ by 8 $\frac{1}{2}$ .....	1.80	For No. 11.—6 $\frac{1}{2}$ by 10 $\frac{1}{2}$ .....	4.50
For No. 4.—4 $\frac{1}{2}$ by 6 $\frac{1}{2}$ .....	1.80	For No. 12.—7 $\frac{1}{2}$ by 10.....	4.75
For No. 5.—4 $\frac{1}{2}$ by 9 $\frac{1}{2}$ .....	2.05	For No. 13.—7 $\frac{1}{2}$ by 11.....	5.00
For No. 6.—4 $\frac{3}{4}$ by 9 $\frac{1}{2}$ .....	2.35	For No. 14.—9 by 13 $\frac{1}{2}$ .....	5.50
For No. 7.—5 by 10 $\frac{1}{2}$ .....	4.25	For No. 15.—12 by 15.....	7.75
For No. 8.—3 $\frac{3}{4}$ by 5 $\frac{1}{2}$ .....	2.25		

2d. That the said prices shall be full compensation for everything required to be done or furnished as herein set forth—payment for envelopes actually issued and delivered to postmasters to be made monthly after proper examination and adjustment

of accounts, and promptly upon the fulfillment of orders for envelopes sent to the Post-Office Department.

3d. That the contractors shall not be required to pay royalty on envelopes manufactured and furnished under this contract.

It is further stipulated and agreed by and between the contracting parties:

1st. That a resident agent of the Department shall have supervision of the manufacture, storage, and issue of the envelopes, and that he shall at all times have full and free access to the apartments where they, or anything entering into their construction, are manufactured and stored for the purpose of inspecting the same; that such agent and his clerks shall be provided by the contractors with suitable and properly furnished office rooms, connected with the premises on which the envelopes are made, for the transaction of the business of the agency, without cost to the Government; also with a properly furnished room for the use of the post-office in mailing the envelopes, if the same shall be required by the Postmaster-General; and that the contractors, their employés and agents, shall conform to such regulations as the Department may from time to time adopt for the security of the Government in any respect.

2d. That the Postmaster-General shall have the right to cause inspection to be made, when and in such manner as he may desire it, of the process of manufacturing the paper in all its several stages, and of stationing an agent, for the purpose of inspection, at the mill or mills where the paper is made; in which latter case the contractors shall furnish such agent with a properly furnished room in the mill without charge, and give him every needful facility for carrying out his duty.

3d. That the Postmaster-General shall have the right to impose a fine upon the contractors, in such sum as he may deem proper, to be deducted in the settlement of accounts, for the failure to have on hand at any time a sufficient supply of envelopes with which to promptly meet all just requirements of the Department.

4th. That in the event that the exigencies of the public service shall require the acceptance by the Department of any envelopes which, in the opinion of the Postmaster-General or his duly authorized agent, are inferior in any respect to the requirements of the contract, the right is reserved to the Postmaster-General absolutely to fix the price thereof, and to pay for such inferior envelopes any compensation less than the regular price fixed by the contract that may seem to him just and reasonable under all the circumstances, which shall be a complete discharge of all liability on the part of the Government for such envelopes.

5th. That on failure of the contractors to promptly furnish any article or articles specified in this contract, the Postmaster-General shall have the right to purchase such article or articles in the open market; and if a greater price be paid than that prescribed by the contract for like articles, the difference shall be charged to the contractors; and if there shall be a failure to furnish any articles within a reasonable time after the same shall have been ordered, it may be regarded as a sufficient cause for the annulment of this contract.

6th. That if at any time during the continuance of this contract the sureties or either of them shall die, or become irresponsible, the Postmaster-General shall have the right to require additional and sufficient sureties, which the contractors shall furnish to the acceptance of the Postmaster-General within ten days after notice; and in default thereof this contract may be annulled.

7th. That in case of failure by the contractors to do or perform all or any of the covenants, stipulations, and agreements of this contract on the part of the said contractors to be performed, as herein set forth, the said parties of the second part shall forfeit and pay to the United States of America the sum of twenty thousand dollars, for which full and absolute sum they shall be jointly and severally liable, as fixed, settled, and liquidated damages, and not as a penalty, to be sued for in the name of the United States.

8th. That in addition to the forfeiture covenanted and agreed to in the foregoing paragraph, the Postmaster-General shall have the right to annul this contract if, in his opinion, there shall be a failure at any time to perform faithfully any of its stipulations, or in case of a willful attempt to impose upon the Department envelopes inferior to those required by this contract. He shall also have the right to withhold payments for envelopes furnished if it shall appear to his satisfaction that this contract has not been complied with in any particular.

9th. That should the interest of the Government require, this contract may be extended beyond the time named, not exceeding three months, by order of the Postmaster-General, and the contract prices and all conditions herein set forth shall govern in such extended contract.

10th. That the contractors may be required, in the discretion of the Postmaster-General, to continue the issue until the same shall be exhausted, of the envelopes that may remain on hand at the expiration of the term of this contract, at the prices and upon the conditions prevailing while in force. That the Postmaster-General shall have the right to authorize the issue by the present contractor, the Holyoke Envelope Company, of such envelopes as may remain in its hands at the close of its con-

tract term, and the contractors herein shall not be entitled to damages on account of such issues made during their contract term.

11th. That no member of or delegate to Congress shall be admitted to any share or part of this contract, as provided by sections 3739, 3740, and 3741 of the Revised Statutes of the United States; and each and all of the provisions in said sections shall be deemed a part of this contract.

And for the faithful and diligent keeping, performing, and abiding by each and every of the requirements, provisions, and terms of this contract, and of the specifications hereto annexed and made part hereof, the said parties of the second part do hereby bind themselves, and each of them, their and his heirs, executors, and administrators.

In witness whereof, the said Postmaster-General has caused the seal of the Post-Office Department of the United States of America to be hereunto affixed, and has attested the same by his signature, and the said parties of the second part, the said corporations, have hereunto set their corporate seals by the hands of their respective presidents and caused these presents to be subscribed by said presidents, and said sureties of the parties of the second part have hereunto set their hands and seals on and as the day hereinbefore written.

# REPORT

OF THE

## SUPERINTENDENT OF THE DEAD-LETTER OFFICE.

POST-OFFICE DEPARTMENT,  
DEAD-LETTER OFFICE,  
*Washington, D. C., October 1, 1888.*

SIR: I have the honor to submit herewith my report of the operations of the Dead-Letter Office for the fiscal year ended June 30, 1888, the details of which are fully set forth in the several tables embodied in this report.

There were received during the year 6,217,876 pieces of original dead mail matter, an increase of 882,513 pieces, or about 16.5 per cent., over the number received during the fiscal year ended June 30, 1887. In addition to this number, there were also received 237,869 letters without valuable inclosures which had been returned to the writers, but failing of delivery, were again sent to the Dead-Letter Office. These, together with 222 "held-for-postage" letters and 8,903 letters of foreign origin on hand and undisposed of on July 1, 1887, make the total number of pieces treated during the year 6,464,870, which were classified, treated, and disposed of as follows:

## CORRESPONDENCE.

During the year there were received 18,589 inquiries for alleged missing mail matter, which were duly examined and the results reported to

the applicants. In a large percentage of these inquiries it was found upon examination that the alleged missing mail matter had been properly delivered by the postal service. Where this was not the fact, and no trace of the missing matter was found upon the records of this office, the cases were duly reported to the chief post-office inspector for further investigation. There were also written 4,239 special communications, in answer to inquiries from postmasters and others, relating to postal matters connected with this office.

It will be observed from the comparative statement of mail matter received and treated that the greater increase is in the items "ordinary unclaimed letters" and "letters mailed in foreign countries." This may be accounted for by the fact that in the revised postal laws and regulations which went into operation September last a change was made shortening the time of holding advertised letters from four to two weeks, thus causing additional returns to be sent to the Dead-Letter Office during the last year, which, under the old regulations, would not have been sent in until the succeeding year. Had it not been for this change the percentage of increase would have been about the same as that shown in my report for 1887, and would probably approximate the actual growth of the postal service.

Free-delivery offices are required to make their returns of dead matter by registered mail, and a large number of other offices adopt the same rule. The whole number of registered parcels of this character received during the fiscal year, the contents of which were distributed among the several divisions of the office for treatment, was 40,129. The number received during the preceding year was 27,659, showing an increase during the last year of 12,470. A very large proportion of this increase was undoubtedly the result of recent legislation increasing the number of free-delivery offices; but the figures will show how much the work of this division of the office has been added to by the legislation referred to. This work will, of course, steadily increase in future by reason of the increasing number of offices which will become entitled to free-delivery service.

The increase of matter sent to the Dead-Letter Office without corresponding increase in the number of employés necessitated such a distribution of the force as would enable matter containing valuable inclosures to be treated as specifically required by the regulations; that is, to be made matter of record; thereby reducing the force available for the treatment of letters which did not contain valuable inclosures below the number of persons required to return everything possible to be returned. While the average number returned by individual employés exceeds the average of any previous year, the aggregate number is therefore less. Another reason for this decrease is found in the constantly increasing amount of printed matter, advertising circulars, etc., manifestly intended for general distribution and not desired to be returned, sent out under the reduced rate for letter postage, sealed and therefore classed in the report as "letters received."

It is not only gratifying but just to the chief clerk, the clerks in charge of the several divisions, and all the employés of the office that I should testify to the fidelity and zeal with which they have performed their duties. It would otherwise have been impossible to properly dispose of the work which devolved upon the office.

Very respectfully, your obedient servant,

JNO. B. BAIRD,  
*Superintendent.*

REPORT  
OF THE  
SUPERINTENDENT OF THE POSTAL MONEY-ORDER SYSTEM  
FOR THE  
FISCAL YEAR ENDED JUNE 30, 1888.

# REPORT

## OF THE

### SUPERINTENDENT OF THE POSTAL MONEY-ORDER SYSTEM.

---

POST-OFFICE DEPARTMENT,  
OFFICE OF SUPERINTENDENT OF MONEY-ORDER SYSTEM,  
*Washington, D. C., November 13, 1888.*

SIR: I have the honor to submit the following report of the operations of the Postal Money-Order System for the fiscal year ended June 30, 1888, which continue to manifest the confidence reposed by the public in its methods, and which are evidence, to some extent, of increased activity in business.

The total amount of domestic money-order transactions for each fiscal year from the inception of the system until the close of the term to which this report relates will be found in Statement A, of the Appendix.

#### NUMBER OF MONEY-ORDER OFFICES.

On June 30, 1887, the domestic money-order offices in operation numbered 7,853, and during the year ended June 30, 1888, 410 new offices were established, and 22 offices were discontinued; on June 30, 1888, therefore, the total number of domestic money-order offices was 8,241. Since that date the money-order business has been withdrawn from 2 offices, and on the 1st of October the system was extended to 493 additional offices, so that on the latter date there were in operation 8,732 such offices.

#### NUMBER OF POSTAL-NOTE OFFICES.

At the date of the last report there were in existence 229 postal note offices, which were empowered to issue, but not to pay, postal-notes only, under the authority of the act of Congress approved January 3, 1887. This number was increased during the course of the year just closed to 315, while 4 offices were discontinued, leaving 311 in operation at the close of the year.

Two hundred and fifty additional postal-note offices have been established since that time, 1 has been discontinued, and 22 have been transferred to the list of money-order offices. The total number of postal-note offices on October 1, 1888, was 538.

## ISSUES AND PAYMENTS OF DOMESTIC MONEY-ORDERS.

The number of domestic money-orders issued during the year was 9,959,207, aggregating in amount .....	\$119,649,064.98
And the number of such orders paid during the same period was 9,866,060 of the value of .....	\$118,832,330.01
In addition to which money-orders were repaid to the number of 78,983, amounting to .....	911,015.24
Making the total amount of payments and repayments .....	119,743,345.25
And the excess of payments and repayments over issues .....	94,280.27

The gross amount of the fees received by postmasters from the public for the issue of domestic money-orders was .....	946,961.12
---	------------

Comparison with the figures of the preceding year shows an increase in the number of orders issued of 727,030, or 7.87 per cent.; in the number of orders paid of 726,498, or 7.94 per cent., and in the number of orders repaid of 7,718, or 10.83 per cent.

It likewise exhibits an increase in the amount of orders issued of \$2,186,404.09, or 1.36 per cent.; of \$2,426,000.63, or 2.08 per cent., in the amount of orders paid, and of \$53,317.96, or 6.21 per cent., in the amount of orders repaid.

The average amount of the orders issued was \$12.01, or 71 cents less than the average of the year ended June 30, 1887.

The increase in the gross amount of fees received was \$34,084.72, and the average fee was 9.51 cents, being .37 of a cent less than that of the previous year.

## ISSUES AND PAYMENTS OF POSTAL-NOTES.

The number of postal-notes issued during the year was 6,668,006, of the total value of .....	\$12,134,459.04
And the number of notes paid during the same time was 6,544,865, amounting to .....	\$11,934,759.13
While the notes repaid at the offices of issue numbered 87,125, and aggregated .....	170,122.42
Making the total amount of payments and repayments .....	12,104,881.55
And the excess of issues over payments and repayments .....	29,577.49

The aggregate amount of fees received from the public was .....	200,341.68
---	------------

There was consequently an increase in the number of postal-notes issued of 360,454, or 5.71 per cent., and in the amount thereof of \$365,634.23, or 3.10 per cent.; an increase in the number of postal-notes paid of 340,412, or 5.48 per cent., and in the amount thereof of \$362,677.86, or 3.13 per cent.

There was likewise an increase in the number of postal-notes repaid, or paid at the office of issue, of 5,572, or 6.83 per cent.; and in the amount thereof of \$15,436.18, or 9.98 per cent.

The average amount of the postal-notes issued was \$1.82, or 5 cents less than the average of the preceding year.

## WAR CLAIMS.

In continuation of the custom of former years, the Paymaster-General of the United States Army employed the money-order system for the purpose of paying the claims of colored soldiers for services in the late war. The total amount of the money-orders issued to that end for bounty and back pay during the fiscal year was \$1,539.13. The money-

orders in such cases are transmitted through this office—not directly from the War Department to the payees—and are accompanied with specific instructions to the respective postmasters on whom they are drawn enjoining that great care be taken to identify the payees.

#### DUPLICATE MONEY-ORDERS.

Statement B, appended hereto, shows the number of duplicate money-orders issued by this office during the last fiscal year to have been 21,656, an increase of 2,310 over the preceding year. The number of duplicate postal-notes issued was 6,436, an increase of 1,921 over the year 1886-'87.

Provision is made by law for the issue of duplicate money-orders in case of the loss or destruction of the originals, and when the latter are not paid within one year from the date of their issue, or have received more than one indorsement; likewise, when the originals are drawn for payment to concerns which the Postmaster-General, under authority of section 4041 of the Revised Statutes, has pronounced fraudulent, the money is returned to the remitter by means of duplicate orders.

Duplicate postal-notes are drawn in lieu of notes which have not been paid within a period of three months from the last day of the month of issue, that being the term of validity fixed by law for postal-notes.

#### DRAFTS AND TRANSFERS.

Every available means is adopted to guard against delay in the payment of money-orders, and to that end postmasters are required, when it becomes necessary, to employ the postal funds in their hands, and to make transfers of such amounts as may be required from the postal to the money-order account. Occasionally, also, it is convenient to transfer sums of money-order funds to the postal account. Notice of every such transfer is transmitted to the Department; an account thereof is kept; and as soon as practicable after the close of each quarter, upon report from the auditor, the balance remaining due to the postal account is repaid by the deposit of an equivalent sum with the Assistant Treasurer of the United States at New York, N. Y., to the credit of the Treasurer of the United States for the service of the Post-Office Department. The amounts of such transfers for the four quarters of the last fiscal year, and the respective dates on which the balances due were paid to the postal fund, were as follows :

Quarter ended—	From postal to money-order funds.	From money- order to postal funds.	Balance due postal funds.	Paid by deposit in sub-treasury at New York, N. Y.
September 30, 1887.....	\$158, 019. 99	\$14, 862. 38	\$143, 157. 61	May 5, 1888.
December 31, 1887.....	180, 731. 72	5, 343. 21	175, 388. 51	June 15, 1888.
March 31, 1888.....	191, 188. 08	5, 897. 94	185, 290. 14	August 24, 1888.
June 30, 1888.....	153, 348. 81	3, 714. 07	149, 634. 74	November 13, 1888.
Total .....	683, 288. 60	29, 817. 60	653, 471. 00	

It frequently happens, particularly in the case of the larger offices which are located at the centers of trade, that the receipts from the issue of money-orders are not sufficient to pay the money-orders presented, while the postal funds are required for other legitimate expenditures of the office. In such case, if the deficiency in the money-order funds be

on occasional or temporary one, the postmaster is furnished by this office, upon his application, with a draft upon the postmaster at New York, N. Y. If the deficiency is continuous and considerable he is supplied with a book of such drafts and a convenient sum is placed to his credit with the postmaster at New York upon which he may draw by installments. Both the credit and the supply of drafts may be renewed as occasion requires.

The total amount of such drafts paid by the postmaster at New York during the last fiscal year was \$12,470,601.89.

Inasmuch as great delay would ensue if postmasters in the extreme Western States and Territories were required to obtain supplies of funds from Washington, arrangement is made for furnishing them with the requisite funds from the post-offices of San Francisco, Cal., and Portland, Oregon, the former of which transmitted to neighboring offices during the fiscal year ended June 30, 1888, the sum of \$135,756, and the latter the sum of \$91,686.

#### REMITTANCES OF SURPLUS MONEY-ORDER FUNDS.

It is essential to the success of the money-order system that the funds received from the issue of orders at offices where the payments are few shall as quickly as possible be transmitted to those offices where the payments are more numerous and larger in amount than the issues, and accordingly every postmaster is required by regulation to make daily remittances to some post-office, designated as a depository, of all his surplus money order funds. He is allowed to retain, if his business is fluctuating, a small fixed sum termed a "reserve," but at the majority of offices postmasters are required to transmit daily every dollar in excess of the aggregate amount of the unpaid advices which have been in their hands not exceeding two weeks. The remittances of this kind, made in currency by registered mail, or by means of national bank drafts in ordinary mail, aggregated during the fiscal year just closed \$103,129,930.74.

#### LOST REMITTANCES.

Notwithstanding the vast number and very considerable amount of these remittances, only 91 cases of loss were reported during the year, and of these eleven were cases of remittances alleged to have been forwarded during the preceding year. All of these cases, aggregating in amount \$6,368.43, were referred, as they were brought to notice, to the Assistant Attorney-General for the Post-Office Department, he being the officer designated to adjudicate postmasters' claims for losses of money-order funds in transit under authority of the act of March 17, 1882, which empowers the Postmaster-General to allow credit, if the loss occurred without fault or negligence upon the part of the remitting postmaster. A description of the remittances above-mentioned will be found in Statement C, of the Appendix.

#### ERRONEOUS PAYMENT OF MONEY-ORDERS.

During the fiscal year 1887-'88, 61 money-orders were reported as having been improperly paid, or in the ratio of 1 to every 161,739 orders paid. These are described in Statement D, of the appendix, which contains also the particulars of 75 other money-orders alleged to have

been erroneously paid; the total amount of the whole number being \$3,472.94. They include 35 orders, amounting to \$992.35, the inquiry in regard to which had not been concluded at the close of the previous fiscal year; and 40 orders, aggregating \$1,018.97, issued prior to July 1, 1887, but in regard to which no claim was made upon the Department until after the commencement of the last fiscal year. As shown by the tabular statement, inspectors of the Department, in the course of their investigations, recovered the amounts of 31 orders and paid the money, in all \$845.13, to the true payees.

In 10 cases, in which the orders aggregated \$126.50, it was ascertained that the claims were not well founded, the orders having been properly paid in the first instance.

Postmasters were required to make good to the owners the amounts of 41 orders, in all \$1,078.45, for failure to exercise the degree of precaution enjoined by the regulations in making payment, and in 1 case, amounting to \$4.50, the evidence was not sufficient to fix the responsibility for wrong payment either upon the postmasters or upon the remitters or payees, and the Department, therefore, assumed the loss. The payees themselves, on account of contributory negligence, were required to sustain the loss in 2 cases, involving \$12, and the remitter in 1 case, the amount of the order being \$11, while the investigation in regard to 50 orders, of the total value of \$1,395.36, had not been concluded at the close of the year.

#### REVENUES AND EXPENSES.

The revenues and expenses of the domestic money-order system for the year to which this report relates are reported by the Auditor as follows:

##### RECEIPTS.

Amount received for fees on orders issued.....	\$946,961.12
Amount of gain.....	136.01
Amount of premiums, etc.....	219.43
Total.....	947,316.56

##### EXPENDITURES.

Amount allowed postmasters for commissions.....	\$317,064.29
Incidental expenses.....	84,479.92
Lost remittances, burglaries, etc.....	4,499.58
	406,043.79
Excess of receipts over expenditures, being gross revenue.....	541,272.77

Included in the item of "incidental expenses" above mentioned is the cost of blanks, blank books, and printed matter used in the money-order business, and of stationery used exclusively for this business in post-offices, as well as of money-order dating-stamps, stamp-ribbons, numbering machines, etc.

The total cost of blanks, blank books, etc., for domestic and international money-order business and for postal-note business, purchased under contract by authority of special law was \$47,597.72, and of this sum \$8,666.39 were paid for work ordered on requisitions of the previous year. The cost of such blanks and books for domestic money-order business alone was \$42,525.03, including \$8,233.40 paid on account of requisitions of the preceding year.

The receipts and expenditures of the postal-note business have been reported by the Auditor as follows:

## RECEIPTS.

Amount received for fees on notes issued..... \$200,341.68

## EXPENDITURES.

Amount allowed postmasters:

For commissions .....	\$55,701.39	
Incidental expenses .....	26,754.91	
		82,456.30

Excess of receipts over expenditures, being gross revenue..... 117,885.38

The item of "incidental expenses" includes the cost of the blank engraved postal-note forms, amounting to \$20,683.69.

## THE INTERNATIONAL MONEY-ORDER BUSINESS.

Money-order business was commenced with the Kingdom of Denmark on the 1st of January, 1888, a convention for the purpose, a copy of which is hereto annexed, having been duly concluded with that country.

At the close of the fiscal year 1886-'87, 1,642 of the money-order offices were specially authorized to transact international money-order business. Facilities for making remittances to foreign countries were extended to 60 additional offices during the last year, and 1 office was discontinued; so that on June 30, 1888, the number of such offices was 1,701. This number has been still further increased since the close of the year by the addition of 77 international money-order offices, and therefore at date of this report there are 1,778 offices authorized to conduct both international and domestic money-order business.

## STATISTICS OF THE INTERNATIONAL MONEY-ORDER BUSINESS.

In the following statement are shown, in detail, the number and amount of the money-order transactions with each of twenty-three foreign countries. The statement also contains an interesting comparison of the figures of last year with those of the previous year, exhibiting the amount as well as the percentage of increase or decrease in every case.

Norway exchange did not go into operation until April 1, 1887.

Netherlands exchange did not go into operation until April 1, 1887.

Denmark exchange did not go into operation until January 1, 1888.

This table exhibits an increase in the number of international money-orders issued of 144,231, or 23.43 per cent.; in the amount of such orders issued of \$2,258,339.74, or 24.99 per cent.; in the number of international orders paid and repaid, of 15,219, or 6.77 per cent.; and in the amount of such orders paid and repaid of \$158,179.68, or 3.91 per cent.

It likewise shows an increase in the amount of fees received of \$27,417.80, or 24.45 per cent.

The average amount of the international orders issued was \$14.87, the same being 19 cents greater than the average of the preceding year; and the average amount of the international orders paid was \$17.61, or 48 cents less than the average of the preceding year.

The increase in the total volume of the international money-order business, including orders issued, paid, and repaid, was \$2,416,519.42, or 18.46 per cent.; and the number of transactions increased by 159,450, or 18.98 per cent.

#### REVENUE FROM INTERNATIONAL MONEY-ORDER BUSINESS.

The gross revenue from the respective international systems for the last fiscal year is reported by the Auditor for this Department to be as follows:

From the Canadian business .....	\$14,636.32	From the Queensland business .....	\$51.99
From the British business .....	36,934.61	From the Cape Colony business .....	19.18

## GENERAL FINANCIAL RESULTS.

The total volume of business of all kinds, including domestic and international money-orders and postal-notes, consisted for the year of transactions numbering 17,386,849, and amounting to \$143,077,394.07 in issues, and numbering 16,816,772 and amounting to \$136,055,662.42 in payments and repayments; and the aggregate amount of all the fees received from the public was \$1,286,813.90.

These figures exhibit an increase in issues in the number of transactions of 1,231,715, or 7.62 per cent., and in the amount thereof of \$4,810,378.06, or 3.48 per cent.

In compliance with the provisions of section 4050 of the Revised Statutes the gross revenues from all branches of the money-order and postal-note business were deposited quarterly, as soon as they were reported by the Auditor, with the Assistant Treasurer of the United States at New York, N. Y., to the credit of the Treasurer of the United States for the service of the Post-Office Department. These revenues by quarters and the dates of the respective deposits are shown in the sub-joined statement:

Quarter ended—	Amount.	Deposited—
September 30, 1887.....	\$168,266.61	May 5, 1888.
December 31, 1887.....	238,879.44	June 15, 1888.
March 31, 1888.....	210,494.15	August 24, 1888.
June 30, 1888.....	180,677.63	November 13, 888.
Total.....	798,317.83	

In accordance with the practice of the Department, there are annually taken into account, for the purpose of making an exact statement of net revenue, all such items of expense as, though paid from appropriations made by Congress, are a legitimate charge upon the money-order system. These expenditures for the last fiscal year were the following:

Salaries to forty-nine employés in the Superintendent's office.....	\$63,280.00
Salaries to the employés in the Money-Order Division of the Auditor's office.....	233,586.56
Stationery furnished for use in the Superintendent's office.....	625.83
Books, blanks, printing, and stationery furnished for use in the Money-Order Division of the Auditor's office.....	9,392.21
One-half of salaries of employés in the Money-Order building, under the supervision of the Superintendent of the Post-Office Department building.....	4,820.00
One-half rent of the Money-Order building.....	4,000.00
Estimated cost of furniture and miscellaneous expenses of same.....	2,000.00
Rent of building known as Marini's Hall.....	4,500.00
Salaries of watchmen, laborers, and of incidental and miscellaneous expenses of said building.....	8,100.00
To these sums must be added the total amount of the allowances to postmasters at first and second class post-offices for clerk-hire in the money-order business, which, under the act of June 29, 1886, have been paid since July 1, 1887, out of appropriations instead of from the proceeds of the money-order business, the said amount as reported by the First Assistant Postmaster-General being.....	424,996.02
Total.....	755,301.62

It will thus be seen that the anticipation of last year that the money-order business would, notwithstanding the reduction of the fee for small money-orders from 8 cents to 5 cents, become entirely self-sustaining has been realized; for, after deduction of the amount of the above

mentioned expenses from the amount of the gross revenue, there remains an absolute net profit of \$43,016.21.

The advantageous printing contracts made by the Department during the summer of 1887 have contributed largely to this satisfactory result.

It is probable that this profit will be somewhat increased during the current fiscal year by reason of additional conventions concluded, at the instance of this Department, with the postal administrations of nearly all the foreign countries with which it maintains an exchange of money-orders, which additional conventions reduced from three-fourths of 1 per cent. to one half of 1 per cent. the rate of commission to be paid by each country to the other upon money-orders issued; such commissions being the compensation of the country of destination for the labor and outlay incidental to the payment of money-orders.

Such conventions have been duly signed to take effect in the case of Portugal on October 1, 1887; in the case of Great Britain on the 1st of April, 1888; in the case of Italy, Sweden, the Hawaiian Kingdom, and the Leeward Islands on the 1st of July, 1888; and in the case of New Zealand, Japan, the Cape Colony, and Queensland, on the 1st of October, 1888. A similar convention has been executed with the French Government, but has not yet been ratified by that Government.

Negotiations for a like purpose are being conducted with Germany, Switzerland, and Victoria, while in the case of Canada, Norway, the Netherlands, and Denmark, the rate of commission was originally fixed at one-half of 1 per cent., and therefore required no modification.

The net profit to the United States by the reductions already conceded, and entirely agreed to, is estimated at over \$9,500 per annum, and the additional profit, if the pending negotiations above mentioned are concluded to the satisfaction of this Department, will amount to about \$3,300 per annum.

In conclusion, I have the honor to recommend that legislation be requested to authorize the increase of the maximum amount of a single international money-order from \$50 to \$100. Such a change would produce uniformity, in respect to the maximum amount, between the domestic and international money-orders, and would besides tend to reduce the expenses of the international money-order systems, inasmuch as for sums from \$50 to \$100 a single order would be required in lieu of two as at present. Since the postmasters and clerks who issue the orders, and the exchange offices which certify them, are compensated for their labor not upon the basis of the amounts of the orders, but upon that of the number of transactions at a fixed rate per transaction, the lessening of expense in the item of clerk-hire in post-offices would be by no means inconsiderable.

I am, sir, very respectfully, your obedient servant,

C. F. MACDONALD,  
*Superintendent of Money-Order System.*

Hon. DON M. DICKINSON,  
*Postmaster-General.*

# CONVENTION FOR AN EXCHANGE OF MONEY-ORDERS BETWEEN THE UNITED STATES OF NORTH AMERICA AND DENMARK.

## ARTICLE 1.

### *Exchange of Money Orders.*

Between Denmark and the United States of North America there shall be a regular exchange of money-orders.

## ARTICLE 2.

### *Offices of Exchange.*

1. The money-order service between the two countries shall be performed exclusively by means of offices of exchange designated for the purpose.

2. The office of exchange on the part of Denmark shall be Korsør, and on the part of the United States of North America, New York, N. Y.

## ARTICLE 3.

### *Maximum amount of orders.*

1. The maximum amount for which a money-order may be drawn in Denmark upon the United States shall be one hundred and eighty-six (186) kroner, 50 øre, and the maximum amount for which a money-order may be drawn in the United States upon Denmark shall be fifty dollars, (\$50.)

2. This maximum amount of 186 kroner, 50 øre, or 50 Dollars, may, however, be increased by mutual agreement between the Post Office Departments of the two countries to three hundred and seventy three (373) kroner, or 100 Dollars, provided the Post Office Department of the United States of North America is authorized by law to assent to such an increase.

## ARTICLE 4.

### *Payment in gold coin.*

Payment, in either country, shall be made in gold coin, or its equivalent in other current money.

## ARTIKEL 1.

### *Udvexling af Postanvisninger.*

Mellem Danmark og de Forenede Stater i Nord-Amerika skal der finde en regelmæssig Udvexling af Postanvisninger Sted.

## ARTIKEL 2.

### *Udvexlingsposttkontorer.*

1. Udvexlingen af Postanvisninger imellem de to Lande skal udelukkende ske gennem dertil bestemte Udvexlingskontorer.

2. Korsør Postkontor er Udvexlingskontor for Danmarks Vedkommende og New York, N. Y., for de Forenede Stater i Nord-Amerika.

## ARTIKEL 3.

### *Maximumsbeløb for Postanvisninger.*

1. Det højeste Beløb for Postanvisninger fra Danmark til de Forenede Stater er Et Hundrede Sex og Firsindstyve (186) kroner 50 Øre og det højeste Beløb for Postanvisninger fra de Forenede Stater til Danmark er Halftresindstyve (50) Dollars.

2. Disse maximumsbeløb, 186 kroner, 50 Øre, respektive 50 Dollars, kunne imidlertid efter Overenskomst mellem begge Landes Postbestyrelser forhøjes til Tre hundrede Tre og Halvfjerdsindstyve (373) Kroner, respektive 100 Dollars forudsat, at Postdepartementet et i de Forenede Stater i Nord-Amerika, ved Lov bemyndiges til at indgaa paa en saadan Forhøjelse.

## ARTIKEL 4.

### *Udbetaling i Guldmönt.*

Udbetalingen skal i hvert af Landene ske i Guldmönt eller med tilsvarende Voerdi i anden gangbar Mönt.

## ARTICLE 5.

*Commission.*

1. The Post Office Departments of the respective countries shall have power to fix the rates of commission which at different times shall be paid by remitters on money orders issued in the respective countries.

2. This commission shall belong to the country of issue, but the Danish post office shall pay to the post office of the United States one-half of one per cent. on the total amount of all money-orders issued in Denmark for payment in the United States, and the post office of the United States shall make a like payment on the money-orders issued in the United States for payment in Denmark.

3. Such payments to be calculated on the totals of the Lists (A) exchanged every quarter by the two countries.

## ARTICLE 6.

*Rate of Exchange.*

1. The conversion of the money of the one country into that of the other shall be effected in accordance with an average rate of exchange, which is fixed at 3 kroner, 73 öre = 1 dollar in gold.

2. The two offices are, however, authorized to fix, by common agreement, another rate of conversion should the course of exchange between the two countries render such a step necessary.

3. No account will be taken of fractions of a cent, or of four öre.

## ARTICLE 7.

*Special particulars.*

1. Every money-order shall give, in full, the surname and at least the initial of one christian name both of the remitter and of the payee; if the remitter or the payee is a firm or company, the name of such firm or company shall be given. Further, the money-order shall contain the address of the remitter, together with the exact address of the person or firm to whom the money is to be paid.

2. The post office address shall be given with the greatest possible accuracy, and in the case of money-orders upon the United States, the name of the State, and, if possible, of the County in which the post office is situated shall be indicated.

## ARTICLE 8.

*Duplicate orders.*

1. If a money-order is lost or missent a duplicate thereof may be issued upon the written application of the addressee,

## ARTIKEL 5.

*Postanvisningsafgift.*

1. Hver af de to Landes Postbestyrelser skal for sit Vedkommende have Ret til at fastsætte den Afgift, der til de forskellige Tider skal erlægges af Afsendere af de i vedkommende Land udstedte Anvisninger.

2. Denne Afgift tilfalder det Land, som har udstedt Anvisningen, men det danske Postvoesen skal til de Forenede Staters Postvoesen betale en halv procent af det sammenlagte Beløb af de Postanvisninger som udstedes i Danmark for at udbetales i de Forenede Stater, og de Forenede Staters Postvoesen skal erlægge en tilsvarende Betaling for de Postanvisninger, der udstedes i de Forenede Stater for at udbetales i Danmark.

3. Disse Betalinger beregnes efter Hovedsummerne af de Fortegnelser (A) der hvert Kvartal udvexles mellem de 2 Lande.

## ARTIKEL 6.

*Omsoetningsforholdet.*

1. Omsoetningen fra det ene Lands Mönt til det andet skal ske efter en Gjennemsnitskurs, der er fastsat til 3 Kroner 73 Öre = 1 Dollar i Guld.

2. Begge Postbestyrelser ere imidlertid berettigede til efter fælles Overenskomst at fastsætte et andet Omsætningsforhold, naar Vexelkursen mellem de 2 Lande skulde gjøre et saadant Skridt fornødent.

3. Brokdele af en cent eller Beløb under 4 Öre tages ikke i Betragtning.

## ARTIKEL 7.

*Seerlige Forskrifter.*

1. Enhver Anvisning skal saavel for Afsenderens som for Adressatens Vedkommende angive det fulde Efternavn og det mindste Begyndelsesbogstavet til et af den Paagjoeldendes Fornavne; er Afsenderen, henholdsvis Adressaten, et firma eller Selskab, skal dettes Navn være angivet. Tillige skal Anvisningen indeholde en Angivelse, saavel af Afsenderens Adresse som af den Person eller det Firmas nøjagtige Adresse, til hvem Anvisningen skal betales.

2. Bestemmelsesposthuset skal angives med størst mulig Nøjagtighed, og ved Postanvisninger til de Forenede Stater tillige Navnet paa den Stat og om muligt paa den Kreds ("county"), hvori Bestemmelsesposthuset er beliggende.

## ARTIKEL 8.

*Duplikatanvisninger.*

1. Naar en Postanvisning bortkommer ved Fejlsendelse eller paa anden Maade, skal der paa derom indgIVEN skriftlig

and such duplicate order shall be issued by the Chief Office of the country of payment.

2. Upon the receipt of such an application from the payee, measures shall be taken to prevent payment of the original order.

#### ARTICLE 9.

##### *Correction of errors in names of payees.*

Correction of errors in names of payees shall be made at the request of the remitters by the Exchange Office of the country of origin.

#### ARTICLE 10.

##### *Repayment of orders.*

1. Repayment of a money order shall in no case be made until the Chief Office of the country of payment shall have reported that the order remains unpaid.

2. At the close of each Quarter each Postal Administration shall draw up, in conformity with Form B, annexed, a List showing the particulars of all orders which it has been authorized to repay to the remitters. The total amount of such list, which is to be transmitted to the 2nd Revisions Department, shall be entered to the credit of such Administration in the account mentioned in Article 17.

#### ARTICLE 11.

##### *Unpaid money-orders.*

1. Money-orders which remain unpaid during twelve calendar months from the month of issue shall become void. The amounts of such money-orders shall accrue to and be at the disposal of the country of origin.

2. The Danish Office shall, therefore enter in the quarterly account, (Article XVII) to the credit of the United States, all money-orders entered in the Lists received from the United States which remain unpaid at the expiration of the period specified.

3. On the other hand, the Post Office Department of the United States shall, at the close of each quarter, transmit to the Danish Office, for entry in the quarterly account, a detailed statement of all orders included in the Lists dispatched from the Danish Office which under this Article become void.

Begjoering fra adressaten kunne udstedes Duplikat af Anvisningen, hvilket Duplikat udfoerdiges af Udvekslingskontoret i Bestemmelseslandet.

2. Naar en saadan Begjoering fremsaettes af Adressaten, skal der gives Ordre til, at den originale Postanvisning ikke maa udbetales.

#### ARTIKEL 9.

##### *Rettelser af Fejl i Adressaters Navne.*

Rettelser af Fejl i Adressaters Navne skulle paa Afsenderens Begjoering foretages af Udvekslingskontoreti Udstedelseslandet.

#### ARTIKEL 10.

##### *Tilbagebetaling af Anvisninger.*

1. Tilbagebetaling af en Postanvisning kan aldrig finde Sted, uden at der fra Udvekslingskontoret i det Land, hvor Anvisningen er betalbar, foreligger Meddelelse om, at Anvisningen ikke er bleven udbetalt.

2. Efter hvert Kvartals Udløb skal hver af de 2 Postbestyrelser afatte en i Overensstemmelse med vedføjede Formular B, udfoerdiget detailleret Fortegnelse over alle de Anvisninger, som den er bleven bemyndiget til at tilbagebetale til Afsenderne. Hoved summen af denne Fortegnelse, der indsendes til 2det Revisionsdepartement, krediteres vedkommende Postvoesen iden i Artikel 17 ommeldte Afregning.

#### ARTIKEL 11.

##### *Uanbringelige Postanvisninger.*

1. Anvisninger, der ikke ere udbetalte inden Udløbet af 12 Kalendermaaneder efter den Maaned, hvori de ere udstedte, ere ugyldige. Beløbet af saadanne Anvisninger godskrives Afsendelseslandet og staar til dettes Disposition.

2. Den danske Postbestyrelse skal derfor i Kvartalsafregningen (Artikel 17.) kreditere de Forenede Stater Beløbet af alle de Postanvisninger, som findes opførtes paa Fortegnelserne fra de Forenede Stater som uindlåte ved Udgangen af vedkommende Tidsperiode.

3. Paa den anden Side skal de Forenede Staters Postdepartement ved Slutningen af hvert Kvartal oversende den danske Postbestyrelse til Optagelse i Kvartals-Afregningen en specificeret Opgjørelse over alle de Postanvisninger, der i Henhold til denne Artikel ere opførte som ikke udbetalte paa de fra det danske Postvæsen modtagne Fortegnelser.

## ARTICLE 12.

*List of money-orders.*

1. The two Offices of Exchange shall forward to each other by every mail a statement of the money-orders issued in the one country for payment in the other. Such statements are to be made out on Lists similar to Form A, annexed.

2. Money Orders issued in Denmark towards the end of June, and in the United States towards the end of March, and which are not received at the respective Offices of Exchange before the beginning of the following month, shall be entered and advised to the Office of Exchange of the country to which they are sent, on separate Lists dated the last day of the month in which the amounts were received.

3. When no money order amounts are received, a blank List shall be transmitted.

## ARTICLE 13.

*International numbers.*

Every money-order or amount of a money-order, entered upon the Lists shall bear a number, to be called the "International number" commencing each month with No. 1.

## ARTICLE 14.

*Acknowledgment of receipt of Lists and duplicates of the same.*

1. The receipt of each List shall be acknowledged, on either side, by means of the first subsequent List dispatched in the opposite direction; should a List fail to be received, the Exchange Office to which it should have been sent, shall immediately give notice thereof.

2. In such case the dispatching office of exchange, shall forward to the receiving office, without delay, a duplicate List duly certified as such.

## ARTICLE 15.

*Verification of Lists.*

1. The Lists shall be examined by the receiving office of exchange, which shall correct them when they contain manifest errors.

2. The dispatching office of exchange shall be notified of the corrections made in the acknowledgment of the receipt of the corrected List.

## ARTIKEL 12.

*Postanvisningsfortegnelser.*

1. De to Udvekslingskontorer skulle med hver afgaaende Post gjensidig tilstille hinanden Opgjørelser over de i hvert Land indbetalte til Udbetaling i det andet Land bestemte Postanvisninger. Hertil benyttes Fortegnelser, udfærdigede i Overensstemmelse med vedføjede Formular A.

2. Postanvisninger, der udstedes i Danmark henimod Slutningen af Juni Maaned og i de Forenede Stater henimod Slutningen af Marts Maaned og som ikke indgaa til de vedkommende Udvekslingskontorer förend de förste Dage i den fölgende Maaned skulle optages i og meddeles Udvekslingskontoret i det Land, til hvilket de sendes, ved særskilte Tillægsfortegnelser med Datum efter den sidste Dag i den Maaned, i hvilken Anvisningerne ere indbetalte.

3. Naar intet Anvisningsbeløb er indbetalt, afsendes en Vacat-Fortegnelse.

## ARTIKEL 13.

*Internationalt Nummer.*

Enhver Postanvisning saavel som ethvert paa Fortegnelserne opført Postanvisningsbeløb, skal forsynes med it Löbenummer, der benævnes "Internationalt Nummer." For hver Maaned begyndes med No. 1.

## ARTIKEL 14.

*Anerkjendelse for Modtagelse af Fortegnelser samt Duplikater af disse.*

1. Anerkjendelse for hver Fortegnelser Modtagelse skal fra hvert Lands Side meddeles paa den förste derefter i modsat Retning afsendte Fortegnelse; udebliver en Fortegnelse, skal det Udvekslingskontor, til hvilket den var bestemt, strax gjøre Anmeldelse derom.

2. I saadant Fald skal Afsendelseslandets Udvekslingskontor, uopholdelig tilstille Udvekslingskontoret i Bestemmel seslandet en Duplikatfortegnelse, der udtrykkelig betegnes som saadan.

## ARTIKEL 15.

*Fortegnelsernes Revision.*

1. Fortegnelserne skulle gennemgaaes omhyggeligt af det modtagende Udvekslingskontor, som har at rette dem, saafremt de maatte indeholde aabenbare Fejl.

2. Rettelserne skulle bringes til det afsendende Udvekslingskontors Kundskab samtidig med, at der meddeles Anerkjendelse for Modtagelsen af den rettede Fortegnelse.

3. Should the List contain other irregularities, the receiving exchange office shall demand an explanation from the dispatching exchange office, which shall furnish the same as speedily as possible.

4. Inland orders corresponding to the money-orders in which errors have been discovered shall not be issued until the errors have been corrected.

#### ARTICLE 16.

##### *Issue of inland orders.*

So soon as a money order List shall have been received at the Exchange Office of the country of payment, that Office shall issue inland orders in favor of the payees, and for the amounts specified in the Lists, and shall forward such orders to the paying offices, or the payees, in conformity with the regulations in force in each country for the payment of inland orders.

#### ARTICLE 17.

1. The Danish Office shall at the close of each quarter prepare an account showing:

1. The totals of the Lists which have been exchanged during the quarter between the two countries (Article 12) with the addition of the commission mentioned in Article 5.

2. The totals of the lists of money-orders which the post office of the country of origin has been authorized to repay to the remitters (Article 10).

3. The totals of the money-orders which in each country have remained unpaid (Article 11).

4. The balance, which the account shows in favor of the one or the other country.

2. Such account, which shall be drawn up in conformity with Form C, annexed, shall be transmitted, in duplicate, by the Danish Post Department to the Post Office Department of the United States, which shall return one copy duly accepted.

#### ARTICLE 18.

##### *Payment of balance.*

1. When the quarterly account shows a balance in favor of the Danish office, the Post Office Department of the United States shall, within 14 days after the receipt of such account, and after the same

3. Skulde Fortegnelsen indeholde andre Uregelmæssigheder, skal det modtagende Udvexlingskontor forlange en Erklæring af det afsendende Udvexlingskontor, hvilken dette har at afgive saa hurtigt som muligt.

4. For de Anvisningers Vedkommende med Hensyn til hvilke der findes Fejl i Angivelserne, paa Fortegnelserne, udfærdiges de tilsvarende indenlandske Anvisninger først, naar Fejlene ere rettede.

#### ARTIKEL 16.

##### *Udfærdigelsen af indenlandske Postanvisninger.*

Saasnart en Postanvisningsfortegnelse indgaar til Udvexlingskontoret i Bestemmelseslandet, udsteder dette Kontor indenlandske Postanvisninger til Adressaterne, lydende paa de paa Fortegnelsen opførte Beløb, hvilke Anvisninger tilstilles Adressaterne eller vedkommende Bestemmelsesposthus efter de Regler, der gjælde i hvert af de 2 Lande for Besørgelsen af indenlandske Postanvisninger.

#### ARTIKEL 17.

##### *Afregninger.*

1. Det danske Postvæsen skal ved hvert Kvartals Slutning udfærdige en Afregning der angiver:

1. Hovedsummerne af de Fortegnelser, der i Kvartalets Løb ere bleve udvekslede mellem begge Lande (Artikel 12) med Tillæg af den ovenfor i Artikel 5 nævnte Afgift.

2. Hovedsummerne af Fortegnelserne over de Postanvisninger, som Afsendeslandets Postvæsen er bleven bemyndiget til at tilbagebetale til Afsenderne. (Artikel 10.)

3. Hovedsummerne af de Postanvisninger, der i hvert af Landene heustaa som ikke udbetalte. (Artikel 11.)

4. Den Saldo, som Afregningen udviser for det ene eller det andet af de to Landes Postvæsen.

2. Denne Afregning, der udfærdiges i Overensstemmelse med ved hæftede Formular C, sendes i 2 Exemplarer af det danske Postvæsen til Postdepartementet for de Forenede Stater, der tilbagesender det ene Exemplar forsynet med behørig Anerkjendelse.

#### ARTIKEL 18.

##### *Afregningernes Saldering.*

1. Naar den fjerdingaarlige Afregning udviser en Fordring for det danske Postvæsen skal de nord-amerikanske Fris-taters Postbestyrelse senest 14 Dage efter Afregningens Modtagelse og, efterat den

has been duly examined and accepted, return one copy, and at the same time transmit to the Director General of the Danish Post Department a draft for the amount of the balance due, payable at Copenhagen. Receipt of such draft shall be acknowledged.

2. Should the quarterly account show a balance in favor of the Post Office Department of the United States, the latter, after proper examination and acceptance thereof, shall return one copy. Within 14 days after the receipt of such copy by the Danish Office it shall forward to the Post Office Department of the United States, a draft for the balance due, drawn in favor of the Postmaster-General, and payable at New York. Receipt of such draft shall be acknowledged.

3. The payment of the balance shall be always made in the money of the creditor country and without deduction, and all expenses in the matter shall be at the charge of the debtor country.

4. Should at any time, one of the Post Offices be the creditor of the other for paid money orders amounting to a total exceeding 20,000 kroner, the creditor office shall have the right to demand a provisional payment amounting to three-fourths of the sum due. In such case the payment shall take place immediately.

5. In the event of the balance of an account not being paid within the period specified under paragraphs 1 and 2 above, the amount of such balance shall be chargeable, with interest, from the date of such period, until the day of the transmission of the amount due. Such interest shall be computed at the rate of 5 per cent. per annum, and is to be entered in the accounts next following as a debit against the dilatory Administration.

#### ARTICLE 19.

##### *Additional rules.*

1. The Director General of Posts of each country shall have power to adopt additional rules for the greater security against fraud, or for the better working of the system generally, provided they do not conflict with any of the foregoing provisions.

2. All such additional rules, however, must be communicated to the Postmaster General of other country.

#### ARTICLE 20.

##### *Power to increase commission, or to suspend issue of orders.*

Should it appear that money-orders are used by merchants or other persons in

## OF

# THE SUPERINTENDENT OF FOREIGN MAILS.

POST-OFFICE DEPARTMENT,  
OFFICE OF FOREIGN MAILS,  
*Washington, August 6, 1888.*

SIR: I have the honor to submit the report of the Office of Foreign Mails for the fiscal year ended June 30, 1888.

### WEIGHT OF THE MAILS.

The following two tables show the actual net weights of the mails dispatched to foreign countries by sea, the proportion sent to each country, and the percentage of mail matter dispatched to different countries; and the number of articles estimated to have been contained in the mails exchanged with foreign countries, as shown by an actual count of said articles made during two weeks of the year.

*Weights and percentage of the mails dispatched to foreign countries during the fiscal year ended June 30, 1888.*

## ESTIMATES FOR THE FISCAL YEAR ENDING JUNE 30, 1890.

The amount estimated as necessary to be appropriated for the foreign mail service for the fiscal year ending June 30, 1890, is \$760,000.

This sum is composed of the following items, viz: For the transportation of mails of United States origin, including open mail matter of foreign origin, \$613,738.97; closed mails of foreign origin, \$30,000; railway transit across the Isthmus of Panama, \$7,000; maintenance of the United States postal agencies at Panama and Shanghai, \$2,500; contingencies, \$1,761.03; for balances due foreign countries for intermediary transit, the United States portion of the expenses of the International Bureau of the Universal Postal Union, and the subscription of this Department to the monthly journal (*l'Union Postale*) of that Bureau, \$100,000; and the expenses of the United States delegates to the Vienna postal congress of 1890, \$5,000.

There may be an increase during the next fiscal year in the balances due foreign countries, but this Department has no basis on which to estimate this increase, as the next statistical period does not take place till May, 1890.

The cost of the sea conveyance of the United States mails in 1887 and 1888 exceeded that for 1886 and 1887 as follows, viz: Weight of the mails conveyed to ports to which American vessels do not ply was:

	Letters.	Prints.

At this rate of increase, 11.87 per cent. for letters, and 8.20 for printed matter, the weights for the fiscal year ending June 30, 1890, will give:

The cost of conveying the above amount of mail, at 5 francs per kilogram of letters and post-cards (44 cents per pound), and 50 centimes per kilogram for printed matter (4½ cents per pound), will make the total cost of this service—

For letters and post-cards .....	\$320,002.32

#### TRANSATLANTIC STEAM-SHIP SERVICE.

Most of the countries of Europe dispatch their mails for the United States by the fastest steamers offered, without regard to the register or flag of the vessel. Great Britain, however, continues to confine the dispatch of all its regular mails to the vessels of the Cunard and White Star (English) Lines, the vessels sailing from Queenstown.

The time required for the conveyance of mails from London to Queenstown is eighteen hours and thirty-five minutes; and from London to Southampton, two hours and forty-five minutes. The vessels of the North German Lloyd Steam ship Line sail from Southampton the same day that the White Star vessels sail from Queenstown, and arrive at the port of New York at about the same time, as will be seen from the following tables, Nos. 1 and 2. If the German vessels were allowed to convey from Southampton the mails that accumulate after the departure from London of the mails for dispatch by the Cunard or White Star vessels sailing from Queenstown, it would save not only the difference in the time required to convey the mails from London to Queenstown, and South-

ampton, but advance the dispatch of said mails, now delayed by being held for dispatch by the next Cunard or White Star steamer sailing from Queenstown two days after the German vessel sails from Southampton. Therefore, the mails that accumulate before the departure of the German vessels are always delayed from one to three days.

It will be seen from Table No. 1, "From London to New York," that in one month the regular mails were subjected to nine delays, amounting in all to twenty-two days, six hours, and fifty-two minutes; while from Table No. 2, "From New York to London," it will be observed that in every instance the steamer to which the mails were awarded delivered them earlier than they would have been delivered had they been conveyed by any other steamer tendered to this Department. In this connection it may be well to state that the British mails represent 44 per cent. of all the mails exchanged between the United States and European countries. While the country of origin, by treaty stipulation, has absolute control of the dispatch of its mails by whatever route it may deem proper, in view of the important business relations existing between the two countries, it is to be regretted that the correspondence exchanged between them should be made to pay tribute to methods local.

The commercial and manufacturing interests of the country petitioned your predecessor to use his good offices with the transatlantic Governments to secure the adoption on their part of a policy similar to that enforced by this Department in dispatching the mails by the fastest vessel, without regard to the registry or flag of the vessel. This petition was signed by gentlemen representing hundreds of millions of capital, and largely engaged in international business enterprises between the United States and Europe, and was transmitted through the State Department to all the Governments of Europe.

Great Britain replied through her prime minister as follows:

I have the honor to inform you that Her Majesty's postmaster-general has had under his consideration the representation of the United States Postmaster-General, copy of which was inclosed in your note of the 7th ultimo, respecting the postal communication from Europe to the United States.

In reply to your above-mentioned note, I beg to assure you that the influentially signed expression of opinion inclosed therein will not be lost sight of when an opportunity occurs for reconsidering the arrangements now in force for the conveyance of the mails from this country to New York, but as you are doubtless aware the efforts which Her Majesty's postmaster-general has from time to time made to adopt the American transatlantic system have not received so much support in this country as would at present warrant a disturbance of existing arrangements.

The rates of compensation for sea conveyance of mails to foreign countries paid by Great Britain, Germany, and the United States, to national and foreign steamship companies, are shown in the following table:

Countries.	To national steamers.		To foreign steamers.	
	Letters, per pound.	Prints, etc., per pound.	Letters, per pound.	Prints, etc., per pound.
	Cents.	Cents.	Cents.	Cents.
Great Britain.....	72	6	44	4½
Germany.....	56½	4.3	44	4½
United States.....	160	8	44	4½

The postal contract of Great Britain with the Cunard Steamship Company is separate and distinct from the contract of the company

with the Admiralty. The postal contract is for a term of three years and provides for the conveyance of the mails as cargo at so much a pound, as shown in the above table. The Admiralty contract is for a period of five years, with a subvention at so much per registered ton, per annum.

The system of paying for the mails as cargo, at so much a pound, has proved so advantageous that it is hoped there will be no return to the old method, involving the payment of subsidies for the mail service.

If it should be the pleasure of Congress to make an appropriation to aid American steamers plying in trade with foreign ports, it would be a detriment to the efficiency of the foreign mail service to charge it with the administration of such an appropriation.

The wonderful advancement being made in naval architecture, so far as speed of the vessels is concerned, makes it questionable to tie the Post-Office Department in long contracts to certain lines of vessels which may be considered fast to-day but very slow to-morrow; and the policy of dispatching the mails by the fastest steamers tendered, has met with so much favor with all classes of people, that if at this late day they were deprived of the privilege of dispatching their letters by the quickest possible route it would undoubtedly create much dissatisfaction.

As to the system of dispatch of the mails by the fastest steamers, and obtaining the data for such dispatch, I have to say that the Department requires the various exchange offices dispatching the mails from the United States to foreign countries by sea, to make report of the hour and minute that the mails are received by the steamer, and requires the steamer to report the day, hour, and minute that the mails are delivered at the port of destination.

In the case of the transatlantic mails, the London office reports once a week to this Department the day, hour, and minute that the mails are received at the office from each steamer.

From these various reports of the time occupied in the transit of the mails to the office of destination, the mails are awarded, on the 15th of each month, for the next calendar month, to the steamers which show the greatest average speed for the three trips immediately preceding the award; and under this system the mails have been materially expedited, in some instances more than a business day.

In several instances the transatlantic mails have been awarded to steamers in competition, wherein the steamer obtaining the mails earned the award by a difference in time of from one to five minutes; the steamer that delivers the mails the quickest, whether it be one minute, one hour, or one day, having invariably secured the award of the mails without regard to the registry or the flag of the vessel; and the records of this office show that in hardly a single instance during the past fiscal year have the mails been wrongfully awarded; and when such instances have occurred the delay has been caused by some unavoidable detention of the vessel at sea.

It will be observed from the table accompanying this report, showing the time occupied by the steamers of the different transatlantic steamship companies in conveying the United States mails from New York to London and to Paris, that a number of the steamers have not varied in their time in transit more than from one to five hours for the entire fiscal year, a record that is hardly equaled in point of regularity and efficiency in the transportation of the mails over our long domestic railway routes.

No. 1.—Table showing the dispatches for the month of May, 1888, by steamers of the White Star, Cunard, and North German Lloyd lines, of the regular mails from Great Britain to the United States, and the delays sustained by portions of said mails by being dispatched exclusively by vessels of the White Star and Cunard lines.

## POSTAL CONVENTION WITH THE DOMINION OF CANADA.

On the 12th of January there was signed at Washington, and on the 19th of January at Ottawa, a postal convention between the United States and the Dominion of Canada, abrogating the special postal con-

vention between the two countries of 1875. The new convention, which went into operation on the 1st of March, 1888, virtually makes one postal territory of the United States and Canada. Under the old convention, which had already established uniformity of postage rates, there was still this restriction, that no merchandise of any kind could be sent from the United States to Canada, not even at letter rates of postage. This restriction has now been removed, and merchandise, with the exception of certain articles specially prohibited by the convention, can now be sent to Canada at the rates of postage applicable to fourth-class matter in the United States, subject, however, to such regulations as will protect the customs revenues.

Owing to the fact that the Canadian domestic rates of postage on seeds, etc., was 1 cent for each 4 ounces, whilst the United States domestic rates of postage on the same kind of articles was 1 cent for an ounce or fraction of an ounce, thus creating a distinction in favor of Canadian seedsmen, the postal convention above referred to was, by special agreement between the United States Post-Office Department and the post-office department of Canada, modified so as to make the rates of postage charged in the United States and Canada uniform as regards all third-class matter, viz, 1 cent for 2 ounces, and on all fourth-class matter (including seeds), viz, 1 cent for each ounce or fraction of an ounce.

Since the inauguration of the conventions with Mexico and Canada, thousands of packages of merchandise have been transmitted through the mails exchanged between the United States and those countries, which under the old method were absolutely excluded therefrom.

From information derived from accurate sources I am enabled to say that about 90 per cent. of the packages of merchandise exchanged between the United States and those countries originate in this country, which fully demonstrates the value of these conventions to our merchants.

I append a copy of the recent postal convention with Canada, and of the modification referred to, marked Appendix A.

#### PARCEL POST.

The first parcel-post convention between the United States and any foreign country was that concluded with Jamaica, and which went into operation October 1st, 1887; and since then parcel-post conventions have been concluded between the United States and the following countries:

	Went into operation.
Barbadoes.....	Dec. 1, 1887.
The Bahamas.....	Feb. 1, 1888.
British Honduras.....	Mar. 1, 1888.
Mexico.....	July 1, 1888.

The provisions of these different parcel post conventions are substantially the same. The greatest weight of a parcel for any of these countries is 11 pounds; for Mexico the greatest length allowed for a parcel is 2 feet, and the greatest girth is 4 feet; for Jamaica, the Bahamas, Barbadoes, and British Honduras the greatest length allowed for a parcel is 3 feet 6 inches, and the greatest length and girth combined is 6 feet.

The parcel-post rates to all these countries are the same, viz, 12 cents per pound or fraction of a pound; in addition to this, a charge for interior service and delivery may be collected from the addressee in the country of destination; this charge is 5 cents on each single parcel of whatever weight, and if the weight exceed 1 pound, 1 cent for each 4 ounces or fraction of 4 ounces. The highest possible charge for a parcel weighing 11 pounds sent from the United States to any of the above-mentioned countries, by parcel mail, will therefore be \$1.76, of which amount the sender will have to pay \$1.32, and the addressee 44 cents. These charges will certainly compare favorably with the charges of foreign express companies; the principal advantage of the new system, however, which has made it so exceedingly popular is, that it does away with the former slow and expensive method of meeting the custom-house requirements.

Prior to the conclusion of the convention with Mexico, July 1, 1887, it was forbidden to send through the mails exchanged between the United States and any foreign country, any article of merchandise having a merchantable value. The effect of these conventions, herein referred to, has been to remove the restrictions which previously existed on the transmission by mail of this class of mail matter, and there can be no doubt that it has and will continue to augment largely the trade relations with those countries without imposing additional burdens on the postal revenue of the United States, as the postage collected on such matter dispatched will more than equal the expenditure.

The conclusion of a parcel-post convention with Mexico is of special importance, as that country with its large population and with rapidly-developing industries, naturally looks to the United States for extending every possible aid in strengthening the bonds of commercial relations between the two great "sister Republics," whose interests are the same, and it will be found that new and hitherto almost inaccessible markets have been opened out to American merchants.

Parcel-post conventions are now pending with all the Central and South American States, and it is hoped that the time is not far distant when the "Three Americas" will be embraced in one grand parcel-post union, which will in its way aid this country in fulfilling its eventual mission, viz, to control the markets of this hemisphere and become the leader in its industrial and commercial progress.

#### THE UNIVERSAL POSTAL UNION DURING 1888.

During the fiscal year ended June 30, 1888, there have been the following additions to the Universal Postal Union:

	To take effect—
German protectorate:	
Territory of the New Guinea Company .....	Jan. 1, 1888
Territory of Togo, Western Africa .....	June 1, 1888
Territory of Southwest Africa .....	July 1, 1888
Territory of the Marshall Islands, in the Pacific .....	Oct. 1, 1888
Regency of Tunis .....	July 1, 1888

The German Empire has established a German post-office at Apia, Samoan Islands, thus virtually bringing these islands into the postal union.

The only new provision of interest is the following:

Paragraph 5, of Article XV, of the revised postal-union regulations has been modified as follows:

(5) With the exception of stamps for prepayment, and a label with the printed address of the addressee, which is to be pasted on the address side, and the dimensions of which must not exceed 5 centimeters by 6 centimeters, it is forbidden to join or to attach to postal-cards any articles whatsoever.

#### STATISTICS OF THE POSTAL SERVICE IN THE PRINCIPAL COUNTRIES OF THE UNIVERSAL POSTAL UNION.

The following statistics, like those in last year's report, have been taken from "General Statistics of the Postal Service," published by the International Bureau, Berne, Switzerland. The statistics cover the year 1886, and were published in 1888.

## INTERNATIONAL POSTAL CONGRESS OF VIENNA IN 1890.

So far three international postal congresses have been held: The first at Berne, Switzerland, in 1873, which created the General Postal Union; the second at Paris, in 1878, which created the Universal Postal Union, and the third at Lisbon, Portugal, in 1885, which in several respects modified the Paris Convention of 1878. Before the Lisbon Congress adjourned it resolved to meet again at Vienna, Austria, in 1890. The United States has been represented at each of the three congresses, and will, doubtless, also send delegates to the Vienna Congress, which promises to be one of unusual interest, in view of the many important questions—among the rest, that of doing away with all transit charges—which will come up for discussion. In the estimate for the fiscal year ending June 30, 1890, I have asked for an appropriation of \$5,000 to defray the expenses of the United States delegates, the same amount which was allowed for the delegates to the Lisbon Congress, and would suggest that our delegates be instructed to introduce a resolution before the Vienna Congress that the next International Postal Congress, probably to meet in 1895, be requested to meet at Washington.

## SPECIAL SERVICES MAINTAINED BY FOREIGN COUNTRIES.

In my report for 1886 I briefly referred to the collection service maintained by a great many countries belonging to the Universal Postal Union. In view of the possible introduction, at some future time, of this important service in the American postal system, I have deemed it proper to give below a detailed description of this service in Belgium, where it was first established, and where it has reached a high degree of development; and the latest statistics obtainable of this service in Belgium, France, and Germany.

## COLLECTION SERVICE.

The first country to introduce the collection service was Belgium, where it has been in existence since 1842, and where it has reached a high degree of perfection. Germany introduced the system in 1871; Switzerland in 1875; France in 1879; and Austria in 1882. The system has been introduced in several other European countries, and has met with universal favor, as is shown by the large number of collections made and the large amount of money collected.

## BELGIUM.—REGULATIONS GOVERNING THE COLLECTION SERVICE.

## COLLECTION OF BILLS (RECEIPTS, QUITTANCES).

The post-office will collect bills, the charges for such services being as follows:

For each bill not exceeding 20 francs (\$3.86), 10 centimes (2 cents).

For each bill exceeding 20 francs and up to 50 francs (\$9.65), 20 centimes (4 cents).

For each bill exceeding 50 francs and up to 100 francs (\$19.30), 30 centimes (6 cents).

For all bills exceeding 100 francs, an additional charge of 20 centimes (4 cents) is made for every 100 francs or fraction of 100 francs. These charges are paid by postage-stamps affixed to the bills by the senders.

The bills to be collected must be accompanied by a memorandum showing the names of the debtors and the amount of each bill. Forms for such memoranda are furnished to the senders free of charge. Private individuals are at liberty to print and sell such forms, provided they are entirely like those issued by the postal administration.

No bill is presented to the debtor more than twice. The second presentation can only be made twenty-four hours after the first, unless the debtor has manifested a desire to pay the bill sooner.

In case of non-payment at the second presentation, a notice is left at the residence of the debtor, requesting him to pay the bill at the post-office within twenty-four hours. After that time has elapsed the bill is considered uncollectible, and is returned to the sender. Bills are also returned which can not be collected owing to wrong indications, or to a change of residence of the debtors.

Bills which, for some cause, have not been collected can again be sent for collection, on payment of half of the charges given above. This privilege, however, only extends to the second presentation. All subsequent presentations are liable to the full charges. These presentations, consequently, give rise alternately to the full or the half-charge. The third presentation is assimilated with the first by a new bill; the fourth to the second, and so on, alternating the full and half charges. Bills which are again presented for collection, and the amount of which has been changed, only give rise to half the original charges at the second presentation, if the changed amount of the bill does not exceed the limit fixed for the levying of this charge. When the original charge does no longer correspond to the amount of the changed bill, it becomes liable to half of said charge, and in addition, to a charge calculated on the amount exceeding the maximum limit of the first charge. In case the amount of the bill is diminished, the half-charge is calculated on the new amount of the bill. The above mode of procedure, as regards subsequent presentations, is applicable to bills whose amount has been diminished.

#### ARTICLES SENT FOR COLLECTION ON DELIVERY.

There may be forwarded through the mails to destinations in Belgium, letters, newspapers, prints or business papers, to be delivered to the addressee on payment of a bill accompanying such articles. These articles must be prepaid, according to their different rates. Samples or small articles of merchandise, are admitted on the same conditions, if placed in sealed envelopes, or tightly packed. They must be prepaid at the letter rate of postage. All values to be collected (checks, receipts by an agent, protested drafts, returned, etc.) joined to a bill are only admitted as C. O. D. articles, if placed in a sealed envelope, and prepaid at letter rates of postage. All these articles can be registered, but they can only be insured if they consist of sealed letters. Registration and insurance are subject to the general postal regulations in this respect. The insured value need not necessarily correspond with the sum to be collected. The administration of posts is liable to the

same provisions of responsibility as those in force in the general postal service. Senders may demand delivery at the residence, by paying the charges for the special messenger. These articles must bear the address of the sender, as well as that of the addressee, and an indication of the amount to be collected.

All articles mentioned in one and the same bill must be put up in one package, but it is not permitted to comprise in this package articles for which there is no combined rate, *e. g.*, a letter and a book. No more than one bill can be joined to one and the same article. C. O. D. articles are subject to the general prohibitory conditions, *viz*, the exclusion of articles which, on account of their nature, are a cause of danger to the postal employés, or to the correspondence; the prohibition to insert in articles which have neither been registered nor insured, values on bearer exceeding 5 francs (96½ cents) or pieces of coin; the prohibition to forward by mail gold or silver substances, jewelry, or other precious articles.

C. O. D. articles are mailed at the post office windows, accompanied by a memorandum on which they are entered in detail. As regards bills, the address of the sender and of the addressee must be given, and mention must be made that payment is made on delivery of the article. Such payment is proof of the receipt of the article by the addressee. Each bill is attached to the article to which it relates. When this article is a non-registered article of printed matter, the bill may be written below the address. The articles are sorted, and put up in bundles by the office of destination, and are entered in the same order on the list. Registered, insured, special-delivery, and "poste restante" articles are entered on special lists. Bills must be prepaid singly by means of postage-stamps, at the ordinary rates of postage for bills, but at the minimum rate of 15 centimes (3 cents).

Forms are furnished free of charge by the post-offices. The office of mailing gives the sender a receipt. Articles which are neither registered nor insured are delivered on payment of the bill. If the article is either registered or insured, the addressee must sign a receipt for it in the letter-carrier's book. Articles which, after having been presented twice to the addressee, have not been accepted by him, and are not claimed within forty-eight hours, are considered as refused. "Poste restante" articles, however, are kept at the disposal of the addressee for one month, unless the sender has, on the address, given a shorter period of retention. Articles whose addressees have changed their residence, or whose address is incorrect, are considered as undeliverable. All articles which, for some reason, can not be delivered, are returned to the sender as soon as possible. He may again mail them for collection, after having corrected the address, if necessary, on prepayment for the second presentation of half the postage-rates for bills (the minimum being 10 centimes, equal 2 cents), and another complete prepayment of the article in question. The settling of the account with the sender is done by the postmaster of the office of mailing, who pays the entire amount of the collected bills, and delivers returned articles and bills.

#### BILLS OF EXCHANGE, ETC.

##### (1) *Acceptance of bills.*

The administration of posts undertakes to present, in all places in the Kingdom of Belgium, bills of exchange, etc., at the acceptance of the drawees or persons indicated to accept in behalf of the drawees.

The administration also undertakes to prepare protests in case of non-acceptance, and the documents proving acceptance, or refusal of acceptance by intervention. Bills are not presented to third parties except in the place where the drawee resides, or in a place within the district served by one and the same post-office.

The rate is 20 centimes (4 cents) for each bill. This charge must be paid by means of postage stamps affixed to the bills by the senders.

Bills originating in foreign countries, to be presented for acceptance, must, as a general rule, when mailed, have attached to them adhesive stamps representing the charge to be levied in Belgium. If this has not been done, the amount of this charge is collected from the drawee, previous to affixing his signature for acceptance. In case of refusal to accept by the drawee, for the sole reason that he does not intend to pay the stamp charge, the sender is immediately informed, and the bill can only be protested after having this stamp affixed, or an indorsement for this stamp put on it. Bills must comply with the conditions fixed by the laws and regulations governing such papers.

Bills can not be accompanied by any other article but the list of the bills, unless the accompanying articles are regularly prepaid at the rates of postage applicable to them. Bills sent for acceptance can be mailed at any post-office, at the latest a fortnight before the date of maturity. They can also be mailed on a provisional receipt at postal agencies; but in that case the bills and the general list must be placed by the sender in a sealed envelope addressed to the postmaster of the post-office to which the postal agency is subordinate, their conveyance to such postmaster being free of charge. In mailing bills to be presented for acceptance senders must observe the following rules: Bills must be classified by destinations of collection; for each destination a list is prepared, on which the bills are entered in detail; those which are to be protested in case of non-acceptance must be marked in the list with the letter "P;" bills destined for localities in which there is no post-office must be comprised in the collection list of the post-office by which these localities are served.

Bills to be accepted, if necessary, by a third party, are entered in the list separately, after the other bills. The names of the third parties must be given after the names of the drawees. The bills and the list are placed in a sealed envelope with the heading "bills for acceptance," and bearing the name of the destination of collection, and the signature or printed fac-simile of the signature of the sender, or the impression of a stamp bearing his name. All the articles are then repeated in a recapitulatory list, which alone must positively bear the manuscript signature of the sender. The list and the recapitulatory list must be furnished by the senders, and must be in conformity with the models published by the administration. The postmaster, after verifying the bills, gives to the sender a receipt showing the number of articles received.

The postmaster of the office of destination immediately informs the sender, by mail, of any difference which he may have discovered as regards the number of bills, and of any errors in the indications of the list.

Bills which have gone astray, irregular or insufficiently prepaid bills, are at once returned to the sender, by mail. Such bills may again be presented, after the error has been corrected, without any additional charge.

Bills are always presented for acceptance at the residence of the drawee; if he personally makes the request, the bill may be left in his hands (on signing a receipt) for twenty-four hours. Bills are only presented once. If the drawee is not at home, or if from some other cause

the bill could not be presented to him, the postmaster sends a notice to the residence of the drawee, asking him to give his acceptance at the post-office within twenty-four hours.

If the drawee refuses to accept a protested bill, or if he accepts it irregularly, the fact is recorded by an act of protest. If the person to whom the bill is presented for acceptance refuses to return it, no protest is prepared. In that case the receipt for the bill is sent to the remitter.

The bill which has been refused by the drawee is, after due notice of the protest, if necessary, immediately presented to all the persons indicated for acceptance in case of need. There is prepared for each one of the persons, as the case may be, an act of intervention, or a protest in default of acceptance. These acts are thereupon, on payment of the expenses, transmitted to the intervening party, who effects most discharges, and who alone is permitted to enter his acceptance on the bill.

It is prohibited under penalty of the law to cover the impression of the stamp with writing.

Accepted bills, and those which have been refused acceptance, are returned as soon as possible, with the acts of protest if necessary, to the postmaster of the office of mailing, to be delivered by him to the sender, on payment of the expenses, and of the fee for a money-order intended to transit the amount expended to the postmaster who has advanced the money.

(2) *Cashing of bills of exchange.*

The administration of posts admits for cashing, on the part of any establishment and any person, bills, with or without protest, on all places in the kingdom.

Bills which have become due, that is to say, where the legal date of their being due has passed, are admitted and considered payable on sight. Bills to be cashed can be mailed at any post-office.

The fees for cashing are as follows: Ten centimes (2 cents) for 100 francs (\$19.30) or fraction of 100 francs, up to 1,000 francs (\$193), but not less than 25 centimes (5 cents). For bills above 1,000 francs a charge of 50 centimes (10 cents) is made for every 1,000 francs or fraction of 1,000 francs. These fees or charges must be paid by postage-stamps affixed by the senders to the back of the bills before they are mailed, care being taken not to cover the impression of the stamp with writing.

Under the generic name of commercial papers, the law which authorizes the cashing of these papers by mail comprises not only bills of exchange or orders, and bills payable to order, but also promissory notes, bonds received by intervention, checks, letters of credit, etc.

To be admitted for cashing these papers must (1) comply with the conditions of form, etc., required by the laws and regulations on the subject, and must particularly bear a stamp, if necessary; (2) express in Belgian currency the amount of the bill or note, whenever that amount is given in a foreign currency; (3) they must have the receipt of the bearer (*i. e.* the person who holds the papers in the last place, and who mails them for cashing), or of his attorney; as the administration simply acts as collector, bills cannot be indorsed to its agents; (4) not bear any other writing than what is required in the ordinary forms for such papers, and not be accompanied by any other paper but by a duplicate, which eventually may be joined to it, to justify acceptance by the debtor or payment of stamp-dues. The bearer, however, may, if he deems proper, inclose with the bill other papers on condition of placing

them under an addressed band or in an addressed envelope, and prepaying them at the ordinary rates of postage. Bills payable by intervention are only admitted when the persons indicated to pay, in case of need, live in the same borough as the drawee, or debtor, or within a district served by the same post-office.

There are subject to proportional stamp-dues: Negotiable or commercial bills, non-negotiable notes and bonds, and orders on account or from place to place. These dues are as follows: For bills, etc., of 200 francs (\$33.60) and below, 10 centimes (2 cents); 200 francs up to 500 francs (\$96.50), 25 centimes (5 cents); 500 francs up to 1,000 francs (\$193), 50 centimes (10 cents); 1,000 francs up to 2,000 francs (\$386), 1 franc (19.3 cents); and above that sum, 50 centimes for every 1,000 francs.

Non-negotiable papers, *i. e.*, papers by which a person directs another person to pay to his order a certain fixed sum, and signs a receipt, without indorsing to a third person, are subject to the stamp dues required by the dimension of the paper used. They are also admitted when on paper to which the proportional stamp is affixed. The administration, however, assumes no responsibility for any fines to which such papers may become liable, in case of protest, for violating the stamp laws.

The proportional dues are likewise applicable to negotiable papers originating abroad and payable in Belgium. These dues may be paid by pasting an adhesive stamp on the back of the paper, or on the first place on the front not covered by writing. The duty to affix the adhesive stamp devolves on the first person in Belgium who affixes his signature to a paper originating abroad. The stamp must be canceled by writing across it the date and signature, or by impressing a printed fac-simile of the signature. Each stamp must be canceled in this manner. Checks, clearing orders, letters of credit, bank bills to order, and all other bills payable on account, or on sight, from disposable funds, are exempt from stamp dues. There are also exempt from stamp dues second, third, fourth, etc., bills of exchange, when the first is drawn on stamped paper, or indorsed for a stamp, or furnished with an adhesive stamp. In that case, it is indispensable that the first should be joined to the one which is put in circulation and is intended to receive indorsements, acceptances, guaranties, or receipts.

A check and its similars, issued payable at a fixed date, are subject to the proportional stamp dues. An originally regular check loses the benefit of exemption from stamp dues if it forms the subject of an indorsement in favor of the bearer who affixes to it his signature of receipt, and then becomes a non negotiable bill.

Receipts by intervention, implying a negotiation between signers, are subject to the proportional stamp dues. When papers of this kind only bear the signature of the person issuing the paper, without the intervention of the designated third party for indorsement or receipt, they retain the character of simple receipts.

Persons mailing bills to be cashed must observe the following rules: The papers must be classified by offices of destination, and must be entered on a separate list for each office. Bills becoming due on different days of one and the same month, as well as bills due and payable on sight, may be mailed at the same time and entered on the same list.

Bills which are due or payable on sight, mailed in the course of one month, can not be comprised in the same list with bills, etc., becoming due the next month. The senders must indicate at the head of the lists the different dates when the different bills become due; they are

entered in the accompanying lists, by order of date when becoming due, commencing with the nearest date. Bills, etc., which have become due, or payable on sight, are entered separately after the others. Senders must indicate in the lists by the letter "P" the papers which should be protested in case of non-payment. The officers of the cashing post-office will strictly follow these indications. Bills payable by intervention in case of need must be mentioned as such, in a separate column of the lists, the names of the third parties or the acceptors being entered after the name of the drawee or debtor. The bills, etc., for one and the same office, accompanied by their lists, are placed in a gummed envelope, left open, which must bear as a heading the word "encaissement"—cashing—the name of post-office of destination, and the signature, or printed fac-simile of the signature of the sender.

All the articles sent at one time by one and the same person are recapitulated in a general list, to be made out in duplicate, on which list the sender obligates himself to pay all the expenses of protest and registration, as well as any fines to which these papers may give rise. Only this list must positively bear the manuscript signature of the sender. The subdivision by dates of falling due is not made in the recapitulatory lists where, without regard to date, the bills are entered by offices of destination. Commercial papers to be cashed should be mailed, at the earliest, fifteen days, and, at latest, four days, before they become due. After that period has elapsed they are still received, but the administration does not guaranty to perform in proper time the services of collection and protest. The post-office likewise undertakes, at the request of the senders and at their risk, to ascertain the non-payment of bills which have become due and which have been delivered too late to allow of the protest being made within the period allowed by law. Bills, etc., to be cashed in a district having only a postal agency, or in places where there is no post-office, must be addressed to the post-office serving such district or place; and they are entered on the list intended for that post-office. The lists referred to are furnished by the persons interested, and must conform to the models provided by the administration of posts.

The postmaster, after having verified and, if necessary, corrected the lists handed him by the sender, furnishes him with a receipt, giving the number of articles, the dates when the papers become due, the total amount of the sums to be cashed, and the date of mailing. Bills which are in any way irregular or incorrect are taken off the lists and returned to sender.

When bills are mailed at a postal agency, the sender must place the bills and the general lists in a sealed envelope addressed to the postmaster of the post-office serving the agency. The agent gives a provisional receipt for the article, which is considered as a registered letter, and the postmaster of the post-office serving the agency will transmit to the sender an acknowledgment made out in due form.

Irregular bills, or bills which having gone astray have escaped the verification of the office of mailing, are immediately returned by the office of destination and delivered to the sender on his giving a receipt therefor. The sender may, after correcting the bill, and at his risk, send it as a supplementary article to the cashing office, up to the evening of the day preceding the date when it becomes due, without having to pay another fee for cashing. In this case it becomes necessary to prepare new lists.

Bills, etc., to be cashed are presented to the debtors when they fall due, and those payable on sight or which have become due, as soon as

possible. Postmasters are only obliged to present them once. Postmasters must accept partial payments offered on the amount of bills of exchange, orders, bills to order, and checks. They must cause these bills, if necessary, to be protested for the remainder. The amount of a bill which has been paid can not, on any pretext whatever, be refunded to the debtor. Liquidation, however, is deferred if the person interested causes opposition to be made by means of an attachment in accordance with the prescribed forms.

If the debtor is not at home, or if for some reason the bill is not paid on presentation, the letter-carrier leaves at the residence of the debtor a notice requesting him to come to the post-office and pay the bill there. Bills which have not been paid, if indicated as subject to protest, necessitate the notification to the drawee of an act of protest.

If a bill refused by the drawee indicates the persons charged to pay in case of need, it is presented to all these persons. If the bill is subject to protest, there is prepared for every person interested either an act of intervention or a protest on account of refusal. After having been duly recorded all the papers and the bill are delivered, on payment of the principal and all the expenses, to the one of the intervening persons who effects most discharges. A protested bill can be paid by any person (even one not designated on the bill) who offers to intervene for the drawee or one of the indorsers; but in that case an act of intervention is only prepared if the party interested requests it. Payment by a third party of a bill, the debtor of which is not known in the place indicated by the drawee, is only accepted after protest.

Postmasters are not authorized to receive funds transmitted to them direct for paying a bill cashed by them. A bill mailed for cashing can only be returned to the sender after having been protested to the debtor and to the persons indicated for paying if need be, and in case of non-payment, after having been protested, if necessary. The only exception from this rule is made in case the debtor has failed or died, or in case of a non-negotiable paper, a bill to order, or a promissory note which has not been indorsed by any one.

The drawee reserves to himself the right to discharge the debt, after protest has been prepared, as long as this protest has not been returned to the sender, but on the express condition that he will pay the expenses occasioned by the protest. If necessary, the postmaster of the office of mailing is notified of payment. Bills which have not been paid are, after having gone through all the prescribed formalities, returned as soon as possible with the protests and refusals of intervention, if necessary, to the office of mailing. This office delivers all the papers to the sender, on payment of the expenses, including the money-order fee for transmitting the amount to the office which has advanced it.

Settlement of accounts with the senders is made exclusively by the second direction of posts, which makes out, as soon as possible, on the duplicate general lists furnished by the senders, the total amount of the sums cashed.

If senders request it, a portion of the amount of the sums to be cashed on bills sent for collection by mail is paid to them on account. This request must be entered on the recapitulatory list in the column of "observations." Payments on account are made in round figures (hundreds of francs), and can not be less than 1,000 francs. Such payments are generally comprised in the liquidations made by the administration of posts on the third day after maturity. Payments of 1,000 francs and more are made by letters of credit on one of the agencies of the national bank to be designated beforehand. Payments of sums less

than 1,000 francs are made by money-orders issued in favor of the senders. Persons living in a place where there is no agency of the national bank can get letters of credit cashed at the post-office where the bills, etc., have been mailed, but only to such an extent as the condition of the funds of the post-office will permit. Letters of credit, or orders issued in payment of commercial papers, are only paid on the receipt of the person in whose favor they are drawn, or his attorney.

### 3. *Protests.*

Bills which are to be protested owing to their not having been accepted or paid are delivered in due time to a sheriff. In places where there is no sheriff, or if the sheriff residing in the place is from some cause prevented, protests are delivered by a postal employé. Non negotiable values can only be protested by the sheriff. The postal agent or the sheriff who prepares an act of protest leaves at the residence of the person interested a notice giving the name and residence of the bearer who has requested the protest, the name of the postal agent or the sheriff, and the amount of the protested bill. The administration of posts does not accept a simple declaration in place of a protest.

Postal employés receive (1) for a simple protest, or for the first protest, francs 1.50 (28.9 cents). (2) For other acts relating to one and the same bill, 1 franc (19.3 cents) per act, and per residence where delivered.

### COLLECTION OF DIVIDEND COUPONS OF THE PUBLIC DEBT, AND CASHING OF COUPONS OF ALL KINDS PAYABLE IN BELGIUM.

This new service is established by royal ordinance, dated 23d September, 1883. The following are the regulations governing it:

(1) The postal administration shall pay on presentation, during the hours the post-offices are open to the public, and free of charge, the dividend coupons of the ordinary public debt of the state, when due.

There shall be paid, on the same conditions, but with application of the fee fixed by article 4 (see below) the coupons of bonds of the "*Caisse des Annuités*" due by the state; the coupons of preference shares and bonds of the "*Grande Compagnie du Luxembourg*," and the coupons of bonds of the "*Crédit Communal*." These payments shall be effected, within the limits of the funds in hands, by all the first and second class post-offices in the kingdom. The inhabitants of rural communes shall be allowed to avail themselves of the medium of the rural messengers for these collections.

(2) The postal administration shall effect, for the account of the bearers, the collection of dividend and interest coupons on various shares and bonds, as well as of the redeemable securities, which are payable in Belgium.

(3) With the exception of the coupons of the ordinary public debt, all coupons and securities presented for payment or collection must be accompanied by a descriptive list, the form of which shall be furnished by the administration; it shall bear the engagement undertaken by the depositor to reimburse the amount of the coupons which may have been paid wrongly, should such a case occur. A separate list shall be drawn up for each kind of security or coupon, and for each due-date. The articles shall be received for collection at any time, but not earlier than fifteen days previous to their due-dates. The list of paid coupons shall be kept at the disposal of the parties interested during a delay of one year.

(4) The coupons of all kinds, except those of the ordinary debt of the state, presented for payment or collection shall be subject to the following fees: (a) A fixed fee of 2 centimes per coupon; (b) a proportional fee calculated on the total amount of each list, at the rate of 2 centimes per 10 francs or fraction of 10 francs. These combined fees shall be rounded off per 5 centimes by raising the fractions; they shall be paid in advance by means of postage-stamps, and shall be in no case returned. The securities deposited for redemption shall be subject, as far as the fee is concerned, to the same conditions as the bills of exchange deposited for collection.

(5) The postal administration shall be empowered to receive as deposits in the post-office savings-bank, without charging any commission, certain coupons, to be designated in concert with the administration of the bank in question.

(6) The administration shall be responsible, except in the case of "force majeure," for the value of the coupons and securities deposited in its offices for collection in the regular course of business.

(7) The minister of public works shall take the necessary measures to insure the carrying out of the present ordinance, which shall come into force on the 1st October, 1883.

The principal object kept in view by the Belgian administration in organizing the collection of coupons, and in thus affording to the owners of stocks the greatest facilities for the collection of their income at any place, was to promote the investment of money in securities among all classes of society.

In Belgium there are bonds of the debt of the state of the value of 100 francs, and a considerable number of city bonds (about 5,000,000), likewise of 100 francs, bearing an interest of 3 per cent. and redeemable at a premium.

All these securities, which are an excellent investment for people of small income, ought to be made particularly popular, so as to serve as the complement of the post-office savings-bank; and we have no doubt that this measure will have a considerable effect on the welfare of the masses and the important interests of society.

## APPENDIX A.

*Postal convention between the United States of America and the Dominion of Canada.*

For the purpose of making better postal arrangements between the United States of America and the Dominion of Canada, the undersigned William F. Vilas, Postmaster-General of the United States of America, and Archibald Woodbury McLelan, Postmaster-General of the Dominion of Canada, by virtue of authority vested in them by law, have agreed upon the following articles:

## ARTICLE 1.

(a) Articles of every kind or nature, which are admitted to the domestic mails of either country, except as herein prohibited, shall be admitted to the mails exchanged under this Convention; subject however to such regulations as the postal administration of the country of destination may deem necessary to protect its custom revenues. But articles other than letters in their usual and ordinary form, must never be closed against inspection but must be so wrapped or inclosed that they may be readily and thoroughly examined by postmasters or customs officers.

The following articles are prohibited admission to the mails exchanged under this Convention:

Publications which violate the copy-right laws of the country of destination; packets, except single volumes of printed books, the weight of which exceeds two kilograms; liquids, poisons, explosive or inflammable substances, fatty substances, those which easily liquefy, live or dead animals (not dried), insects and reptiles, confectations, pastes, fruits and vegetables which will easily decompose, and substances which exhale a bad odor, lottery tickets or circulars, all obscene and immoral articles, other articles which may destroy or in any way damage the mails, or injure the persons handling them.

(b) Except as required by the regulations of the country of destination for the collection of its custom duties, all admissible matter mailed in one country for the other, or received in one country from the other, whether by land or sea conveyance, shall be free from any detention or inspection whatever, and shall in the first case be forwarded by the most speedy means to its destination, and in the latter be promptly delivered to the respective persons to whom it is addressed, being subject in its transmission to the laws and regulations of each country respectively.

(c) The classification of, and the rates of postage and the registration fee to be levied and collected upon mail matter originating in either country and addressed to the other, shall be in accordance with the domestic laws and regulations of the country of origin; provided that the rates of postage and registration fees so levied shall not exceed in either country the minimum rates of postage and registration fee prescribed for articles of a like nature by articles 5 and 6 of the Universal Postal Union Convention of Paris of June, 1878, as amended by the additional act of Lisbon of March 21, 1835.

## ARTICLE 2.

(a) Each administration shall retain to its own use the whole of the postages and registration fees it collects on postal articles exchanged with the other, including deficient postage. Consequently, there will be no postage accounts between the two countries.

(b) Full prepayment of postage shall be required in both countries upon correspondence of all kinds, except letters upon which prepayment of at least one full rate shall be compulsory. Payment of postage and registration fees shall be certified by affixing the appropriate stamps of the country of origin.

(c) Each insufficiently prepaid letter shall have stamped on its cover the capital letter T, and shall have indicated plainly thereon, in figures, on the upper left-hand corner of the address, by the postal officials of the country of origin, the amount of the deficient postage, and only the amount so indicated shall be collected of addressees on delivery, except in cases of obvious error.

## ARTICLE 3.

\*No postage charges shall be levied in either country on fully prepaid correspondence originating in the other, nor shall any charge be made in the country of destination upon official correspondence which under the postal regulations of the country of origin is entitled to freedom from postage; but the country of destination will receive, forward, and deliver the same free of charge.

## ARTICLE 4.

In case any correspondence is tendered for mailing in either country obviously with the intention to evade the higher postage rates applicable to it in the other country, it shall be refused, unless payment be made of such higher rates.

## ARTICLE 5.

(a) Exchanges of mails under this convention, whether by sea or overland, shall be effected through the post-offices of both countries already designated as exchange post-offices, or through such others as may be hereafter agreed upon, under such regulations relative to the details of the exchanges as may be mutually determined to be essential to the security and expedition of the mails and the protection of the customs revenues.

(b) Each country shall provide for and bear the expense of the conveyance of its mails to the other; or if by agreement the conveyance in both directions in overland exchanges, other than by railway, is provided by one of them, the expense of transportation shall be shared between them in proportion to the distance traveled over the territory of each.

## ARTICLE 6.

The United States of America and the Dominion of Canada each grants to the other, free of any charges, detention, or examination whatsoever, the transit across its territory, of the *closed* mails made up by any authorized exchange office of either country, addressed to any other exchange office of the same country, or to any exchange office of the other country.

## ARTICLE 7.

(a) Any packet of mailable correspondence may be registered upon payment of the rate of postage and the registration fee applicable thereto in the country of origin.

(b) An acknowledgment of the delivery of a registered article shall be returned to the sender when requested; but either country may require of the sender prepayment of a fee therefor not exceeding five cents.

## ARTICLE 8.

(a) Overland exchanges of ordinary international correspondence may be effected without the use of letter-bills, but registered correspondence must be accompanied by a descriptive list thereof, by means of which the registered articles may be identified for the purpose of acknowledgment by the receiving offices.

(b) If a registered article advised shall not be found in the mails by the receiving office its absence shall be immediately reported by the receiving to the sending office.

## ARTICLE 9.

Ordinary and registered exchanges, unless the latter be made in through registered pouches, shall be effected in properly sealed sacks.

## ARTICLE 10.

(a) All registered articles, ordinary letters, postal cards, and other manuscript matter, business or commercial papers, books (bound or stitched), proofs of printing, en-

gravings, photographs, drawings, maps, and other articles manifestly of value to the sender, which are not delivered from any cause, shall be reciprocally returned monthly without charge, through the central administrations of the two countries, in special packets or sacks marked "Rebuts," after the expiration of the period for their retention required by the laws or regulations of the country of destination; the returned registered articles to be accompanied by a descriptive list, and the special packets or sacks used for returning undelivered matter to be forwarded under registration when registered articles are returned in them.

(b) Fully prepaid letters which bear requests by the senders for their return in case of non-delivery by a certain date, or within a specified time, shall be reciprocally returned, without charge, directly to the despatching exchange office, at the expiration of the period for their retention indicated in the requests.

(c) Fully prepaid letters bearing on the covers the business cards, the names and addresses of the senders or designation of places to which they may be returned, as post-office box, street and number, &c., without requests for their return in case of non-delivery within a specified time, shall be reciprocally returned without charge directly to the despatching exchange office, at the expiration of thirty days from the date of their receipt at the office of destination.

#### ARTICLE 11.

All matters connected with the exchange of mails between the two countries, which are not herein provided for, shall be governed by the provisions of the Universal Postal Union Convention and Regulations now in force, or which may hereafter be enacted, for the governance of such matters in the exchanges of mails between countries of the Universal Postal Union generally, so far as the articles of such Universal Postal Union Convention shall be obligatory upon both of the contracting parties.

#### ARTICLE 12.

The Postmaster-General of the United States of America, and the Postmaster-General of the Dominion of Canada, shall have authority to jointly make such further regulations of order and detail as may be found necessary to carry out the present Convention from time to time; and may by agreement prescribe conditions for the admission to the mails of any of the articles prohibited by Article 1.

#### ARTICLE 13.

This Convention abrogates the special postal convention between the two countries signed at the city of Washington the first day of February, 1875, and at Ottawa the twenty-seventh day of January, 1875. It shall be ratified by the contracting countries in accordance with their respective laws, and its ratification shall be exchanged at the city of Washington as early as possible, not later than one month from this date. It shall take effect on the first day of March, 1888, and shall continue in force until terminated by mutual agreement, or annulled at the instance of the Post-Office Department of either country, upon six months previous notice given to the other.

Done in duplicate and signed at Washington the twelfth day of January, one thousand eight hundred and eighty-eight, and at Ottawa the nineteenth day of January, 1888.

AMENDMENT TO POSTAL CONVENTION BETWEEN THE UNITED STATES AND CANADA  
OF JANUARY, 1888.

For the purpose of establishing a uniform rate of postage upon certain mail-matter exchanged between the United States of America and the Dominion of Canada, the undersigned, Don M. Dickinson, Postmaster-General of the United States of America, and Archibald Woodbury McLelan, Postmaster-General of the Dominion of Canada, by virtue of authority vested in them by law, have agreed upon the following amendment to the Postal Convention between the two contracting countries signed at Washington the 12th day of January, 1888, and at Ottawa the 19th day of January, 1888.

## ARTICLE 1.

Amend article 1, paragraph C, of the above referred-to convention, so as to establish a uniform rate of postage of 1 cent per ounce upon all merchandise, and 1 cent per 2 ounces upon all books, pamphlets, occasional publications, printed circulars, price-currents, hand-bills, book and newspaper manuscript, printer's proof-sheets (whether corrected or not), maps, prints, advertising sheets, drawings, engravings, lithographs, photographs, sheet music (whether printed or written), documents wholly or partly printed or written, such as deeds, insurance policies, or other documents of like nature exchanged in the mails between the two contracting countries; and to establish that the registration charge, in addition to postage on correspondence passing between the United States and Canada, shall be a rate of not less than 5 cents and not exceeding 10 cents in either country.

## ARTICLE 2.

This arrangement shall take effect upon the 1st day of May, 1888, and shall continue in force until terminated by mutual agreement, or annulled at the instance of the Post-Office Department of either country upon six months' previous notice given to the other.

Done in duplicate and signed in Washington, April 27, 1888, and in Ottawa April 25, 1888.

## APPENDIX B.

*Postal convention between Jamaica and the United States of America.*

For the purpose of making better postal arrangements between Jamaica and the United States of America, the undersigned, Sir Henry Wylie Norman, G. C. B., G. C. M. G., C. I. E., governor of Jamaica, and William F. Vilas, Postmaster-General of the United States of America, by virtue of authority vested in them by law, have agreed upon the following articles for the establishment of a parcels-post system of exchanges between the two countries.

## ARTICLE I.

The provisions of this Convention relate only to parcels of mail matter to be exchanged by the system herein provided for, and do not affect the arrangements now existing under the Universal Postal Union Convention, which will continue as heretofore; and all the agreements hereinafter contained apply exclusively to mails exchanged under these articles, *directly* between the office of New York, in the State of New York, and such other offices within the United States as may be hereafter designated by the Postmaster-General of the United States, and the office of Kingston, Jamaica, and such other offices within the Island of Jamaica as may be hereafter designated by the Postmaster of Jamaica; such matters to be admitted to the mails under these articles as shall be sent through such exchange offices from any place in either country to any place in the other.

## ARTICLE II.

There shall be admitted to the mails exchanged under this Convention, articles of merchandise and mail matter except letters, post-cards, and written matter of all kinds that are admitted under any conditions to the domestic mails of the country of origin, except that no packet must exceed 11 pounds (or 5 kilograms) in weight, nor the following dimensions: Greatest length in any direction, 2 feet; greatest girth, 4 feet; and must be so wrapped or inclosed as to permit their contents to be easily examined by postmasters and customs officers; and except that the following articles are prohibited:

Publications which violate the copyright laws of the country of destination; poisons, and explosive or inflammable substances; fatty substances, liquids, and those which easily liquify, confections and pastes; live or dead animals, except dead insects and reptiles when thoroughly dried; fruits and vegetables, and substances which exhale a bad odor; lottery tickets, lottery advertisements, or lottery circulars; all obscene or immoral articles; articles which may in any way damage or destroy the mails, or injure the persons handling them.

## ARTICLE III.

A letter or communication of the nature of personal correspondence must not accompany, be written on, or inclosed with any parcel.

If such be found, the letter will be placed in the mails if separable, and if the communication be inseparably attached, the whole package will be rejected. If, however, any such should inadvertently be forwarded, the country of destination will collect double rates of postage according to the Universal Postal Union Convention.

No parcel may contain parcels intended for delivery at an address other than that borne by the parcel itself. If such inclosed parcels be detected, they must be sent forward singly, charged with new and distinct parcel-post rates.

## ARTICLE IV.

The packages in question shall be subject in the country of destination to all customs duties and all customs regulations in force in that country for the protection of its customs revenues, and to the following rates of postage, which shall in all cases be required to be fully prepaid with postage-stamps of the country of origin, viz:

In the United States, for a parcel not exceeding 1 pound in weight, 12 cents; and for each additional pound, or fraction of a pound, 12 cents.

In Jamaica, for a parcel not exceeding 1 pound in weight, 6 pence, and for each additional pound, or fraction of a pound, 6 pence.

## ARTICLE V.

The sender of each package must make a *Customs Declaration*, pasted upon or attached to the package, upon a special form provided for the purpose (see Model 1, "A," annexed hereto), giving a general description of the parcel, an accurate statement of the contents and value, date of mailing, and the sender's signature and place of residence, and place of address.

The sender will, at the time of mailing the package, receive a certificate of mailing from the post-office where the package is mailed, on a form like Model 2, annexed hereto.

The sender of a package may obtain a return receipt for the same by paying in the United States a fee of 5 cents, and in Jamaica 2 pence, in addition to the postage on each packet, to be affixed to the packet in stamps of the country of origin.

The sender of a package may have the same registered by paying the registration fee required for registered articles in the country of origin, and will receive the return receipt without special charge therefor.

## ARTICLE VI.

The addressees of registered articles shall be advised of the arrival of a package addressed to them, by a notice from the post-office of destination.

The packages shall be delivered to addressees in the country of destination free of charge for postage; but the customs duties properly chargeable thereon shall be collected on delivery in accordance with the customs regulations of the country of destination; and the country of destination may, at its option, levy and collect from the addressee for interior service and delivery a charge not exceeding 5 cents in the United States and 2½ pence in Jamaica on each single parcel of whatever weight; and if the weight exceeds 1 pound, a charge equal to 1 cent or 1 half-penny for each 4 ounces of weight or fraction thereof.

## ARTICLE VII.

The packages shall be considered as a component part of the mails exchanged direct between the United States and Jamaica, to be dispatched by the country of origin to the other at its cost and by such means as it provides, but must be forwarded, at the option of the dispatching office, either in boxes prepared expressly for the purpose or in ordinary mail sacks, to be marked "Parcel post," and not to contain any other articles of mail matter, and to be securely sealed with wax, or otherwise, as may be mutually provided by regulations hereunder.

Each country shall promptly return *empty* to the dispatching office by next mail, all such bags and boxes, but subject to other regulations between the two administrations.

Although articles admitted under this convention will be transmitted as aforesaid between the exchange offices, they should be so carefully packed as to be safely transmitted in the open mails of either country, both in going to the exchange office in the country of origin and to the office of address in the country of destination.

Each dispatch of a parcel-post mail must be accompanied by a descriptive list, in duplicate, of all the packages sent, showing distinctly the list number of each parcel, the name of the sender, the name of the addressee with address of destination, and the declared contents and value; and must be inclosed in one of the boxes or sacks of such dispatch. (See Model 3 annexed hereto.)

## ARTICLE VIII.

As soon as the mail shall have reached the office of destination, that office shall check the contents of the mail.

In the event of the parcel bill not having been received, a substitute should be at once prepared.

Any errors in the entries on the parcel bill which may be discovered, should, after verification by a second officer, be corrected and noted for report to the dispatching

office on a form, "Verification certificate," which should be sent in the special envelope.

If a parcel advised on the bill be not received, after the non-receipt has been verified by a second officer, the entry on the bill should be canceled and the fact reported at once.

If a parcel be observed to be insufficiently prepaid, it must not be taxed with deficient postage, but the circumstance must be reported on the verification certificate form.

Should a parcel be received in a damaged or imperfect condition, full particulars should be reported on the same form.

If no verification certificate or note of error be received, a parcel mail shall be considered as duly delivered, having been found on examination correct in all respects.

#### ARTICLE IX.

If a package can not be delivered as addressed, or is refused, the sender will be communicated with through the central administration of the office of destination, as to the manner in which he desires the package to be disposed of, and if no reply is received from him within a period of three months from the date of the notice, the package may be sold for the benefit of whom it may concern.

An order for redirection or reforwarding must be accompanied by the amount due for postage necessary for the return of the article to the office of origin, at the ordinary parcel rates.

When the contents of a parcel which can not be delivered are liable to deterioration or corruption, they may be destroyed at once, if necessary, or if expedient, sold, without previous notice or judicial formality, for the benefit of the right person, the particulars of each sale being noticed by one post-office to the other.

#### ARTICLE X.

The Post-Office Department of either of the contracting countries will not be responsible for the loss or damage of any package, and no indemnity can consequently be claimed by the sender or addressee in either country.

#### ARTICLE XI.

Each country shall retain to its own use the whole of the postages, registration and delivery fees, it collects on said packages; consequently, this convention will give rise to no separate accounts between the two countries.

#### ARTICLE XII.

The Postmaster-General of the United States of America, and the Postmaster of Jamaica, shall have authority to jointly make such further regulations of order and detail as may be found necessary to carry out the present convention from time to time; and may, by agreement, prescribe conditions for the admission in packages exchanged under this convention of any of the articles prohibited by Article II.

#### ARTICLE XIII.

This convention shall take effect and operations thereunder shall begin on the first day of October, 1887, and shall continue in force until terminated by mutual agreement, but may be annulled at the desire of either Department, upon six months' previous notice given to the other.

Done in duplicate, and signed at Washington the twenty-second day of July, 1887, and at Kingston the third day of September, 1887.

## APPENDIX C.

*Postal convention between Barbados and the United States of America.*

For the purpose of making better postal arrangements between Barbados and the United States of America, the undersigned, Sir Charles Cameron Lees, K. C. M. G., Governor of Barbados, and William F. Vilas, Postmaster-General of the United States of America, by virtue of authority vested in them by law, have agreed upon the following articles for the establishment of a parcels post system of exchanges between the two countries.

## ARTICLE I.

The provisions of this Convention relate only to parcels of mail matter to be exchanged by the system herein provided for, and do not affect the arrangements now existing under the Universal Postal Union Convention, which will continue as heretofore; and all the agreements hereinafter contained apply exclusively to mails exchanged under these articles, *directly* between the office of New York, in the State of New York, and such other offices within the United States as may be hereafter designated by the Postmaster-General of the United States, and the office of Bridgetown, Barbados, and such other offices within the Island of Barbados, as may hereafter be designated by the Postmaster of Barbados; such matter to be admitted to the mails under these articles as shall be sent through such exchange offices from any place in either country to any place in the other.

## ARTICLE II.

There shall be admitted to the mails exchanged under this Convention, articles of merchandise and mail matter, except letters, post cards, and written matter of all kinds that are admitted under any conditions to the domestic mails of the country of origin, except that no packet must exceed 11 pounds (or 5 kilograms) in weight, nor the following dimensions: Greatest length in any direction, three feet six inches; greatest length and girth combined, six feet; and must be so wrapped or inclosed as to permit their contents to be easily examined by postmasters and customs officers; and except that the following articles are prohibited:

Publications which violate the copyright laws of the country of destination; poisonous, and explosive or inflammable substances; fatty substances, liquids, and those which easily liquefy, confections and pastes; live or dead animals, except dead insects and reptiles when thoroughly dried; fruits and vegetables, and substances which exhale a bad odor; lottery tickets, lottery advertisements or lottery circulars; all obscene or immoral articles; articles which may in any way damage or destroy the mails, or injure the persons handling them.

## ARTICLE III.

A letter or communication of the nature of personal correspondence must not accompany, be written on, or inclosed with any parcel.

If such be found, the letter will be placed in the mails if separable, and if the communication be inseparably attached, the whole package will be rejected. If, however, any such should inadvertently be forwarded, the country of destination will collect double rates of postage according to the Universal Postal Union Convention.

No parcel may contain parcels intended for delivery at an address other than that borne by the parcel itself. If such inclosed parcels be detected, they must be sent forward singly, charged with new and distinct parcel-post rates.

## ARTICLE IV.

The packages in question shall be subject in the country of destination to all customs duties and all customs regulations in force in that country for the protection of its customs revenues, and to the following rates of postage, which shall in all cases be required to be FULLY PREPAID with postage stamps of the country of origin, viz :

In the United States, for a parcel not exceeding one pound in weight, 12 cents; and for each additional pound, or fraction of a pound, 12 cents.

In Barbados, for a parcel not exceeding one pound in weight, six pence, and for each additional pound, or fraction of a pound, six pence.

## ARTICLE V.

The sender of each package must make a *Customs Declaration*, pasted upon or attached to the package, upon a special form provided for the purpose (see Model 1, annexed hereto), giving a general description of the parcel, an accurate statement of the contents and value, date of mailing, and the sender's signature and place of residence, and place of address.

The sender will, at the time of mailing the package, receive a certificate of mailing from the post-office where the package is mailed, on a form like Model 2, annexed hereto.

The sender of a package may obtain a return receipt for the same by paying in the United States a fee of five cents, and in Barbados two and a half pence, in addition to the postage on each packet, to be affixed to the packet in stamps of the country of origin.

## ARTICLE VI.

The packages shall be delivered to addressees in the country of destination free of charge *for postage*; but the customs duties properly chargeable thereon shall be collected on delivery in accordance with the customs regulations of the country of destination; and the country of destination may, at its option, levy and collect from the addressee for interior service and delivery a charge not exceeding five cents in the United States and two and a half pence in Barbados on each single parcel of whatever weight; and if the weight exceeds one pound, a charge equal to one cent or one half-penny for each four ounces of weight or fraction thereof.

Each country shall promptly return *empty* to the dispatching office by next mail, all such bags and boxes, but subject to other regulations between the two administrations.

Although articles admitted under this Convention will be transmitted as aforesaid between the exchange offices, they should be so carefully packed as to be safely transmitted in the open mails of either country, both in going to the exchange office in the country of origin and to the office of address in the country of destination.

Each dispatch of a parcel post mail must be accompanied by a descriptive list, in duplicate, of all the packages sent, showing distinctly the list number of each parcel, the name of the sender, the name of the addressee with address of destination, and the declared contents and value; and must be inclosed in one of the boxes or sacks of such dispatch. (See Model 3 annexed hereto.)

## ARTICLE VIII.

As soon as the mail shall have reached the office of destination, that office shall check the contents of the mail.

In the event of the parcel bill not having been received, a substitute should be at once prepared.

Any errors in the entries on the parcel bill which may be discovered, should, after verification by a second officer, be corrected and noted for report to the dispatching office on a form, "Verification certificate," which should be sent in the special envelope.

### *Postal Convention between the United States of America and the Bahamas.*

For the purpose of making better postal arrangements between the United States of America and the Bahamas, the undersigned, William F. Vilas, Postmaster-General of the United States of America, and Sir Ambrose Shea, K. C. M. G., governor of the Bahamas, by virtue of authority vested in them by law, have agreed upon the following articles for the establishment of a parcel-post system of exchanges between the two countries.

#### ARTICLE I.

The provisions of this Convention relate only to parcels of mail matter to be exchanged by the system herein provided for, and do not affect the arrangements now existing under the Universal Postal Union Convention, which will continue as heretofore; and all the agreements hereinafter contained apply exclusively to mails exchanged under these articles, *directly* between the office of New York, in the State of New York, and such other offices within the United States as may be hereafter designated by the Postmaster-General of the United States, and the office of Nassau, N. ## APPENDIX E.

*Postal convention between the United States of America and British Honduras.*

For the purpose of making better postal arrangements between the United States of America and British Honduras, the undersigned, Don M. Dickinson, Postmaster-General of the United States of America, and William James McKinney, Postmaster of British Honduras, by virtue of authority vested in them by law, have agreed upon the following articles for the establishment of a parcels post system of exchanges between the two countries.

## ARTICLE I.

The provisions of this Convention relate only to parcels of mail matter to be exchanged by the system herein provided for, and do not affect the arrangements now existing under the Universal Postal Union Convention, which will continue as heretofore; and all the agreements hereinafter contained apply exclusively to mails exchanged under these articles, *directly* between the office of New Orleans, and such other offices within the United States as may be hereafter designated by the Postmaster-General of the United States, and the office of Belize, and such other offices within British Honduras, as may be hereafter designated by the Postmaster of British Honduras; such matter to be admitted to the mails under these articles as shall be sent through such exchange offices from any place in either country to any place in the other.

## ARTICLE II.

There shall be admitted to the mails exchanged under this Convention articles of merchandise and mail matter except letters, post-cards, and written matter, of all kinds that are admitted under any conditions to the domestic mails of the country of origin, except that no packet must exceed 11 pounds (or 5 kilograms) in weight, nor the following dimensions: Greatest length in any direction, three feet six inches; greatest length and girth combined, six feet; and must be so wrapped or inclosed as to permit their contents to be easily examined by postmasters and customs officers; and except that the following articles are prohibited:

Publications which violate the copyright laws of the country of destination; poisons, and explosive or inflammable substances; fatty substances, liquids, and those which easily liquefy, confections and pastes; live or dead animals, except dead insects and reptiles when thoroughly dried; fruits and vegetables, and substances which exhale a bad odor; lottery tickets, lottery advertisements, or lottery circulars; all obscene or immoral articles; articles which may in any way damage or destroy the mails, or injure the persons handling them.

## ARTICLE III.

A letter or communication of the nature of personal correspondence must not accompany, be written on, or inclosed with any parcel.

If such be found, the letter will be placed in the mails if separable, and if the communication be inseparably attached, the whole package will be rejected. If, however, any such should inadvertently be forwarded, the country of destination will collect double rates of postage according to the Universal Postal Union Convention.

No parcel may contain parcels intended for delivery at an address other than that borne by the parcel itself. If such inclosed parcels be detected, they must be sent forward singly, charged with new and distinct parcel-post rates.

## ARTICLE IV.

The packages in question shall be subject in the country of destination to all customs duties and all customs regulations in force in that country for the protection of its customs revenues, and to the following rates of postage, which shall in all cases be required to be FULLY PREPAID with postage stamps of the country of origin, viz:

In the United States, for a parcel not exceeding one pound in weight, 12 cents; and for each additional pound, or fraction of a pound, 12 cents.

In British Honduras, for a parcel not exceeding one pound in weight, six pence; and for each additional pound, or fraction of a pound, six pence.

## ARTICLE V.

The sender of each package must make a *Customs Declaration*, pasted upon or attached to the package, upon a special form provided for the purpose (see Model 1, "A," annexed hereto), giving a general description of the parcel, an accurate statement of the contents and value, date of mailing, and the sender's signature and place of residence, and place of address.

The sender will, at the time of mailing the package, receive a certificate of mailing from the post-office where the package is mailed, on a form like Model 2, annexed hereto.

The sender of a package may obtain a return receipt for the same by paying in the United States a fee of five cents, and in British Honduras two pence, in addition to the postage on each packet, to be affixed to the packet in stamps of the country of origin.

The sender of a package may have the same registered by paying the registration fee required for registered articles in the country of origin, and will receive the return receipt without special charge therefor.

## ARTICLE VI.

The addressees of registered articles shall be advised of the arrival of a package addressed to them, by a notice from the post-office of destination.

The packages shall be delivered to addressees in the country of destination free of charge *for postage*; but the customs duties properly chargeable thereon shall be collected on delivery in accordance with the customs regulations of the country of destination; and the country of destination may, at its option, levy and collect from the addressee for interior service and delivery a charge not exceeding five cents in the United States and two and a half pence in the British Honduras on each single parcel of whatever weight; and if the weight exceeds one pound, a charge equal to one cent or one-half penny for each four ounces of weight or fraction thereof.

## ARTICLE VII.

The packages shall be considered as a component part of the mails exchanged direct between the United States and British Honduras, to be dispatched by the country of origin to the other at its cost and by such means as it provides, but must be forwarded, at the option of the dispatching office, either in boxes prepared expressly for the purpose or in ordinary mail sacks, to be marked "Parcel post," and not to contain any other articles of mail matter, and to be securely sealed with wax, or otherwise, as may be mutually provided by regulations hereunder.

Each country shall promptly return *empty* to the dispatching office by next mail, all such bags and boxes, but subject to other regulations between the two administrations.

Although articles admitted under this Convention will be transmitted as aforesaid between the exchange offices, they should be so carefully packed as to be safely transmitted in the open mails of either country, both in going to the exchange office in the country of origin and to the office of address in the country of destination.

Each dispatch of a parcel post mail must be accompanied by a descriptive list, in duplicate, of all the packages sent, showing distinctly the list number of each parcel, the name of the sender, the name of the addressee with address of destination, and the declared contents and value; and must be inclosed in one of the boxes or sacks of such dispatch. (See Model 3 annexed hereto.)

## ARTICLE VIII.

As soon as the mail shall have reached the office of destination, that office shall check the contents of the mail.

In the event of the parcel bill not having been received a substitute should be at once prepared.

Any errors in the entries on the parcel bill which may be discovered, should, after verification by a second officer, be corrected and noted for report to the dispatching office on a form, "Verification certificate," which should be sent in the special envelope.

If a parcel advised on the bill be not received, after the non-receipt has been verified by a second officer, the entry on the bill should be canceled and the fact reported at once.

If a parcel be observed to be insufficiently prepaid, it must not be taxed with deficient postage, but the circumstance must be reported on the verification certificate form.

Should a parcel be received in a damaged or imperfect condition, full particulars should be reported on the same form.

If no verification certificate or note of error be received, a parcel mail shall be considered as duly delivered, having been found on examination correct in all respects.

#### ARTICLE IX.

If a package cannot be delivered as addressed, or is refused, the sender will be communicated with through the central administration of the office of destination, as to the manner in which he desires the package to be disposed of, and if no reply is received from him within a period of three months from the date of the notice, the package may be sold for the benefit of whom it may concern.

An order for redirection or reforwarding must be accompanied by the amount due for postage necessary for the return of the article to the office of origin, at the ordinary parcel rates.

When the contents of a parcel which cannot be delivered are liable to deterioration or corruption, they may be destroyed at once, if necessary, or if expedient, sold, without previous notice or judicial formality, for the benefit of the right person, the particulars of each sale being noticed by one post-office to the other.

#### ARTICLE X.

The Post-Office Department of either of the contracting countries will not be responsible for the loss or damage of any package, and no indemnity can consequently be claimed by the sender or addressee in either country.

#### ARTICLE XI.

Each country shall retain to its own use the whole of the postages, registration and delivery fees, it collects on said packages; consequently, this Convention will give rise to no separate accounts between the two countries.

#### ARTICLE XII.

The Postmaster-General of the United States of America, and the Postmaster of British Honduras, shall have authority to jointly make such further regulations of order and detail as may be found necessary to carry out the present Convention from time to time; and may, by agreement, prescribe conditions for the admission in packages exchanged under this Convention of any of the articles prohibited by Article II

#### ARTICLE XIII.

This Convention shall take effect and operations thereunder shall begin on the first day of March, 1888, and shall continue in force until terminated by mutual agreement, but may be annulled at the desire of either Department, upon six months' previous notice given to the other.

Done in duplicate, and signed at Washington, the twenty-third day of January, 1888, and at Belize, the tenth day of February, 1888.

## APPENDIX F.

*Parcels post convention between the United States of America and Mexico.*

For the purpose of making better postal arrangements between the United States of America, and the United Mexican States, the undersigned, Don M. Dickinson, Postmaster General of the United States of America, by virtue of authority vested in him by law, and Matias Romero, Envoy Extraordinary and Minister Plenipotentiary of the United Mexican States at Washington, duly empowered thereto by the President of the United Mexican States, have agreed upon the following articles for the establishment of a parcels post system of exchanges between the two countries.

## ARTICLE I.

The provisions of this Convention relate only to parcels of mail matter to be exchanged by the system herein provided for, and affect the arrangements now existing only so far as they relate to merchand. se parcels as provided for under the Convention between the two contracting countries signed on the 4th of April, 1887; and all other arrangements therein contained will continue as heretofore; and all the arrangements herein-after contained apply exclusively to merchandise parcels mails exchanged under these articles.

## ARTICLE II.

1. There shall be admitted to the mails exchanged under this Convention, articles of merchandise and mail matter, except letters, post-cards, and written matter, of all kinds that are admitted under any conditions to the domestic mails of the country of origin, except that no packet must exceed five kilograms or eleven pounds in weight, nor the following dimensions: Greatest length in any direction sixty centimeters, or two feet; greatest girth one hundred and twenty centimeters or four feet; and must be so wrapped or enclosed as to permit their

Con objeto de establecer mejores arreglos postales entre los Estados Unidos de America y los Estados Unidos Mexicanos, los infrascritos, Don M. Dickinson, Administrador General de Correos de los Estados Unidos de America, en ejercicio de las facultades que le concede la Ley, y Matias Romero, Enviado Extraordinario y Ministro Plenipotenciario de los Estados Unidos Mexicanos en Washington, debidamente autorizado para ello por el Presidente de dichos Estados Unidos Mexicanos, han convenido en los siguientes artículos para el establecimiento de un sistema de Paquetes Postales, entre los dos países.

## ARTICULO I.

Las estipulaciones de esta Convencion se refieren tan solo á los paquetes de objetos enviados por el correo, que se cambien por el sistema que ella establece, y afectan solamente en lo que se relaciona con los paquetes de mercancías, los arreglos que ahora existen conforme á la Convencion Postal de 4 de Abril de 1887, y todas las demas estipulaciones de dicha Convencion continuaran vijentes como lo estan ahora; y todas las estipulaciones contenidas en la presente Convencion se aplicaran exclusivamente á las balijas de paquetes de mercancías que ce cambien conforme á estos artículos.

## ARTICULO II.

1. Se admitiran en las balijas que se cambien conforme á esta Convencion, mercancías y objetos trasmisibles por el correo, de cualquiera género que sean, exceptuando cartas, tarjetas postales y todo papel escrito, que se admitan conforme á los reglamentos que rijen respecto de las balijas domesticas del pais de origen, con tal de que ningun paquete exceda de cinco kilogramos ú once libras de peso, ni de las dimensiones siguientes: maximo de largo en cualquiera direccion, sesenta centímetros ó dos pies; máximo de perimetro, un metro veinte centímetros ó

contents to be easily examined by postmasters and customs officers; and except the articles mentioned in Article I, paragraph "a", of the Postal Convention between the two contracting countries of April 4, 1887, which are hereby prohibited.

2. All admissible articles of merchandise mailed in one country for the other, or received in one country from the other, whether by land or sea conveyance, shall be free from any detention or inspection whatever, except such as is required for collection of customs duties, and shall be forwarded by the most speedy means to their destination, being subject in their transmission to the laws and regulations of each country, respectively.

### ARTICLE III.

1. A letter or communication of the nature of personal correspondence must not accompany, be written on, or enclosed with any parcel.

2. If such be found, the letter will be placed in the mails if separable, and if inseparably attached, the whole package will be rejected. If, however, any such should inadvertently be forwarded, the country of destination will collect double rates of postage according to the Universal Postal Union Convention.

3. No parcel may contain parcels intended for delivery at an address other than the one borne by the parcel itself. If such inclosed parcels be detected, they must be sent forward singly, charged with new and distinct parcel post rates.

### ARTICLE IV.

1. The following rates of postage shall in all cases be required to be fully prepaid with postage stamps of the country of origin, viz:

2. For a parcel not exceeding four hundred and sixty grams or one pound in weight, twelve cents; and for each additional four hundred and sixty grams or one pound, or fraction thereof, twelve cents.

3. The packages shall be promptly delivered to addressees at the post offices of address in the country of destination, free of charge for postage; but the country of destination may at its option, levy and collect from the addressee for interior service and delivery a charge not exceeding five cents on each single parcel of whatever weight; and if the weight ex-

ceeds four pounds; and deberá envolverse ó cubrirse de manera que permita que su contenido sea fácilmente examinado por los empleados del correo y de la aduana; prohibiéndose por el presente la admisión en las balijas que se cambien entre los dos países, conforme á esta Convención, de los objetos, mencionados en el Artículo I, párrafo a, de la Convención Postal entre los dos países contratantes de 4 de Abril de 1887.

2. Todos los paquetes de mercancías admisibles que se depositen en el correo de un país con destino al otro, ó que se reciban en un país precedentes del otro, ya sea que se trasmitan por tierra ó por mar, serán libres de toda detención ó inspección de cualquiera género que sea, exceptuando solamente la que fuere necesaria para cobrar los derechos aduanales, y se despacharán á su destino por la vía más rápida, quedando sujetos en su transmisión á las leyes y reglamentos de cada país respectivamente.

### ARTICULO III.

1. Ninguna carta ó comunicacion que tenga el caracter de correspondencia personal, podrá acompañar al paquete, ya sea que este escrita sobre el, ó incluida en el mismo.

2. Si se encontrare alguna carta, se pondrá en el correo, si pudiere separarse, y estuviere adherida de manera que no se pueda separar, se desechará el paquete entero. Sin embargo, si alguna carta fuere enviada inadvertidamente, el país de destino cobrará doble porte por ella, conforme á la convención de la Union Postal Universal.

3. Ningun paquete podrá contener bultos que tengan que entregarse á una direccion diferente de la que aparezca sobre el mismo paquete. Si se descubrieren tales bultos, se enviarán uno por uno, cobrandose nuevo y distinto porte por cada uno de ellos.

### ARTICULO IV.

1. Se pagaran previamente y en su totalidad, en todo caso, los siguientes portes de correo en estampillas del correo del país de origen, á saber:

2. Por un paquete que no exceda del peso de cuatrocientos sesenta gramos, ó una libra, doce centavos, y por cada cuatrocientos sesenta gramos, ó una libra, adicionales, ó fracción de este peso, doce centavos.

3. Los paquetes que se entregaran prontamente á las personas á quienes se dirijan, en la oficina de Correos de su direccion, en el país de su destino, libres de todo recargo por porte de correo; pero el país del destino puede, á su opcion, imponer y cobrar á la persona á quien se dirija el paquete, y en compensacion del servicio interior y de entrega, un recargo que no ex-

ceeds four hundred and sixty grams or one pound, a charge equal to one cent for each one hundred and fifteen grams, or four ounces, of weight, or fraction thereof.

#### ARTICLE V.

1. The sender will, at the time of mailing the package, receive a receipt of mailing from the post office where the package is mailed, on a form like Model I, annexed hereto.

2. The sender of a package may have the same registered by paying the registration fee required for registered articles in the country of origin.

3. An acknowledgment of the delivery of a registered article shall be returned to the sender when requested; but either country may require of the sender prepayment of a fee therefor not exceeding five cents.

4. The addressees of registered articles shall be advised of the arrival of a package addressed to them, by a notice from the post office of destination.

#### ARTICLE VI.

1. The sender of each package shall make a Customs Declaration, pasted upon or attached to the package, upon a special Form provided for the purpose (see Model 2 annexed hereto) giving a general description of the parcel, an accurate statement of the contents and value, date of mailing, and the sender's signature and place of residence, and place of address. The Customs Declaration herein provided shall be omitted in the country of origin during such period as the Postmaster General of the country of destination shall request such omission.

2. The packages in question shall be subject in the country of destination to all customs duties and all customs regulations in force in that country for the protection of its Customs Revenues; and the customs duties properly chargeable thereon shall be collected on delivery, in accordance with the customs regulations of the country of destination.

#### ARTICLE VII.

Each country shall retain to its own use, the whole of the postages, registration, and delivery fees it collects on said packages; consequently, this Convention will give rise to no separate accounts between the two countries.

#### ARTICLE VIII.

1. The packages shall be considered as a component part of the mails exchanged

ceda de cinco centavos por cada paquete que no pase de cuatrocientos sesenta gramos, ó una libra, y si el paquete excedirse de ese peso, se cobrará un centavo por cada ciento quince gramos, ó cuatro onzas de peso, ó fraccion de ese peso.

#### ARTICULO V.

1. Al depositar en el correo un paquete, se entregará al remitente un recibo que acredite su entrega en la oficina de correo que lo recibió conforme al modelo anexo No. I.

2. El remitente de un paquete podrá certificarlo, pagando el derecho de certificación que se cobre en el país de su origen.

3. Se enviará al remitente cuando así lo solicite, un documento que justifique la entrega de un objeto certificado; pero cada país puede exigir del remitente el pago previo de un derecho por ese servicio, que no exceda de cinco centavos.

4. Se informará á las personas á quienes se dirijan artículos certificados de la llegada de un paquete dirigido á ellas, por la oficina de correos de destino.

#### ARTICULO VI.

1. El remitente de cada paquete hará una declaración aduanal que se pegará ó agregará al paquete, según una fórmula especial que se le facilitará para ese objeto, (Véase el modelo anexo No. 2) que contenga una descripción general del paquete, una manifestación exacta de su contenido y valor, fecha del envío, fecha y lugar de residencia del remitente y lugar de su destino. Esta declaración aduanal se omitirá en el país de origen, durante el tiempo que así lo solicite el Administrador General de Correos del país de destino.

2. Estos paquetes quedaran sujetos en el país de su destino á todos los reglamentos y derechos aduanales que estuvieren vigentes en el mismo país, para proteger las rentas de sus aduanas; los derechos aduanales que debidamente correspondan cobrar sobre los mismos paquetes, serán cobrados al entregarse estos, de acuerdo con los reglamentos aduanales del país de destino.

#### ARTICULO VII.

Cada país retendrá para su propio uso, el total del porte de correo, de los derechos de certificación y de entrega que colecte sobre dichos paquetes; y en consecuencia, esta Convención no motivará cuentas separadas entre los dos países.

#### ARTICULO VIII.

1. Los paquetes se consideraran como parte componente de las balijas cambiadas

direct between the United States of America and Mexico, to be despatched by the country of origin to the other at its cost and by such means as it provides, in ordinary mail sacks to be marked "Parcels Post" and to be securely sealed with wax or otherwise as may be mutually provided by regulations hereunder.

2. Registered packages shall be exchanged in separate and distinct sacks marked "Registered Parcels Post."

3. Each country shall return to the despatching office by next mail, all bags or sacks used in the exchange of parcels.

4. Although articles admitted under this Convention will be transmitted as aforesaid between the exchange offices, they should be so carefully packed as to be safely transmitted in the open mails of either country, both in going to the exchange office in the country of origin and to the office of address in the country of destination.

5. Each despatch of a parcel post mail must be accompanied by a descriptive list in duplicate, of all the packages sent, showing distinctly the list number of each parcel, the name of the sender, the name of the addressee with address of destination; and must be enclosed in one of the sacks of such despatch under the Form of Model 3, annexed hereto.

#### ARTICLE IX.

Exchanges of mails under this Convention from any place in either country to any place in the other, whether by sea or overland, shall be effected through the post offices of both countries already designated as Exchange Post Offices, or through such others as may be hereafter agreed upon, under such regulations relative to the details of the exchanges, as may be mutually determined to be essential to the security and expedition of the mails and the protection of the Customs Revenues.

#### ARTICLE X.

1. As soon as the mail shall have reached the exchange office of destination, that office shall check the contents of the mail.

2. In the event of the Parcel Bill not having been received, a substitute should at once be prepared.

3. Any errors in the entries on the Parcel Bill which may be discovered, shall, after verification by a second officer, be corrected and noted for report to the despatching office on a Form, "Verification Certifi-

directamente entre los Estados Unidos de America y Mexico, y seran despachados por el pais de su origen al otro, á su costo y por los medios que el provea, en sacos ordinarios de correspondencia que se n arcaran: "Paquetes Postales" y se sellaran con la seguridad debida, con lacre, ó de alguna otra manera que se determine mutuamente por los reglamentos respectivos.

2. Los paquetes certificados se cambiaran en sacos separados y distintos marcados: "Paquetes Postales Certificados."

3. Cada pais devolverá á la oficina de correo que los despache, por el próximo correo, todos los sacos usados en el cambio de paquetes.

4. Aunque los objetos admitidos conforme á esta Convencion se trasmitiran en la forma designada, entre las oficinas de cambio, deberan empacarse cuidadosamente, á fin de que puedan, trasmitirse en balijas abiertas de un pais, tanto á la oficina de correos de cambio en el pais de su origen, como á la oficina de correos á donde se dirijan, en el pais de su destino.

5. Cada envio de paquetes postales irá acompañado de una lista descriptiva, hecha por duplicado, de todos los paquetes enviados, que demuestre distintamente el número de lista de cada paquete, el nombre del remitente, el nombre de la persona á quien se dirige con la direccion de su destino, y deberá incluirse en uno de los sacos del mismo envio, de acuerdo con el modelo numero 3, anexo á esta Convencion.

#### ARTICULO IX.

El cambio de balijas conforme á esta Convencion, de cualquiera lugar de un pais á cualquiera lugar del otro, ya sea por mar ó por tierra, se verificará por las oficinas de correos de ambos paises, ya designadas como oficinas de correos de cambio, ó por aquellas otras que pueda convenirse mas adelante, conforme con los reglamentos relativos á los detalles de los cambios que se acuerden mutuamente como esenciales á la seguridad y celeridad de las balijas y á la proteccion de los derechos aduanales.

#### ARTICULO X.

1. La oficina de correos del pais del destino, anotará el contenido de la balija, tan luego como la reciba.

2. En el caso de que no se recibiere una lista de los paquetes enviados por el correo, se hará desde luego una que la sustituya.

3. Los errores que puedan haberse cometido y se descubrieren en la lista de los paquetes enviados por el correo, se corregiran despues de haber sido rectificados por un segundo empleado, y se comuni-

cate," which shall be sent in the special envelope.

4. If a parcel advised on the bill be not received, after the non-receipt has been verified by a second officer, the entry on the bill should be canceled and the fact reported at once.

5. Should a parcel be received in a damaged or imperfect condition, full particulars shall be reported on the same form.

6. If no Verification Certificate or note of error be received, a parcel mail shall be considered as duly delivered, having been found on examination correct in all respects.

#### ARTICLE XI.

If the packages can not be delivered as addressed, or if they are refused, they should be reciprocally returned without charge, directly to the dispatching office of exchange, at the expiration of thirty days from their receipt at the office of destination, and the country of origin may collect from the sender for the return of the parcel, a sum equal to the postage when first mailed.

#### ARTICLE XII.

The Post Office Department of either of the contracting countries will not be responsible for the loss or damage of any package, and no indemnity can consequently be claimed by the sender or addressee in either country.

#### ARTICLE XIII.

The Postmaster-General of the United States of America, and the Director General of Posts of the United Mexican States, may by agreement, exempt on account of insecurity in the conveyance, or other causes, certain post offices in either country, from receiving or despatching packages of merchandise weighing from two to five kilograms as provided for by this Convention, and shall have authority to jointly make such further regulations of order and detail, as may be found necessary to carry out the present Convention from time to time; and may by agreement prescribe conditions for the admission to the mails of any of the articles prohibited by Article I of the Postal Convention of the 4th of April, 1887.

caran á la oficina que envío los paquetes, en la forma de "Certificado de Comprobacion," que se enviará en cubierta especial.

4. Si no se recibiere algun paquete de los contenidos en la lista, despues de haberse certificado este hecho por un segundo empleado, se cancelará la anotacion respectiva de la lista, y se dará cuenta de este hecho desde luego.

5. Cuando se recibiere un paquete averiado ó en un estado imperfecto, se comunicaran en la misma forma detalles completos sobre su estado.

6. Si no se recibiere "Certificado de Comprobacion," ó noticia de error, se considerará que la balija de paquetes fué debidamente recibida y que habiendo sido examinada, se encontro exacta bajo todos aspectos.

#### ARTICULO XI.

Si no pudiere entregarse un paquete á la persona á quien se dirige, ó si esta se rehusare á recibirlo, se devolverá recíprocamente, sin recargo, y directamente á la oficina que lo despachó, á la espiracion de treinta dias contados desde su recibo, por la oficina de destino, y el pais de origen puede cobrar al remitente por la devolucion del paquete, una suma igual al porte que causó cuando se puso por primera vez en el correo.

#### ARTICULO XII.

El Departamento de Correos de cada uno de los paises contratantes, no será responsable por la pérdida ó averia que sufra algun paquete, y no podrá reclamarse, por lo mismo, en ninguno de los dos paises, indemnizacion alguna por quien lo envíe, ni por la persona á quien vaya dirigido.

#### ARTICULO XIII.

El Administrador general de Correos de los Estados Unidos de America y el Administrador general de Correos de los Estados Unidos Mexicanos podran, por convenio, exceptuar, por motivo de inseguridad en la conduccion ó por otras causas, á ciertas oficinas de correo de cada pais, del recibo ó despacho de paquetes de mercancías que pesen de dos á cinco kilogramos, estipulado en esta Convencion; quedan autorizados para hacer de tiempo en tiempo y de comun acuerdo, los reglamentos posteriores de órden y detalle que consideren necesarios para poner en ejecucion esta Convencion, y podran, por mutuo consentimiento, establecer condiciones para la admision en las balijas de cualquiera de los objetos prohibidos por el Artículo I, de la Convencion Postal de Abril de 1887.

## ARTICLE XIV.

## ARTICULO XIV.

This Convention shall be ratified by the contracting countries in accordance with their respective laws, and its ratification shall be exchanged at the City of Washington as early as possible. Once ratified, and its ratifications exchanged, it shall take effect, and operations thereunder shall begin on the 1st day of July, 1888, and shall continue in force until terminated by mutual agreement, but may be annulled at the desire of either Department, upon six months' previous notice given to the other.

Done in duplicate, and signed at Washington the 28th day of April, one thousand eight hundred and eighty-eight.

[L. s.] (Signed) DON M. DICKINSON,  
*Postmaster-General of the  
United States of America.*

Esta convencion se ratificarà por los paises contratantes de acuerdo con sus respectivas leyes, y sus ratificaciones se canjearan en la ciudad de Washington, lo mas pronto que fuere posible. Una vez ratificada y canjeadas sus ratificaciones, comenzará à tener efecto el 1 de Julio de 1888, y continuará en vigor hasta que se termine por consentimiento mutuo; pero podrá anularse, con la notificacion de uno de los Departamentos de Correos hecha al otro, con seis mesis de anticipacion.

Hecho por duplicado y firmado en Washington el 28 de Abril de mil ochocientos ochenta y ocho.

No. 10.—Gross receipts, expenses, and net revenue of *Presidential post-offices for the fiscal year ended June 30, 1888.*

[This table shows the actual amounts charged and credited at each office, and when full returns have not been received and audited, or an office has become Presidential during the year, the amount of salary reported may be less than the annual salary as stated in the Official Register. As salaries of Presidential offices are based on the gross receipts of the previous year, the amount allowed at offices where the revenues have fallen off will in some instances be found largely in excess of the receipts for the year. Allowances for clerk-hire at offices of the first and second classes are based on the revenues of such offices, but such allowances are made to third-class offices for the distribution of the mails where diverging star routes are supplied at the same time the local mail is distributed to the public. As all clerk-hire is paid from one appropriation, the expenditures are necessarily taken up on the quarterly returns of all postmasters as office expenses, and are so reported here. The basis of allowance being different, no comparison should be made between the percentage of expenses of third-class offices and those of the first and second classes.]
